Spread Good Thick Linoleum

Your kitchen work will tire you less if you put down good linoleum.

Linoleum is made of cork and oil. It has a spring to it that softens the constant pounding of your heels on the hard wooden floor.

Good linoleum costs little more than a shoddy grade; costs less than a rug; is sanitary and wears for years.

Put linoleum on your kitchen floor. It protects the paint and makes your work less.

Printed grade 50c, 60c and 75c per yard.

Inlaid grade, 90c, \$1.00, 1.25, 1.50 per yard.

We carry in stock both the imported and domestic linoleums.

Put Up the Curtains

You will need new portiers perhaps when the fall "cleaning" is done—new lace curtains for one or two rooms—curtain poles and rings.

You'll want something our drapery section can supply more quickly and cheaply than you can get it elsewhere.

You'll find an unusual exhibit of fine lace curtains and new patterns in scrim.

HE DIDN'T LIKE WHIGS.

And He Had No Use For Portraits of Henry Clay.

In Daviess county, Ky., at the time when Henry Clay was running for the presidency against General Jackson, there lived a plain, industrious farmer. He was an ardent politician, noted for his hostility to Clay and his party. But his interest in politics did not make him indifferent to his wife's happiness. While in town one day he thought he would surprise the good woman by presenting her with a set of new dishes. He selected an attractive pattern, and as he was in a hurry did not examine the dishes closely, but had them packed and placed in his wagon.

His wife was delighted with the gift, but no slight examination satisfied her feminine curiosity. In turning over a dish she discovered on the under side a portrait of Henry Clay. Every piece was thus marked. To tease her husband she asked him the cause of his "sudden change of politics."

"Change of politics?" shouted the husband, as excited as if he had been charged with a crime. "What do you mean?"

Thereupon she showed him the portrait on the chin. As if he were ridiculing himself of a noxious thing, the farmer gathered up every dish and, carrying them to the door, broke them into fragments on the stone steps. He purchased another set of dishes in a few days, but not until he had made sure that there was no Whig politician's portrait on them.—Youth's Companion.

Weight of a Piece of Ice.

A rough and ready method of calculating the weight of a piece of ice is afforded by the fact that a cubic foot of this substance weighs approximately 57.25 pounds. First measure the breadth, length and height of the cake, and the three results, being multiplied, will give the number of cubic inches. If this answer be in turn multiplied by 0.33 the approximate number of pounds will result. For instance, a cake 8 by 9 by 10 inches contains 720 cubic inches. This multiplied by .33 gives 237.6 pounds, the correct weight of such a piece of ice.

Heartless.

"Nobody knows how I have suffered," she complained. "Does your husband abuse you?" "No, but he can sit for hours without hearing a word that I say."—Chicago Record-Herald.

Jones, able seaman of H. M. S. Vermont, gazed into the face of his commander pleadingly. "You are always on leave," exclaimed the officer. "What on earth do you require extra leave for now?" "My sister's baby's going to be waxinated, sir," replied Jones. "And what has that to do with you?" "She's my sister, d'ye see, sir?" exclaimed Jones, with a hurt look. "What, the baby?" "No, sir. The baby's sister's my brother—I mean, I'm the mother's baby—er—the father's my mother—no—I mean"—"You meant!" broke in the commanding officer angrily. "What do they want you for, that's the point?"
