In The "Olden Days"

people hesitated about using electricity in the home because they felt that it was an expensive luxury and that they would have no control over the amount of their bills. To a certain extent this feeling was justified in the early days of electric lighting, but to-day electricity has become such a household necessity that the modern housekeeper justly regards its use as a means of REAL ECONOMY.

Outside of the greatly reduced cost of electricity, an important reason for this change is the fact that to-day IT IS POSSIBLE TO TELL THE AMOUNT OF CURRENT REQUIRED TO OPERATE ANY GIVEN LAMP OR DEVICE, with the result that GUESS-WORK IS A THING OF THE PAST and the prudent housekeeper can REGULATE the amount of the monthly bills.

If you do not enjoy the benefits of electric service in YOUR home, we should like to show you how electricity will reduce YOUR household cares and expenses. Phone 246-2 and our representative will call at your convenience.
