

WOMEN'S STOMACH TROUBLES

The Great Woman's Medicine Often Just What Is Needed.

We are so used to thinking of Lydia E. Pinkham's Vegetable Compound as a remedy exclusively for female ills that we are apt to overlook the fact that it is one of the best remedies for disorders of the stomach.

For stomach trouble of women it is especially adapted, as it works in complete harmony with the female organism, since it contains the extracts of the best tonic roots and herbs. It tones up the digestive system, and increases the appetite and strength. Here is what one woman writes showing what this medicine does:—

Newfield, N. Y.—"I am so pleased to say I can recommend Lydia E. Pinkham's Vegetable Compound as an economical and beneficial remedy in most ailments pertaining to women. At least I found it so by only taking two bottles. I had indigestion in a bad form and I am now feeling in the best of health and owe it all to Lydia E. Pinkham's Vegetable Compound."—Mrs. BURN WILLIAMS, R. D. No. 29, Newfield, N. Y.

Many women suffer from that "all gone feeling," and "feel so faint," while doing their work. Ten chances to one their digestive system is all out of order. A tablespoonful of Lydia E. Pinkham's Vegetable Compound after each meal should completely remedy this condition in a few days.

EVERY WOMAN SHOULD FLIRT, SAYS ACTRESS

Constance Collier Indulges in Some 1916 Advanced Sex Philosophy.

New York, Sept. 22.—"Every woman should know how to flirt," said Constance Collier, English actress beauty, yesterday, and she added that age and weight have nothing to do with it.

"Beauty has little to do with a successful flirtation," said Miss Collier. "Plain women are often the most delightful flirts."

"Women who flirt preserve their looks and figure longer than those who settle down like the old-fashioned Japanese wife, who shaved her eyebrows and blackened her teeth to prove her conjugal devotion. To-day men seek in a wife a pal, a friend and a flirt."

HIS JONAH DAY.

Captain Birnie Now Convinced That Friday is That.

Boston, Sept. 22.—The sailors' superstition that a voyage begun on Friday is an unlucky one, has been impressed again on Capt. George Birnie of the Portland schooner Lucia Porter, who arrived here yesterday with six members of his crew passengers on the steamship Celtic. He reported his vessel abandoned, water-logged and derelict, a total loss, 600 miles west of the Azores.

"Disaster has ended my last three voyages," Captain Birnie said. "I began them all on Friday, because I thought that superstition was a dream. Now, I've decided I'll never sail again if I have to start on Friday."

RED LIPS AND HEALTH

The first place that anemia, or thin blood, shows is in the lips and gums and the membranes that line the eye lids. You may be naturally pale and still be healthy but when these membranes lose their bright red color your blood is deficient in quantity or color.

Thin blood is a danger. It invites disease. The organisms of the blood fight off disease germs. Thin blood means less power to do this. For instance, when you cut yourself it does not heal so quickly if your blood is thin and weak.

To build up the blood there is one remedy that has been a household word for a generation, Dr. Williams' Pink Pills for Pale People. They tone up the entire system, make the blood rich and red, strengthen the nerves, increase the appetite, put color in the cheeks and lips and drive away that unnatural tired feeling. Plenty of sunlight, good wholesome food and fresh air will do the rest.

Two books, "Building Up the Blood" and "What to Eat and How to Eat" give just the information that every mother of a growing girl needs. They are free. Write for them today to the Dr. Williams Medicine Co., Schenectady, N. Y. Your own druggist sells Dr. Williams' Pink Pills.

TANKS NAMED "LAND NAVY"

New Monsters Withstood a Five-Hour Attack

CLEAN OUT THE TRENCHES

"Cruel and Efficient," Says a German Message

London, Sept. 22.—A writer in the Daily News thus describes incidents in Somme battles where the new "tanks" were employed:

"One whose steering gear got out of order couldn't turn to the right or left, so it trundled straight ahead until quite out of touch with the infantry, then sat down on a German trench, and for five hours withstood bomb attacks.

"In another case the land ship found the infantry was not coming on behind, so it went back to find out what was the matter. They were held up by a trench which the tank had overlooked, where a strong bomb party of Germans were situated. So the machine walked over to the trench, deposited itself on top of it and wiped the bomb party out.

"One tank is known to have put out of action six German machine guns in a single position. Another wandered around for hours, peering out German machine gun positions in shell-holes about the open and dealing with them firmly when found.

"Another, after rendering yeoman service in the operations in High wood, went on to what it thought was our front trench and then discovered it was a German one. It came back shortly afterward with 25 German prisoners, who walked beside it like a flock of sheep, cowed by its machine guns.

"Another cleaned out a German machine gun post in a shell hole and then one of the gunners of the crew got out and took charge of a German gun and stayed there to use it against its former owners.

"They have proved themselves real and formidable engines of war, and a new service has been created: His Majesty's land navy."

Paris, Sept. 21.—A document in the form of a confidential service order has been found on a German prisoner recently captured. The order is dated Sept. 14 and was issued by the chief of the general staff of the third army group to the officers.

It refers to the "new battle engines employed by the enemy, whose cruelty is equalled by their efficiency," evidently meaning the new armored automobiles used by the British, the so-called tanks. "No doubt," says the order, "the enemy will intensify the use of these monstrous engines and measures must be taken to combat them as far as possible."

EIGHT HOURS FOR STUDY

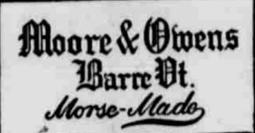

Recommended By Pres. Thomas to Middlebury College Students.

In formally opening the 117th year of Middlebury college this week President John M. Thomas delivered the following address:

"At this opening of the 117th year of Middlebury college and at this first student assembly in this stately and beautiful chapel, whose dignity and impressiveness must move us all to serious and earnest thought, I wish to sound a note of progress in the things which make up the inner life of a college. What shall it profit us if we gain magnificent buildings and rich endowments, and boast a wide domain of primeval forest, if we lose that spirit of high ambition and academic earnestness which has been all our glory in the great days of the past? Silas Wright and Solomon Foote, Edward J. Phelps and John G. Saxe, Henry Norman Hudson and Albert Hurd, and Stearns and Kellogg, and Brainard, and Mead, and Hepzibah, and from dormitories with rooms with bath, but from great teachers, like Nathaniel Chipman, and John Hough, and Solomon Stoddard, and Charles B. Adams, and George N. Boardman, and from a resolute purpose on their own part to master Greek tragedy and to know Shakespeare, and to grip the problems of Calculus.

"There is such a thing as inspiring teaching, classroom contact that stirs souls and awakens life and builds men. There are men of quiet, subtle, pervasive influence, who never thrill you, but who refine and purify you, and imbue you with the gentle graces and give you an honor which you never lose for the higher things of life. There are men who seem to know intuitively the common ground between themselves and those beneath them, who keep by instinct on that enticing borderland just beyond the known and not too far within the unknown, never drifting over the familiar, never lost in the clouds, but always adding new insights, new visions of truth, while leaving the student with a keen unrest and an earnest resolution to further inquiry. That is great teaching, the teaching not of subjects but of men, teaching full of vitality and power, that builds character and sends men forth themselves to kindle fire upon the earth. In the toil and drag of the common day we are apt to forget the goal, but in a moment like this, on the day of opening of the greatest opportunity our college ever had, it comes clearly before us and we resolve to aspire toward it with all our strength.

"But the most inspiring teaching coupled with the wisest administrative methods will fail without earnest student co-operation. And here the difficulty is not in good intentions, but in intelligent, common-sense planning to effect the desired results. There are enough good purposes and high ideals in this chapel this morning to give us the cleanest, most wholesome, most earnest little college between the two great seas. What may we do to realize those ideals and have such a college? In the

"Progressive" and "Up-to-Date" are the terms written boldly across the name of the great Leopold Morse Company, Boston, makers of Morse-Made Clothes.

For in spite of the fact that this famous firm is one of the longest established institutions in the country making Men's and Young Men's ready-for-wear clothes, it is known far and wide as a house conspicuously wide awake to everything that is new in garment making.

Progressive, yet sanely conservative, this illustrious House has achieved a standard of clothing MERIT that is accepted wherever men's clothes are worn as the last word of honest construction, dependable material, and absolutely perfect Style. Morse Made Clothes are without peer today in all the ready-for-wear field.

In preparing for your Fall and Winter inspection the best showing of Men's and Young Men's Suits and Overcoats that money and experience could command, we have turned to the Leopold Morse Company for the leading garments in our unsurpassed stock.

We would deeply appreciate the honor of showing you our Morse Line

Morse Made Clothes bear two guarantees of satisfaction: their makers' and our own. They bear, besides, that great endorsement that assures you of perfect factory conditions and fair pay to the workers:—

The Union Label of the United Garment Workers of America

Moore & Owens Barre's Leading Clothiers 122 North Main Street

first place we may see that we do not forget them, but rather strengthen and confirm them from day to day. And here I count much upon our new chapel, with its daily service. I suggest that we keep this chapel for its proper use, a place of duty. This is not a church; it is a college chapel. It is not designed to facial any man from the faith of his fathers. Its influence, rather, should be to strengthen each student in his own religious allegiance. But it is a place where under the influence of holy truth common to us all we may each be held to our best and worthiest. Our entrance to this building should mark a new day for reverent room to a new influence, gentle, elusive, mystical, but real and deep, and holy, which should refine our feelings, ennoble our ambitions, and purify our deeds, until unconsciously our manners become more gentle and our lives more pure.

PARISIAN SAGE

Puts Hair on Your Head and Helps to Keep It There.

What's the use of being bald? What sense is there in deliberately allowing your hair to turn gray? Do you want to look old before your time? Give up the thought; old age will come all too soon. Look after your hair. Parisian Sage is just what you want. It aims to prevent grayness and baldness by putting life and nourishment into the hair roots. Man or woman, no matter how old you are, Parisian Sage will help you to look younger and more attractive. Why not go to the Red Cross Pharmacy and get a large bottle to-day? It will not cost more than 25 cents, and your money back if it does not cure dandruff, stop falling hair, or itching of the scalp. It will make your hair lustrous, bright and beautiful. It is a most refreshing, pleasant and invigorating hair dressing and absolutely harmless to the hair and scalp.—Ad.

have had some experience recently living in a tent and I found it a very poor place to study. As a matter of fact a student's success or failure depends not a little upon the place in which he lives. In recent years our facilities for residences of men have been sorely inadequate. The old dormitories were too crowded, and they tempted to confusion instead of quiet. Under the pressure of both numbers and economy fraternity houses have been overcrowded and there has been no central supervision. I think the Carnegie Foundation's report was right that our provision for homes for the men of the college and for social recreation was quite inadequate. I need waste no time in describing the advantages we have now secured in our magnificent Hephurn hall.

ACUTE AND CHRONIC RHEUMATISM

The exact cause of rheumatism is unknown, though it is generally believed to be due to an excess of uric acid in the blood. It may be also said with equal truth that no remedy has been found which is a specific in all cases. In fact the literature of rheumatism shows that there are but few drugs which have not been given a trial. In the hands of one observer we find that a certain remedy has been used with the utmost satisfaction; others have found the same remedy to be a great disappointment. All physicians however agree that every method of treatment is aided by the administration of some remedy to relieve the pain and quiet the nervous system and Dr. W. E. Schultze expresses the opinion of thousands of practitioners when he says that anti-laminin tablets should be given preference over all other remedies for the relief of the pain in all forms of rheumatism. These tablets can be purchased in any quantity. They are also unsurpassed in headaches, neuralgias and all pains. Ask for A-K Tablets.

suitable for men engaged in study. Through its committee on student residences the faculty will undertake to carry out this direction and I bespeak the co-operation of you all.

"The impression is general that American college students loaf too much and work too little. Mr. Dooley says that when the freshman comes to college the president says to him: 'And now, my boy, what will you do with your learned professors to study for ye?'

"Mr. Dooley may exaggerate, but he usually approximates the truth. An eight-hour day over books, not including recitations, should not be too much. That allows two hours study for each recitation in the week, which is a higher average than we have maintained. No student has a right to be looking for prejudice in his professors who does not do as well as that.

"Let us then start the year with effort to do all we can for a better and worthier Middlebury. As we look about us, we see how much others have done for the growth and progress of the college. But the real progress must be from within and we who are here must attend to it. There have been too many failures in times past. Just look at the record of the class which left us last June. They entered 102 strong. When it came to sophomore year there were 88, junior year 75, and they graduated 60. Every one of those who dropped out represents some left the ranks because of unavoidable difficulties, but the greater number dropped out for the failure of some teacher to stir their enthusiasm and awaken their ambition at the right moment, and from their own failure to respond to the efforts made in their behalf. Many fatalities might have been avoided by better ordering of our student life, fewer distractions, quieter dormitories, less moving pictures, and a stronger student sentiment in favor of earnest work.

BOSTON AGAIN DELAYS. School Openings Postponed Until Monday, Oct. 2.

Boston, Sept. 22.—The probability of further delay until Oct. 2 in opening of the public schools of this city because of the prevalence of infantile paralysis was announced yesterday. The date already had been changed from Sept. 11 to Sept. 18.

LAMSON & HUBBARD HATS. MADE TO RIGHT TO WEAR RIGHT. SOLD BY THE FRANK McWHORTER CO. Pale, Sallow Cheeks. Tell the Need Of Beecham's Pills.

25. Nineteen new cases were reported yesterday, making 493 for September, against 263 for all of August.

The school committee headquarters announced late yesterday afternoon that by the authority of the chairman of the school committee, Dr. David D. Scannell, and with the approval of a majority of the school committee, the opening of the schools of Boston will be deferred until Oct. 2.

Beecham's Pills. Women who are subject to these conditions should not fail to avail themselves of their prompt and beneficial effect. Beecham's Pills are prepared to furnish the necessary relief.
