Through the acquisition of a new electric sign of approved workmanship, Cummings & Lewis are to have a place in the North Main street galaxy of illuminated business cards. The big sign, measuring 13 feet long, with a width of 18 inches, arrived at the store this morning, and all day electricians were busy with the wiring installation. An alternating current will direct the appearance and disappearance of the illuminated letters, and a motor flasher goes with the outfit. A motor located in the basement of the drug store is to furnish motive power for the movement of the illuminator.
