**"FAMINE" IN THE FOOD BILL**

Gore Says It Means a Sure Loss of \$750,000,000

**FORCE PRICES AGAINST FARMERS**

Senator Makes an Attack on the Measure in the Senate

Washington, D. C., June 21.—In a vigorous attack upon the administration food control bill in the Senate yesterday Senator Gore, Democrat, chairman of the agriculture committee, declared it strikes at the farmer, will cause losses to producers this year of \$250,000,000 in wheat and \$300,000,000 in corn and result in famine next year through reduced production.

Senator Gore declared the bill "short-sighted policy," and it would result in driving down farmers' prices. "It was drawn by some attorney down at the department of agriculture," he shouted, "but one would think it is in the handwriting of the deity and that it would be sacrilege to change it."

Senator Gore declared the bill was the "sweepings" of all the British and Canadian food acts of parliament and orders in council.

"They are all strung together in this bill like a lot of beads," he declared. "If Congress loses its self-respect in passing this bill unamended, everybody else will lose their respect for Congress. I will not say that the intention of this whole movement is to force down the price of products in the hands of the farmers, but that it is the inevitable result," he declared.

When Senator Gore concluded, Senator Kenyon, Republican, spoke in defense of the bill. Food speculators were flayed by Senator Kenyon as highwaymen.

"One, however, should apologize for using the term highwayman in connection with them," said he. "The highwayman or the sea pirate is a Christian gentleman compared to them. It takes some courage to become a highwayman, but no courage to be a food speculator. These gentlemen at the present time are the allies of the kaiser. They are weakening the American nation in its contest. The men who fight must be fed. The mothers of the nation must be fed. The babies of the nation likewise. The men who work to make the things to fight with must be fed."

"We have heard something about this bill giving the right to the food controller to tell mothers how much food they shall give to their babies. It is not to do so. But there is one question just as important as the question of the
