How to Develop a Good Memory.

In an article about James Horgan and his great memory in the September American Magazine, a writer says:

"Attention comes first," Horgan told me. "When you meet a man, look squarely into his face for a second and forget everything else in the world. Etch his features into your brain; you can do it if you will keep practicing."

"It isn't enough to catch a name so that you can pronounce it. You must learn to see it. You must visualize it so that it appears in your brain as clearly as if it were printed on paper before your eyes. A trained memory is packed full of double exposures—to use a photographer's term."

First Case of Measles.

"Why couldn't Eve 'ave the measles, old boudnah!" "Cawn't say that I know. Why?" "Because she 'ad 'Adam, old fellows."

HOW TO DRY CORN

Select only young, tender corn suitable for eating from the cob. Prepare immediately after gathering.

Place corn on cob in vessel of water. Add a teaspoonful of salt to each gallon of water.

Boil or steam for from 8 to 10 minutes, until milk is set. Remove from kettle and drain well.

Cut kernels from the cobs with sharp knife. Take care not to cut off pieces of the cob.

Spread thinly on trays or earthenware plates. Dry in sun, in oven, over the stove, or before the electric fan, until the corn is so dry that it rattles.

Stir the corn from time to time during the process.

—DON'T MISS ANY STEP.

Cut this out NOW and save it.

Every Girl's Patriotic Duty is to prepare herself for a business position, and release a young man for the front.
