

# 1ST. VERMONT STILL EXISTS

It Did Not Go Out of Being with Taking On of New Name

57TH PIONEER INF. MERELY GOVT. TERM  
Capt. E. W. Gibson Urges Vermonters of Non-Draft Age to Enlist

Capt. E. W. Gibson, who is recruiting in Vermont for the 1st Vermont infantry, now the 57th Pioneer Infantry, states that the 1st Vermont has not lost its identity by the taking on of the new name and that it is still being recruited as a Vermont unit, although men of registration age cannot now be inducted into that regiment. The ranks must be filled with volunteers outside of the registration age. Capt. Gibson explains the situation as follows:

"Statements have been made that the 1st Vermont infantry went out of existence when given the designation of 57th Pioneer Infantry (1st Vt. Inf.). Such a statement is an error. Last August and September many men of the regiment were transferred to other units, but with some of men and officers the real organization of the Vermont regiment was not interfered with. All of the companies remained, somewhat depleted, but each with one or more company officers. The giving to the regiment a specific designation according to government tables is what those interested in perpetuating a state unit have been working to bring about. So we are assured that we are henceforth to have a Vermont regiment. It will be officially known as the 57th Pioneer Infantry (1st Vermont Infantry). The words '1st Vermont Infantry' being used to distinguish it as a Vermont regiment. The words '57th Pioneer Infantry' being in accordance with the war department plan of numbering regiments in the federal service. Will you please correct, through your paper, any other impression that your readers may have received?"

"There has been no time when a physically fit man between the ages of 18 and 21, and between 31 and 40, could not enlist for the 1st Vermont infantry and be sent to the regiment. Any man who can pass the physical test prescribed for the army, and who is not registered, can now enlist. Any man who is 21 and not registered can enlist. This includes men who have become 21 since June 5 last. I would like to get in touch with all these men who wish to volunteer."

"At the present time registrants who induct themselves into the service through their local boards, are sent to Camp Greene for the regular army, and cannot be now accepted for the Vermont regiment. There is some disappointment on the part of many that they cannot be taken by the local boards for the 1st Vermont, but these men as well as the state, are to be congratulated upon showing a fine spirit of patriotism in accepting the situation. They are proud to come forward and volunteer for service for their country in any organization where needed."

"Now let us take hold with one accord and fill our regiment with men not registered. We can do it and have a regiment that will be the pride of the state. I will be at St. Johnsbury until Friday afternoon, at Newport Friday evening and Saturday, where I can be reached in each town through the commanding officer of the Vermont Volunteer militia. Next week I will be at Hyde Park and Morrisville Monday and Tuesday and at Hardwick Wednesday. Other appointments will be announced later."

"E. W. Gibson, Capt. 57th Pioneer Inf. (1st Vt. Inf.)"

## MOST EXCELLENT KIDNEY MEDICINE

Twenty years or more ago I commenced selling Dr. Kilmer's Swamp-Root through a lady who came to my store and recommended it. Since carrying it in stock I have taken it as a tonic and obtained beneficial results after using one bottle. My customers are perfectly satisfied with the results obtained from its use and speak highly in its favor.

Yours very truly,  
N. W. FARRAR, Druggist,  
June 5, 1916. Belchertown, Mass.

Letter to Dr. Kilmer Co. Binghamton, N. Y.

Prove What Swamp-Root Will Do for You.

Send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample size bottle. It will convince anyone. You will also receive a booklet of valuable information, telling about the kidneys and bladder. When writing, be sure and mention the Barre Daily Times. Medium and large size bottles for sale at all drug stores.—Adv.

## BARRE PEOPLE SHOULD EAT PIE DAILY

Pie is wholesome, combining both fruit and grain. Those who have trouble digesting pie should take ONE SPOONFUL simple buckthorn bark, glycerine, etc., as mixed in Adler-ika. This flushes the ENTIRE bowel tract, removes food matter which poisoned your stomach for months and relieves ANY CASE sour stomach, gas or constipation and prevents appendicitis. Leaves stomach in condition to digest ANYTHING. Cummings & Lewis, druggists, 54 North Main street.—Adv.

## Better than Insurance

DR. STANSBURY'S THROAT AND LUNG HEALER

enables you to get well and be happy instead of dying to make someone else happy.

Breaks up, Heals and Stops Colds, Coughs, Asthma, Pleurisy, Catarrh, and Whooping Cough, and wards off CONSUMPTION.

25c and \$1.00 per bottle. Sent by mail, prepaid, on receipt of price. W. H. Dornburgh, Schenectady, N. Y. At following druggists in Barre, Vt.: Cummings & Lewis, Barre Drug Co.

## LOOK YOURSELF OVER CAREFULLY

and see if your condition is not such as to make your best investment the purchase of Hood's Sarsaparilla, Pepton and Hood's Pills.

This course of medicine will be worth many times the cost when it removes that tired feeling, that paleness and anemic tendency, that warning of waning strength, that weakness of body that opens the way for disease, that backache and other symptoms of kidney trouble, constipation, and that grouchy touch of rheumatism.

Many people need this splendid combination to make perfect health. Others may not need all three, but almost everybody needs and will find relief in at least one of them.—Adv.

## VERMONT'S PROGRAM OF FARM PRODUCTION

State Should Raise More Wheat and Should Maintain the Dairy Industry

—More Pork Is Greatly Needed.

The following definite program in relation to food production in Vermont was adopted at the conference held at the State House in Montpelier this week:

Our country is engaged in a great world war. The very principles upon which our government is founded are at stake. Food is one of the vital factors in the winning of this war and our country's need demands that every Vermont farm be worked this spring in such a way that the greatest possible amount of food be produced. This year control of land is a sacred trust which should be used so that it will contribute to the winning of the war.

Grow on your farm the things with which you have had best success and for which you have the necessary machinery equipment. Remember our work, however hard, and our sacrifices, however great, cannot equal the hardships and sacrifices of our boys who are fighting for us.

More Wheat Needed.

An ample supply of wheat is a necessity in war. The government forecast of the winter wheat crop promises little prospect of relief from the present wheat shortage, unless the acreage of spring wheat is greatly increased. Vermont should grow her share of this necessary spring wheat acreage.

Spring wheat will do well in almost any part of the state on land where a crop of corn can be grown. Seed should be sown in a well prepared seed bed at the rate of one and one-half to two bushels per acre. Early sowing is important.

On poor land, a light application of manure is desirable, but excessive applications should be avoided. An application of 400 pounds of acid phosphate per acre, sown broadcast, will make the crop larger and more certain.

Maintain the Dairy Industry.

The dairy industry has long been the mainstay of Vermont agriculture and from it we have obtained 70 per cent of our agricultural income. Milk, cheese and butter are cheaper animal foods than meat and are necessary in the diet of a people in time of war, as well as in time of peace, if physical vigor is not diminished. Therefore, our livestock industry should be maintained. However, low producing cows should be culled from our dairies, because food and labor are too valuable to be expended on poor cows. Calves from our best producing cows should be saved but the raising of scrubs is too costly in time of war.

We need to plan wisely in order that we may provide a cheaper ration for our dairy cows. The same grain which we purchased in 1909 at a cost of \$7,500,000 would cost \$9,000,000 now. This sum represents too large a proportion of our dairy income and the tonnage represented places too great a burden upon our transportation system.

Every farmer should plan for an acreage of corn large enough to fill sufficient silo capacity so that every cow may have abundant supply of good ensilage. This corn should be of a variety which will mature in this climate and the seed should be planted so that every stalk will produce a good ear. Well eared corn silage will provide the foundation for a cheap dairy ration. Soy beans planted with the corn will improve the feeding value of the silage.

Seed corn is very scarce. If your needs are not already supplied, try to find a supply in your neighborhood, or through your county agent, or write to extension service, University of Vermont, Burlington. Avoid late maturing southern varieties, which are not adapted to our climatic conditions. Test all seed for germination.

Fertilize corn with stable manure and with 400 pounds of acid phosphate. This will supplement the manure and will hasten maturity of the crop.

Plan in seeding this spring for an abundant supply of clover hay in the future.

Yields of beans secured last year on many farms, in spite of unfavorable weather, suggest that it is wise policy to increase our acreage of this crop.

Our potato acreage should at least be maintained at last year's size. This is an expensive crop to grow and land for it should be carefully selected. Study every detail of potato culture and omit no link in the chain of operations which are necessary to grow the crop and protect it from its enemies. Plan especially to spray with Bordeaux mixture to avoid a repetition of last year's losses from blight.

If you still have thin meadows on your farm which do not promise a good crop of hay, plant corn for husking or sow oats or barley if you have time to prepare the land and get them in. Treat oats for smut and be sure that seed germinates. Eighty-six per cent of our tillable land is in hay. We should increase crops above mentioned at the expense of our hay acreage.

More Pork Is Greatly Needed.

More pork is greatly needed because it gives storable animal fat in the most concentrated form. Under present conditions, it would be doubtful economy to transport grain from the West to provide the entire ration for raising hogs in Vermont. However, hogs enough should be kept to use all farm wastes. In dairy sections where cream is sold, skim milk combined with purchased or home raised grain, will provide an economical ration for pig feeding.

Poultry will consume wastes about the place not used by other animals and our flocks should be increased.

Sheep breeders may well plan to save their own lambs and increase their flocks because more wool and mutton are needed. In order to carry out the above program, our farmers need more capital, more seed, more fertilizer, more machinery and more labor. It will be the object of the state public safety committee and the state agricultural agencies to make available a larger supply of these essential things. In this work the cooperation of every public-spirited citizen

is solicited, because all classes of our people are vitally concerned in securing an adequate supply of food and should assist in doing those things which are necessary to secure it.

## ELABORATE PLANS TO SELL BONDS

Third Federal Reserve District with Philadelphia as Center Will Hum with Activity for Third Liberty Loan.

Philadelphia, Feb. 21.—Probably no other section of the country has made more elaborate preparations for the third Liberty loan campaign than the third federal reserve district which embraces two-thirds of Pennsylvania, New Jersey south of Trenton and all of Delaware, Philadelphia, as the headquarters of this territory, will be the focal point of spectacular interest during the new drive.

Four art figures in heroic mold have been installed over the four archways of the city hall here to stimulate interest in the campaign. Notable among these is a reproduction, in all but the dimensions, of Bartholdi's statue of the Goddess of Liberty in New York harbor. Surrounding the other entrances of the municipal building are respectively, a gigantic representation of a khaki-clad soldier going over the top; a tank on the advance

## SAFE, GENTLE REMEDY CLEANSSES YOUR KIDNEYS

For centuries GOLD MEDAL Haaslem Oil has been a standard household remedy for kidney, liver, bladder and stomach trouble, and all diseases connected with the urinary organs. The kidneys and bladder are the most important organs of the body. They are the filters, and purifiers of your blood. If the poisons which enter your system through the blood and stomach are not entirely thrown out by the kidneys and bladder, you are doomed. Weakness, sleeplessness, nervousness, despondency, backache, stomach trouble, headache, pain in loins and lower abdomen, gait stones, gravel, difficulty when urinating, cloudy and bloody urine, rheumatism, sciatica and lumbago, all warn you to look after your kidneys and bladder. GOLD MEDAL Haaslem Oil Capsules are what you need. They are not a "patent medicine," nor a

"new discovery." For 200 years they have been a standard household remedy. They are the pure, original imported Haaslem Oil your great-grandmother used, and are perfectly harmless. The healing, soothing oil soaks into the cells and lining of the kidneys and through the bladder, driving out the poisonous toxins. New life, fresh strength and health will come as you continue the treatment. When completely restored to your usual vigor, continue taking a capsule or two each day; they will keep you in condition and prevent a return of the disease.

Do not delay a minute. Delays are especially dangerous in kidney and bladder trouble. All druggists sell GOLD MEDAL Haaslem Oil Capsules. They will refund the money if not so represented. In three sizes, sealed packages. Ask for the original imported GOLD MEDAL. Accept no substitutes.—Adv.

and a portrayal of an American battleship destroying a German submarine.

The statue of liberty, including the torch, is 29 feet high and, with the pedestal, towers aloft about 50 feet. It is the largest imitation of the bronze presented to America by the French nation ever made and it is expected that it will be entirely venerated with a coating of medals and nails, the latter to be driven in by bond subscribers.

In the base of the statue, there is a large room with two entrances. From this a ladder leads to the figure of the goddess. Bond buyers will be furnished

with medals on which their initials will be stamped and with these they expect to weld a complete coat of mail for "Liberty" long before the campaign is completed.

Delegations from all over the third federal district have planned pilgrimages to the city to take part in this unique pledge of patriotism.

# The very most Best!

## Quality Superb

# Are You Fussy About Shirts?

Most every man is particular about his shirts — even if he is not so critical about some of the larger items of his wardrobe.

That is why we are more than ordinarily particular in selecting our shirts; it is the reason why you can always count on finding some refreshingly new patterns and colorings when you come to this store to look at shirts.

We're rather proud of the shirts we have here right now. Give us a call and see if we don't have a right to be.

The U. S. Food Administration says: The best way to take care of our corn crop is to eat it.

## WINS \$100,000 FOR DEVOTION TO EMPLOYER

She Gave Him the Best Part of Her Life, Says Miss Quirk of Milwaukee.

Memphis, Tenn., Feb. 21.—Miss Mollie Quirk of Milwaukee Tuesday was given a verdict for \$100,000 against the estate of Patrick Kallagher by a jury in the federal district, after testimony that she had "given the best part of her life to the love, devotion and care" of Kallagher. He left an estate of \$600,000, and she sued for \$400,000.

## BEQUEATHED TO GERMANS.

World's Greatest Stamp Collection Now Held in Paris.

Berne, Feb. 21.—The world's greatest stamp collection at present in Paris, and valued at \$2,500,000, has been bequeathed to the Berlin Postal Museum. It was the property of Philip La Renetiere, a wealthy Frenchman, who died at his home in Switzerland last year. It is supposed that the will was framed before the war, as there is no reason to believe that the owner had pro-German sympathies in the present conflict.

The Berlin Postal Museum has already one of the finest collections in existence, but this bequest, if the French courts allow it to stand, will put it out of reach of any rivals. La Renetiere commenced his collection in 1864, and spent upon it the greater part of a large fortune. It includes the only known specimen of the 1856 1-cent British Guiana, the most prized stamp in the world, said to be valued at \$25,000. The collection has never been exhibited, and it was always supposed that the owner intended to leave it to the city of Paris.

## "THROW AWAY YOUR RIFLES."

For Crying That to German Soldiers, German Youth Is Imprisoned.

Copenhagen, Feb. 21.—An 18-year-old German workman has been sentenced to six weeks' imprisonment in Berlin for calling out to a passing detachment of soldiers, "Throw away your rifles and make an end to it."

## GIFT OF RED CROSS.

Sixteen Maternity and Child-Welfare Centers in England.

London, Feb. 21.—The American Red Cross has given \$20,000 to establish eight maternity and child-welfare centers in England, two in London and the others in six large industrial cities. The new institutions are to be known as the "American Red Cross Child-Welfare Centers."

## TO SUPPRESS REPORT.

As Prepared by the Dardanelles Investigation Commission.

London, Feb. 21.—The British government has decided that the second and final report of the Dardanelles investigation commission is not to be published until after the war. Publication at present, it is stated, "would not be in the public interest."

## DON'T SUFFER WITH NEURALGIA

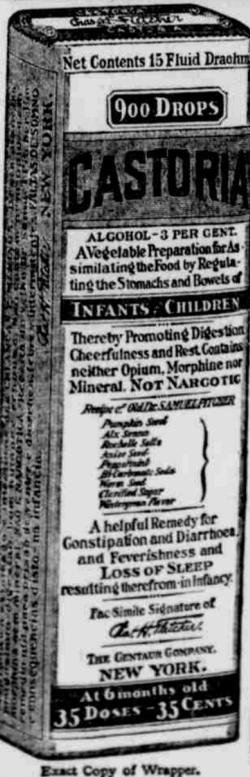

Use Soothing Musterole.

When those sharp pains go shooting through your head, when your skull seems as if it would split, just rub a little Musterole on your temples and neck. It draws out the inflammation, soothes away the pain, usually giving quick relief.

Musterole is a clean, white ointment, made with oil of mustard. Better than a mustard plaster and does not blister.

Many doctors and nurses frankly recommend Musterole for sore throat, bronchitis, croup, stiff neck, asthma, neuralgia, congestion, pleurisy, rheumatism, lumbago, pains and aches of the back or joints, sprains, sore muscles, bruises, chilblains, frosted feet — colds of the chest (it often prevents pneumonia). It is always dependable.

30c and 60c jars; hospital size \$2.50.
