### Removes Hairy Growths Without Pain or Bother

(Modes of To-day.)

It is not necessary to use a painful process to remove hairy growths, for with a little delatone handy you can keep the skin entirely free from these beauty destroyers. To remove hair, make a stiff paste with a little powdered delatone and water. Spread this on the hairy surface and in about two minutes rub off, wash the skin, and the hairs are gone. To guard against disappointment, be careful to get real delatone.—Adv.
