Mr. Olsen was formerly employed in this city in the granite industry.

The water which flowed into the numerous North Main street store basements, due to the sudden rise of the Stevens branch river yesterday, subsided sufficiently during the night to enable many of the furnaces to be reached and started again this morning. There seems to have been no serious damage effected by the overflow probably because such an incident occurs about every spring and proprietors of the stores are well prepared for this event.

Corp. Dana Bruce, a soldier of the marine corps since September, 1916, recently arrived from France and yesterday landed in Barre with a few battle scars. He was wounded several times, the last wound being received in the Argonne forest battle from a machine gun. GERMAN OFFICERS DISPUTE
Hugo Haase Attacked Methods of Gustave Noske.

Weimar, Friday, March 28 (By the Associated Press).—In the national assembly to-day, Hugo Haase, the independent socialist leader, violently attacked Gustave Noske, the minister of defense for his methods in suppressing the recent strikes, the shooting of Spartacists and other alleged abuses of power, claiming that the defense minister's course constituted a return to imperialism.

Herr Haase also attacked Chancellor Scheidemann for understanding Sunday's demonstration in Berlin in favor of General Ludendorff declaring this showed that the present military leaders of the nation were standing solidly behind Ludendorff, supported by the conservatives and other parties of the right, as well as a portion of the bourgeoisie.

Herr Haase, who was frequently interrupted, declared in favor of entering into immediate relations with Russia, saying that the Ukraine would soon be able to supply Germany with raw material and later with food. He said, however, that the independent socialists would not consider a treaty with Russia as one militating against England or the entente in general. They merely desired the end of the war to come, he declared.

Herr Haase asserted that Matthias Erzberger, the centrist leader, falsified when he told of a cabinet meeting held on Dec. 12, at which independent socialist non-members of the government who were present, agreed with a decision to send a note to the entente urging the necessity for a common fight against bolshevism by Germany and the entente.

Herr Erzberger, in reply to this, insisted that his statements were true.

Herr Noske, in his reply to Herr Haase, charged the independents with being the originators of the Spartacan machinations and said the government would place before the assembly all the facts in connection with the "murderous acts" of the Spartacans.

WORLD-WIDE CHAIN OF BONFIRES
Proposed to Celebrate the Signing of Treaty of Peace.

New York, March 29.—The suggestion of Sir Robert Baden-Powell, head of the British boy scouts, that the millions of boy scouts throughout the world celebrate the signing of peace by a world-wide chain of bonfires, has been adopted by the boy scouts of America, it was announced here to-day by the national headquarters of the organization. The 367,063 boy scouts in the United States will light great fires in all sections of the country on the night the treaty is signed and hold appropriate ceremonies.

Fire will be taken before hand from the Statute of Liberty in New York harbor and the flames will be carried as far as possible in starting the "liberty bonfires," the announcement said.

MARKETS TO MEET PRODUCTION.

Was the Program Discussed by Advertising Affiliations.

Buffalo, N. Y., March 29.—The development of the foreign trade of the United States to keep pace with the country's rapidly expanding factory production was one of the principal topics discussed at the business and reconstruction convention of the advertising affiliation here to-day. The subject was brought up at the opening banquet by Burwell S. Cutler, chief of bureau, United States department of commerce, and Dr. W. E. Aughlinbaugh, chairman, department of foreign trade, of the University of New York.

A prompt correction of the idea, developed by European agencies in Latin-America, that the United States is the "colossus of the north" watching with avicious eyes for some pretext to control affairs there, was urged by Dr. Aughlinbaugh, who also laid down these fundamental principles for the development of the country's foreign trade: The establishment of a chain of overseas banks co-operating with home institutions; a national merchant marine independent of government control; establishment of a cable newspaper service for mutual exchange of news of interest; improvement of the consular service; recasting of all trade treaties; intimate co-operation between the government and manufacturers, exports and trade associations; and the immediate sending of qualified trade commissions to neutral and allied countries with authority to encourage trade relations.
