## BREAD DEAR IN ENGLAND.

Already 25 Cents a Loaf and May Go to 35 Cents.

London, Sept. 18.—With bread selling at 25 cents a loaf and soon to be raised to 30 cents and later perhaps to 35 cents, England is harvesting this season the smallest wheat crop since the early days of the war. Production of barley, on the other hand, will show a material increase over that of the last few years.

The reason for this state of affairs, according to Professor James Long, a well-known agricultural expert, are government control and heavy price of wheat and oats is regulated, but no restrictions have been placed on that of barley. As the market price of barley is exceptionally high, farmers plant a less of bread grain of wheat and oats.

Professor Long shows that since 1918 wheat has been reduced by 679,000 acres, or more than one-third of the present area, while oats, also an important bread stuff, has fallen off by 512,000 acres. "On the basis of wheat," he says, "this means a loss of bread grain equal to some 38,000,000 bushels, or sufficient to feed 7,500,000 persons. It is a curious commentary on the fact that the barley crop has considerably increased and that in consequence beer has so far occupied the position of bread."

The country has fewer cattle than in any year since 1907 and 5,330,000 less sheep than the average of the 10 years from 1904 to 1913. The decrease in cattle since last year is more than 500,000 head.

## CANCELLING GERMAN ORDERS.

German Toy Manufacturers Feel the Effect.

Berlin, Sept. 17.—Cancellation of orders by foreign buyers amounting to 60,000,000 marks suffered by a German firm of toy makers on account of the recent more favorable standing of the mark, prompts the Tagblatt to observe that the charges made against Germans of being guilty of breach of business morals because in isolated cases they used similar pretenses to evade contract obligations no longer holds good. The German toy makers claim that shipments already on the way and out of Germany have also been refused acceptance, on the ground that prices based on the recent improved status of the mark exceeded the world market prices.

Where the Miracle Came in.  
A Scotch minister on one occasion tried to explain to an old lady the meaning of the scriptural expression, "Take up thy bed and walk," by saying that the bed was simply a mat or rug easily taken up and carried away. "Na, na," she protested, "I hanna believe that! The bed was a regular four-poster. There would be no miracle in walking away wi' a bit o' mat or rug on your back."—Boston Transcript.

## Did The Children Get As Much From Their Vacation As They Should Have?

Sometimes the re-opening of school finds many children below normal weight, with less strength than they should have, and really unable to stand the strain imposed by study.

This is the time when Father John's Medicine will prove most effective for them. The actual food elements which it contains are exactly what nature has provided to rebuild health and strength. This rebuilding food is so skillfully prepared by the scientific process of compounding the prescription for Father John's Medicine that it is quickly and easily taken up by a weakened system and the results are promptly evident in the increased weight and steadily gaining strength which the child shows under the treatment which Father John's Medicine affords.

For more than sixty years Father John's Medicine has been successfully used in thousands of homes as a standard medicine for all the family. It is guaranteed free from alcohol and dangerous of any kind.—Adv.

## THE FAMILY BUDGET

Will Be Explained at Eastern States Exposition.

The women visiting the thrift exhibit of the savings division, first federal reserve district, to be held at the Eastern States Exposition in Springfield, Mass., Sept. 19-25, will be given an opportunity to obtain first-hand knowledge of how to arrange budgets for themselves or their families. Miss S. Agnes Donham, associate director of the division, will be the expert who will advise on budgets. Some special budget suggestions have been prepared for school teachers and so many requests for these have been received by mail that it is expected many teachers will want to consult the expert at the exhibit.

This is only one of the services maintained by the division, without charge, to help the thrift movement. Members of women's organizations will find Mrs. Irving O. Palmer of Newton, state thrift chairman of the Massachusetts Federated Women's clubs, ready to explain thrift activities of women's organizations. F. C. Ayers, associate director, will give some helpful suggestions regarding investments; A. W. DeMoulipe, one of the field secretaries, will have charge of the information booth. Mrs. Florence A. Warner, home director of the Maine State Chamber of Commerce and Agricultural League, and executive secretary for Maine on behalf of the savings division, also will assist in carrying out the programme.

"What Women's Organizations Can Do in Carrying Out the Programme of the Savings Division of the Treasury Department," is the wording of a large sign, which will be displayed in connection with the club section. Placards will explain the 11 activities suggested for the women's organizations as a means of helping the treasury department, as follows:

1. They can study the economic condition, which the world is facing, and determine their personal and group responsibility toward that situation.  
2. They can apply the simple principles of economy to their personal and household transactions. They can popularize the keeping of simple accounts of household and personal expenditures leading to the adoption of a household and personal budget, and put the American kitchen on a more business-like basis.

3. They can save money out of their personal income and household allowances through wise buying and careful use of materials.

4. They can use the money they save through the application of sane economy to aid the present economic situation, and to increase their personal capital.

5. They can buy more government savings securities.

6. They can buy more Liberty bonds and Victory notes if they have money to invest and thus relieve the banks of some of the four billion dollars' worth of bonds, which they still hold.

7. They can hold the Liberty bonds, which they have bought.

8. They can encourage others to hold theirs.

9. They can develop among their membership a large knowledge of the principles of savings, the laws of investment and the technique of sound finance, making investment among women as popular as among men.

10. They can work out for the information and the use of their membership an economic formula as a guide in their everyday financial transactions.

11. They can encourage their children to put into practice in the home the principles of economics taught in the schools; encourage them to earn and save money and to invest their small savings in War Savings Stamps.

## A Funny Slip.

An eastern man who went to California last winter was addressing a church gathering there when he committed a Sponserism worthy of the old doctor himself. Intending in his speech to introduce the term "sun-kissed," he began, "Only those who come, like myself, from the bitter cold mid-winter in the east can really appreciate what it is to be in this wonderful sin-cussed country."—Boston Transcript.

Many telephone users hold the lines for an unnecessarily long period of time.

Long telephone conversations result in the delay and annoyance of repeated busy line reports, particularly in connection with party lines.

Limiting conversations to as short time as possible, and giving up a party line when requested to do so, will assist in maintaining good telephone service.
