The elections to honor societies at the University of Vermont, Burlington, as announced at the Founder's day exercises held yesterday, contains the names of five young people, who are either residents of Barre or who have at one time attended school in Barre. To Boulder, the senior honor society, were elected H. Sibley Young of this city, a graduate of Spaulding high school in 1918, and H. Elwin Tryon of Wheelendon, Mass., well known in this city and a graduate of Goddard seminary in 1917. Both young men during the past year were members of the junior honor society, Key and Serpent, and the junior-senior society, Melisse-won. To Key and Serpents were elected W. D. Flanders of this city and Barre, F. Garry of Brookline, Mass., both of whom graduated from Goddard seminary in 1919. At Vincetia club rooms to-night Willard E. Davis, a wizard in checker playing, will play local checker players. Mr. Davis is the first official Massachusetts state champion, winning the title in the grand tournament held on New Year's day at Wells Memorial, Boston, defeating Victor Townsend, Boston champion, in the semi-finals and then knocking out Herbert Morrill, the checker editor of the Boston Globe, and an ex-champion of New England. He was born in Boston 23 years ago and learned the game only five years ago. Mr. Davis is gold medal champion of the Wells Memorial Checker club of Boston, probably the leading club in the world. A remarkable feat in connection with his playing is that he plays from four to six players blindfolded and also plays simultaneously 30 or more.

Everyone in Barre if they have not already "carried on" in this clean-up movement, should do so. The health, fire and street department are anxious to get the city cleaned of all refuse and waste, and to make it tidy and pleasant in all sections. Each and every person can do his or her part by clearing out cellars, attics, rooms, sheds, raking up yards, and have all rubbish and waste material ready for the city trucks when they make their visits to the various sections of the town. Be particularly watchful for old rags and oil cloths. This is clean-up week, don't forget your duty.

Joseph Tondreau of 491 North Main street suffered a serious injury to the thumb of his left hand last week while executing his duties at the Bianchi & Son granite plant on West Second street. While Mr. Tondreau was engaged in making the chain secure, the derrick was raised without warning, catching the lumber's thumb. The nail was torn completely off. Mr. Tondreau had the injured member dressed immediately, and although he suffered much inconvenience and pain, he returned to work.

Funeral of W. B. MacAuley Held from Presbyterian Church.

The funeral of the late William B. MacAuley, who dropped dead Friday, was held yesterday. Three of the choir, Mrs. Fred Barton, Miss Margaret Maloney and Robert Dabulis, with the organist, Miss Dora Barton, rendered three very appropriate selections. The pastor, Dr. W. E.  THE WINCHESTER STORE

BURD Quick-Seating PISTON RINGS

are designed to meet the demand of garages, service stations and mechanics for an efficient piston ring having the quick seating feature of a narrow ring, with the wall tension of a wide ring.

The invention of this entirely new type of piston ring is the greatest advance which has been made in piston ring construction in the past ten years. It won the instant approval of mechanics everywhere.

The outer surface—which comes in contact with the cylinder wall, has a channel .002 of an inch, in depth in the center of the face, and raised edges, which lap in quickly, seating perfectly, with a hard glass-like surface, in harmony with the cylinder wall—almost immediately. No slow, laborious "lapping in" is necessary. It "goes to work" at once—adjusts itself quickly to the cylinder wall and perfect seating is obtained in less than one-fifth the time required to seat other piston rings.

The Burd Quick-Seating is a one-piece, step-joint ring which fits accurately, and is very easy to install.

The channel in the center carries an oil film which prevents leakage, and in the center of the face, and raised edges, which lap in quickly, seating perfectly, with a hard glass-like surface, in harmony with the cylinder wall—almost immediately. No slow, laborious "lapping in" is necessary. It "goes to work" at once—adjusts itself quickly to the cylinder wall and perfect seating is obtained in less than one-fifth the time required to seat other piston rings.

They are made in all standard sizes and over-dimension sizes, and are practically every make and model of motor.
