#### FIGHTING DISEASE GERMS

There is a popular idea that most sickness is caused by a germ of the disease finding entrance to our bodies through the food we eat, the water or milk we drink or the air we breathe. This is true as far as it goes but it is also true that disease germs are entering our bodies every day without causing disease.

The reason for this is that there are forces within the body that are constantly fighting these disease germs and it is only when this defense is weakened that the germs get the upper hand and we become ill. One of the most powerful of these forces that work for health is rich, red blood. Good, healthy blood increases the resistance of the body to the diseases that are always threatening. It is easier to keep up this resistance by taking Dr. Williams' Pink Pills, eating proper food, avoiding articles of food that do not agree with us and getting plenty of fresh air day and night, than it is to cure the disease after it gets a foothold. Keep up the resistance of your body to disease by these tonic pills, which you can get at any drug store, and you will avoid such sickness.

Two booklets, "Building Up the Blood" and "What to Eat and How to Eat," sent free by the Dr. Williams Medicine Co., Schenectady, N. Y.—Adv.
