Nothing New Under the Sun

There is ample proof that the women of antiquity knew the value and practiced the art of retaining youthful lines. They were not unlike the woman of today, who stands out in every assemblage as being just a bit in advance of the mode. Well, she has managed to put a suggestion of youthful roundness into her figure, not curves of restriction or stiffness. Oh, no, but the softly rounded curves of the natural figure around the waistline, trained by the magic of the right corset, to emphasize feminine roundness. And in walking hand-in-hand with the mode, one has only to make the corset the basis of one's career. Regardless of woman's position in life, there are some things that not even a daughter of Eve will stop to argue about. Her faith is placed in a comprehensive knowledge of her corset. We take for granted that you do not neglect such commonplaces as fresh, neat-fitting gloves or well-fitted shoes, and we say to you, if you like Back-Lace Corsets, wear Madame Irene—the French corset—because they can do more to transform a woman's appearance than any other one thing which she wears. McCabe's consulting gynecist and thoroughly experienced fitters will be glad to assist you in the selection of the correct corset for your own individual needs.

Evans, editor of the "How to Keep Well" column of the Chicago Tribune, spoke yesterday afternoon before the members of the Davenport Woman's club and visitors from other clubs in the vicinity, the meeting having been announced as an open one when all club women were invited to be guests. His subject was "Health of Some of Our Racial Stock," and in discussing the health of different races, and their tendencies to disease, or strong racial characteristics of resistance to sickness, the speaker explained the great waves of immigration that have swept over America in the past years. He showed how the high birth rate of these foreign peoples, many possessed of strong, healthful tendencies, have given racial color to the great industrial centers.

"There have been 35,000,000 immigrants to the United States and of these, 24,000,000 have come in since 1880," stated Dr. Evans. "The original stock was English and Scotch-Irish, the two great waves of immigration prior to 1880 were Polish, and Bohemian, Italian and Scandinavian. The heavy immigration since 1880, plus the high birth rate prevailing among these groups, has given them more than half the population of the great industrial centers of the country. "Just prior to our entrance to the great war as many immigrants were passed from Europe to America as the number of soldiers carried to the old world from America in any year of the war. While the presence among us of the great number of persons in these racial groups contributes to the difficulty of our health situation, it has some advantages to compensate," and the speaker went on to explain: "The Italian stock is relatively free from consumption; they have less than their share of influenza, and racial stock suffering unduly from influenza have some immunity to consumption. The Scandinavian stock always has a low baby death rate, and they also teach us physical development, and Slavic races tend to correct our alarming tendency to a low birth rate. In 1914 there were 101,000 classified as Hebrews in the United States. They also are a strong race and have the advantage of a low baby death rate, a low general death rate, and a low consumption rate." To meet Wednesday, The parent-teacher association of the Audubon school will meet in regular session Wednesday afternoon at 3 o'clock. A musical program has been arranged, and a large attendance of mothers is expected.

To You Who Have Been Waiting for Furniture Prices to Come Down

The constant and definite trend of the market is so conspicuously upward, and the prospect for an indefinite continuation of this tendency is so obvious that Shallene Bros. accept it as a duty to disabuse the public mind of any anticipation to the contrary.

What the future may hold none of us knows, but we do know that the whole world is readjusting itself to the new order of things.

And when we buy home furnishings we do not look upon them as so much material, but as a source of comfort, of enjoyment, of home culture and refinement, and on these we can not fix a price for their pricelessness.

And so Shallene Bros. pass along the thought that even at the higher level of prices, worthy home furnishings provide a sound and profitable investment, the dividends from which will be paid every day throughout the years to come, in priceless home comfort and enjoyment.

Shallene Bros. are always glad of the opportunity to assist home makers in beautifying their homes and in achieving most effective results at least possible cost.
