Albany, N. Y., Aug. 20 .- Johnny Con vay, who was kidnaped last Monday has been found and was returned to his parents yesterday morning. The boy was recovered though the efforts of private detectives and reporters in the employ of The Argus. The child was abducted by his uncle, Jame Hardy, and H. G. Blake. Hardy has been placed under arrest, but Blake escaped from his captors, but the police are on his trail.

Blake resisted threats when arrested by the detectives and reporters, but suc cumbed to the offer of a very larg ransom, and taking his captor son miles into the country produced the boy, and then when his arrest was at-tempted drew a revolver and fied.

It was intended to arraign Hardy in the police court yesterday afternoon. but at that hour there was such a menacing crowd in the building and about it that the police postponed the hearing.

When Johnny Was Brought to Town. There was an exciting scene when the little fellow who had been kidnaped was brought to town after his rescue. The drive down town was at an hour when usands of people were on the streets. The little fellow was held high in the air and his rescuers shouted "We've got him." In less than a second the crowd realized what "We've got him" meant, and an uproarious shout went up. Men, women and children followed the wagor with shouts of joy to The Argus office, where little Johnny Conway in the window for the benefit miring and joyous crowd. What a Model Bakery Should Be.

What should be the essential conditions of a model bakery? First, the building should be above ground, perfeetly drained and ventilated, well organized, absolutely clean, and the expense of labor should be of no consideration. The men should be systematically inspected with regard to their personal cleanliness, having, in the first place, been selected for employment on the ground of their good general health and temperance. The hours of labor should be limited, and convenience for washing purposes should be provided. The buildings should be dustproof, in order to make dust contamination impossible. The ovens should be fired at the back of and not in the bakehouse itself. Water used should be of the very best and guaranteed quality, and, in order that only a proper proportion should be used for its corresponding equivalent of flour, it should be meas-16-qt. case ured by meter.
