ing a Burgiar. Hon. Theodore Roosevelt writes an article entitled "The Roll of Honor of the New York Police" for The Century. Mr. Roosevelt says:

Early in our term we promoted a pa-trolman to the grade of roundsman for activity in catching a burglar under rather peculiar circumstances. I happened to note his getting a burglar one Two men spoke in favor of the bill, but week. Apparently he had fallen into their speeches reteived little attention mck. In the latter case the burglar esapod from the house soon after midnight and ran away toward Park avenue, with the policeman in hot chase. The New York Central railroad runs under Park avenue, and there is a the men who came to Georgia in 1864 succession of openings in the top of the and burned the homes of the people who tunnel. Finding that the policeman have to help pension the Union soldiers. was gaining on him, the burglar took a A number of members spoke and said desperate chance and leaped down one of these openings at the risk of breaking his neck. Now the burglar was running for his liberty, and it was the part of wisdom for him to imperil life or limb, but the policeman was merely doing his duty, and nobody could have blamed him for not taking the jump. However, he jumped, and in this par-ticular case the hand of the Lord was heavy upon the unrighteons. The burglar had the breath knocked out of him, and the "cop" didn't. When his victim Isable Green, one of the leading could walk, the officer trotted him ladies of Colchester, Conn., gives around to the station house, and a week afterward he himself was promoted, it appearing upon careful investigation that he was sober, trustworthy and strictly attentive to his duty.

Here again it seems to me that we Experience has proved that War- officer catch that burglar and otherwise against him. In neither event did we care whether the officer had or had not the backing of the congressional delegation of the city or the central committe of the county. Of course, assbefore, this exposed us to wild outcries from the local political bosses and heelers and much sneering at "civil service reform," but all the outcries and speers meant was that we were doing our duty as decent men and as public officials, with some slight appreciation of what was implied by the words honor and up-rightness. Political organizations are eminently necessary and useful, but when they are seized by professional spoils politicians of low morality, who run the "machine" in their own interests, who clamor against honesty and defy decency and rail against that device for obtaining clean government which is known as civil service reform, then it is time for all citazens who believe in good citizenship to rise in re-

TRUE SOUTHERN SENTIMENT.

sn't Propose to Reward the "Men Who Atlanta, Ga., Nov. 9. - The Georgia legislature has proven that true scuthern sentiment is not yet dead in the south. That body has just killed a bill by Calvin, of Richmond county, which provided for granting free license to Yankee soldiers who might now be living in the state. The bill created much surprise and was strongly condemned the habit, for he got another the next | Several men who opposed the bill said that they loved the Union and had no feeling of hostility against the north or against the men who fought against

the south in the days of the civil war. But they were unalterably opposed to a measure that would be a reward for ple provision in the way of pensions for the aid of the Union veterans, and they thought Georgia should confine her aid to the men who bled in her defense during the war.

A Vision of the Future

Clarence King, formerly chief of the United States geological survey, says: The time is not far distant when a man can start out of Denver and travel to Kiondike, stopping every night at a mining camp. Already two American stamp mills are pounding away on the borders of the strait of Magellan, and the day is approaching when a chain of mining camps will extend from Cape Horn to St. Michael's. I believe we are about to enter upon a century which will open up vast resources and will be the grandest the earth has ever known. Before the end of the twentieth century the traveler will enter a sleeping car at Chicago bound via Bering strait for St. Petersburg, and the dream of Governor Gilpin will be realized."
