Cable to Manila Is Working. The latest news from Manila, and news that was most gratifying to the authorities here, was a telegram from Merrittt announcing that the cable was open again, having been repaired where cut by Dewey. That news came Saturday night and was confirmed yesterday by the following from Merritt which was dated "Manila. Aug. 21," and came straight through all the way by cable: "Major General Otis, with steamers Peru and City of Puebla, has arrived

While the preamble specifically cites the functions of the commission to be "to determine the details of By Which the United States the capitulation of the city and defences of Manila and its suburbs and the Spanish forces stationed therein,' it is pointed out that the word "suburbs" is an clastic expression, and the

It can be said authoritatively that the President is quite satisfied with the terms as made by General Merritt and Admiral Dewey. It is pointed out that the terms of the capitulation of Manila can have but little effect upon the action of the Paris peace commission in any event. The protocol as signed by the ac-credited representatives of the governments of the United States and Spain provides for the cession of the city, bay and harbor of Manila to the United States, and leaves to the peace commision to determine the disposition and overnment of the Philippine islands. There were five men killed and fortyhree wounded in the final assault on Manila, Aug. 13.

WAS A GREAT WELCOME HOME.

That New York Gave the Chief Warships of Sampson's Squadron.

New York, Aug. 22. - Hundreds of housands of people along the banks of the Hudson and thousands on all styles of river craft blended their shouts in a coyal welcome to the returned North Atlantic squadron under command of Rear Admiral Sampson, and as fine as August day as could be desired was nature's tribute to the return of the victors. For almost three solid hours ing. steam whistles of all sizes, steam sirens and small guns along the shores. shricked and boomed in the effort to display the heartiest enthusiasm for the home-coming of the naval heroes with their battle scarred ships. The ships taking part in the parade were the New York (flagship), Iowa, Indiana, Brooklyn, Massachusetts, Oregon and

When the parade reached the Rivergide Drive the scene was like a vast amphitheutre. Tens of thousands of persons covered the green slope, and as the battleships approached a mighty cheer arose that reverberated back and forth across the Hudson. At the bottom of the slope an observation train crawled lazily along, keeping even with the ships. Above this the vast sea of humanity, and crowning this General Grant's tomb, which was to mark the beginning of the return of the squadron and where a national salute of twenty-one guns was fired. The tomb, standing high, white and solemn, far above the waters of the river, looked to be built upon a foundation of faces. It was an imposing spectacle as the hattleships boomed a salute to the nation-as the warships saluted the final resting place of General Grant, and the guns that sounded the knell of Admiral Cervera's ships at Santiago boomed a reverential obeisance to the dead hero,

The salute ended, the return of the squadron along the line of review was begun. It was a repetition of the enthusiastic scenes on the way up the river.

CAMPS TO BE INVESTIGATED. Board of Medical Officers Has Begun the Work-Sickness and Death.

Washington, Aug. 22.-The board of fever in the army camps will call the attention of the proper commanding officers to any unsanitary conditions which may exist at the camps visited by it, and will make recommendations with a view to their proper correction. The board Saturday began its labors at Camp Alger, and after the investigation there will proceed to the other points which have been designated in

the official instructions. Secretary of War Alger has written a long letter to Chauncey Depew, which the latter has published, giving an account of the efforts of the department to provide against sickness in the camps and in Cuba, the immense amount of work involved, etc., and showing that neglect of regimental and company offiers is largely responsible for what
