New England Youngsters. One of Detroit's lawyers, who has had such professional success as enables him to spend a portion of each summer in a quiet New England section, brings back some very interesting facts.

"I take my outing in one of those parts," he says, "where the farms are so run down, that you can't hope for a good crop of anything unless it be beans or goats. One of the consequences is that the young men have to find some other part of the country in which to make a living, and I'll wager that there is not another community in the Union where the average age is higher.

"Knowing me to be a lawyer, some of the residents called me into a conference about the township treasurer who had been guilty of advancing a teacher \$2 on her salary without the consent of the trustees. There was not a man there except myself who was not past 82, and two were over 90.

"While I was making a talk in favor of the treasurer and trying to minimize his transgressions without offending the selectmen, as they called them, a man of at least 65 slouched through the door and took a seat.

"Just a minute," said one of the oldest veterans as he interrupted and glowered at the intruder. "How often have I quoted that there quotation to you 'bout old men for council and young men for war? This is a council. Now you just run out till we get through, Willie. If there's any a'rest to be made, we'll call on you." And Willie went without turning a word." —Detroit Free Press.

Finding Days of the Week.

The prematurely aged young man whose duty it is to get up The Record's "Answers to Correspondents" column says that queries of the same nature always come in bunches. They seem to be epidemic. Just at present a great many people seem eager to know what day of the week they were born on, and it keeps him busy figuring the dates out. He has a system which he uses, and for the benefit of others who may be in search of like information it is herewith given.

For instance, take Jan. 15, 1898. A man born on that date writes to know what day of the week it fell on. In order to ascertain this divide the figures representing the year by 4, rejecting the remainder, if any. To this dividend and quotient add the number of days in the year to the given date, inclusive, always reckoning 28 days in February. Divide the sum by 7, and the remainder will be the number of the day of the week, 0 signifying Saturday. Here is the illustration, taking Jan. 15, 1898:

41898
4
10474
15
72590
335-5

Thus, by this calculation, which is infallible, it will be seen that Jan. 15, 1898, fell on the fifth day of the week, which is Thursday.—Philadelphia Record.

Foaled His Doctor. The late Rev. H. R. Hawels, who was equally notable as preacher, journalist, lecturer and musician, suffered from a dangerous hip disease when a boy of 9. The celebrated Sir Benjamin Brodie, who was asked if a change of scene would benefit the afflicted youth, answered, "Take him anywhere—it does not matter."

Hawels lived to laugh at his doctor, and half a century later, after a life of exceptional industry, he was in vigorous health.—New York World.

Makes digestion and assimilation perfect. Makes new, red blood, firm flesh and bone. That's what Rocky Mountain Tea will do. 35 cents. T. H. Thomas' pharmacy.

Envelopes were first used for letters in 1839, and the first issue of postage stamps was authorized in 1847.

Now good digestion waits on appetite, and health on both. If it doesn't, try Burdock Blood Bitters.

A Bargain Chance In Art Squares This Week.
