THE VEILED FUTURE.

[Original.]

There was once a man whose name was Chlacas. He had been born a peasant, but from the day of his birth had manifested wonderful precocity. He walked with a sturdy step before he was a year old and was possessed of a man's vocabulary before he was two. His bent was in two directions, study and activity. He was sent to school, where he soon surpassed his masters, while in athletic sports and all the states to send delegates to a feats of daring no one could cope with him.

He was accorded a triumph, receiving the thanks of his sovereign and his countrymen.

Unrest seemed to drive him onward, and he begged permission to march against one of the neighboring states with a view to its conquest. He was given a reluctant consent and. leading forth an army, within sixty days had annexed the territory to his own country. From this moment King Chlacas was changed. The ingratitude of his subfects rankled in his breast. From loving them he grew to hate them. In stead of redressing their wrongs, he took no interest in them. From then he began to oppress them. Gradually that love they had borne him abated and at last turned to animosity.
