

DIES SUDDENLY WHILE AT WORK

Louis Anderson, for 20 Years Employee of Davis Interests, is Victim of Heart Failure.

HELPING BUILD POWER DAM

Death Comes as Day's Labor Is Nearing End—Had Lived Alone in Hotel in Davenport.

Louis Anderson, an old man employed as a laborer on the new dam being constructed in Rock river, died late yesterday afternoon just before quitting time from the effects of heart failure and old age.

From him it was learned that Anderson was 67 years old and that as far as is known he had neither family nor relatives in this country.

The remains will be taken charge by the fellow employees of Mr. Anderson and they will make arrangements for the funeral.

REPORT IS MADE

Number of Resolutions Adopted by American Federation of Labor at Denver.

PLASTERERS ARE GIVEN SEATS

Gompers Meeting with No Opposition for President—Election to Be Held Next Week.

Denver, Nov. 14.—At the opening session of today's convention of the American Federation of Labor the committee on rules made a partial report and a number of resolutions were reported and adopted.

Some Resolutions Adopted.

Among the resolutions adopted were: Protesting against the sending of bookbinding work out of this country as has been done by some public libraries. Endorsing the principles of the national civil service law. Favoring the passage of some suitable retirement law. Supporting remedial legislation in congress for better hours and pay for postal clerks.

Pledging assistance to jewelry workers in placing their label on all work and in securing an 8-hour day.

Protest Against Child Labor.

Protesting against child labor in bands and orchestras. Condemning seceding teamsters and all dual organizations of teamsters. Seating operative plasterers and granting them a charter.

No Opposition to Gompers.

Denver, Nov. 14.—Rumors of contests for official honors in the American Federation of Labor are beginning to be heard, although the election of officers does not take place until the latter part of next week. No one is mentioned as an opponent of Samuel Gompers for reelection, but there is a report that Thomas L. Lewis, who succeeded John Mitchell as president of the Mine Workers of America, will oppose him for the position of second vice president of the federation.

PIGEON PHOTOGRAPHS.

German Apothecary Trains the Birds to Take Pictures.

Dr. Neubronner, court apothecary to Emperor William of Germany, has been experimenting for years with carrier pigeons, putting these birds to many uses not intended by nature. His latest invention, which the patent office in Berlin has protected, is a small, queerly constructed camera which he fastens on the breast of a pigeon and which is so arranged that photographs may be obtained while the bird is in flight.

The structure of the camera and the method of fastening it are his secret, and so is the delicate arrangement employed for opening and shutting the lenses for time exposures, says a Berlin correspondent of the New York World. The inventor claims for his apparatus a great future, especially as it will be an invaluable aid to the soldier in times of war.

Neubronner says he can get a picture of the interior of a fortress in this way, and the military authorities in Berlin are going to let him experiment on the fortress of Spanden, outside Berlin. Several birdseye views he has obtained of interiors of dismantled forts have been shown to the authorities, who are said to be surprised at the results. The pictures are in no sense perfect, but they give complete indications of all important positions.

Neubronner claims that his pigeon photographs will be as useful to the general in the field as the balloon. The proportion of successes to failures he reckons as three to seven.

THUMB MARK ON STATIONERY

Fad Said to Be Taking Place of Monogram on Note Paper.

According to a Philadelphia stationer, the thumb mark is taking the place of the monogram on note paper. "The thumb mark," says this authority, "is engraved in gold or silver and has all the value of a Bertillon mark of identification. Some people prefer to have the thumb mark printed in red or blue, but the metal colors are generally approved.

Medals For Canal Workers.

Medals of bronze manufactured from the old scrap left by Ferdinand de Lesseps in his unsuccessful effort to dig a canal across the isthmus of Panama are soon to be struck in the mint in Philadelphia to be presented to all American workmen on the present canal operations who can show a service record extending over two years. Correspondence toward this end has been conducted for some time, and it is expected the medals of honor will be ready for presentation in 1909. The idea originated with President Roosevelt on his visit to the canal zone. Large quantities of copper and tin have been collected from the useless French machinery for the purpose.
