The ambulance was called and the man removed to his home, where day for a day's visit with his daugha physician reduced the fracture.

New Partner in Fair Store.-Henry D. Folsom of Rock Island, who five years ago organized and has since een at the head of the jewelry department of Harned & Von Maur, has resigned his position with that firm, to take effect Monday, at which time he will become associated with the Topp-Parker company, proprietors of the Fair store. In making the change Mr. Folsom will become financially interested in the Fair and will take an active part in its management. Previous to becoming associated with Harned & Von Maur, Mr. Folsom was engaged in the jewelry business in Rock Island for 25 years. He enjoys just what the word focus means. They a wide acquaintance in the tri-cities are then small globular aggregations, and has the confidence and esteem of everyone who knows him. He will prove a valuable acquisition to the when first descried in the telescope rapidly growing Fair store and his host of friends will wish him unlimited success in his new field.

Take Murder Suspect. - Henry Grimes (colored) is held at the police station suspected of murdering a railroad man at Chillicothe, Mo. Grimes asserts, however, that he is not the much wanted man and claims that he came here from Lancaster, Wis., where he has lived for years. Grimes was arrested at Nahant. The men in the yards there "spotted" the colored man and it seems that they knew the colored man wanted in Missouri. They seem to think that Grimes is he, so telephoned to Sheriff Eckhardt. The police are inclined to think that it is a case of mistaken identity and that Grimes is not the man but he was given five days in jail and the officers at Chillicothe notified so they can come and identify him if possible.

THE TAIL OF A COMET

It Pays Dearly for Its Brilliant Gaseous Display--

Formed by Light and Heat.

Traveling as comets do in very clon- | ready four times as great above abso-

will make it their home.

lute zero, at a quarter sixteen times,

and so on increasingly, the tempera-

ture rising into thousands of degrees.

It at once becomes uneasy, waxes in

light and, as the spectroscope reveals,

disruptive electric discharges start in

it which let out the imprisoned gases.

Then begins that spectacular career of

perihelion passage which makes the

comet so superb an object and for

which it pays so dear. The gases

which are thus thrust out from the

interior of the separate meteorites, to-

itself, the light emitted by the sun.

waves have a propelling power in the

direction of their own motion equal

Why, then, is it that the planets be-

tray no such effect in spite of their

size? The answer is, because of that

very size. Gravity acts on the mass,

a matter of three dimensions; the light

force on the surface of the body, a

matter of two. As a body diminishes

in size, therefore, its surface bears a

greater and greater ratio to its mass

until when small enough the second

This relation is betrayed in the con-

duct of the tail. The imprisoned

gases, heated to expulsion on the sun-

ward side of the comet, rise toward it

in a series of exquisite mantling en-

velones, as if the comet's head were

veiling itself from the too ardent gaze

of the sun. Then, after rising to a

certain beight, their initial impetus

overcome, they fall back, repelled by

the light waves, although still attract-

ed by gravity, and are driven out to

form the tail of the comet, fresh en-

Sometimes only a single tall is form-

ed, but at others two or even three are

shot out, and when this happens one

is nearly straight, one curved and one

greatly bent. Now, calculation shows

that the repelling force in the case of

the first is fourteen times that of grav-

ity, in the second two and two-tenths

times, or something less, and in the

third only about one-fifth of gravity.

But these are the very ratios which

He is 25 years of age and visited with relatives and friends in is smooth-faced. He is 5 feet 7 inches tall and has a head of heavy dark brown hair. The police have been asked to look into the case.

> Order Survey from Silvis,-Directors of the Tri-Cities & Northwestern interurban road met yesterday afternoon and decided to order a survey of the new proposed route from Silvis to Riverdale farm. The survey will be made by Engineer Wallace Treichler of Rock Island. It is understood that the directors are preparing to ask the Silvis trustees for a franchise, granting them permission to enter the village. R. S. Silvis has promised to donate a site for a depot if the road is built. The route from Silvis to Riverthrough which the original line was at this end of the line.

Evidently the light said to have been from \$50 to \$60, from denies her guilt. When the case was uncovered several weeks ago young Giles attempted to commit suicide.

> Horses at Good figures. - Livery horses put on the block at the Gus Stengel sale brought prices which emphasized anew the fact that the craze for automobiles has not caused a decline in the value of horse flesh. One team sold for \$410, and the lowest price paid for any horse was \$140. In Davenport. all, 10 horses were sold, and the average price paid for them was \$150 a head. Mr. Stengel will embark in the saloon business in Rock Island May 1. He will open in the Bismarck immediately west of the Harper house.

Sending Out Checks .- C. S. Kerns, eceiver for the Moline Building, Savings & Loan association, has all the checks ready for distribution among stockholders and noteholders under the plan agreed on for winding up the affairs of the association.

Hold Back Capital Stock Tax.-Are the Moline factories which were most heavily assessed under the new capital tax law preparing to contest the payment of the tax? Deputy Tax Collector A. E. Danielson is preparing to slow in improving. He is 86 years of close his tax collections today, and to age. date factories which in the aggregate were taxed \$17,000 under capital stock assessment have falled to make payment, These factories have already

## Why do Men

sedately colled about its head amid the depths of space, to stream in gorgeous gleams behind it as it pays its orbital obeisance to the ruler of its course. It seemingly backs away in keeping with the etiquette to royalty, turning always its face sunward as it retreats whence it came.

But it pays dearly for its display. The matter going to form the tail can never be recovered, but is driven farther away. At each successive return to the sun some of its mass and brilliance is thus lost, and this is why the periodic comets, those that have made many visits, are such small and inconspicuous objects. It is only the consets of long ellipses and very distant habit of which the perhelion pageant is so fine.—Youth's Companion.

The Call of the Blood for purification, finds voice in pimples, boils, sallow complexion, a jaundiced look, moth patches and blotches on the skin—all signs of liver trouble. But Dr. King's New Life Pills make rich red blood; give clear skin, rosy cheeks, fine complexion, health. Try them. Twenty-five cents at all druggists.

## Marquette Cement The Gibraltar of **Building Material**

The Italian Government is building gunboats out of cement, after tests extending over a stretch of years. Good cement, properly set, is as impervious to water as pitch-covered wood or painted steel and more lasting. The uses of cement are extending every day; the demand has brought hundreds of new companies into existence, but the making of good cement can't be learned in a hurry, and the wisdom of test and time is in Marquette Cement. The best, up to-standard, and beyond.

Handled by Representative Dealers.

of the circulation from an excess of uric acid accumulating in the blood stream. This uratic impurity comes usually as a result of constipation, weak kidneys, indigestion and stomach disturbances. These systemic irregularities may not be of marked severity or of long duration, but each has a direct effect on the eliminative members of the body, which prevents the proper removal of the waste products. This refuse re-mains in the stomach and bowels, and souring forms uric acid, which the blood quickly absorbs.

Rheumatism is usually manifested in the joints and muscles. It is here its sharpest twinges of pain are felt, and stiffening of ligaments and tendons first commence. The pain of Rheumatism is caused by the contact of the sensory nerves with the gritty, acrid formation which uric acid causes to accumulate in the corpuscles of the blood about the joints. The stiffening of muscles and joints is usually gradual. Constantly the blood deposits the uric acid into the joints, and slowly the natural fluids are dried

equal for ouring rheumatism. THOS. POTTS.

up and destroyed. Then Rheumatism becomes chronic and serious. Rheumatism is sometimes inherited, for like all blood diseases it can be transmitted to RHEUMATISM FORTY YEARS. I suffered with lumbago for a long time, and speaking of it to a friend one day he told me to try S. S. S. I did so, and soon found it was helping me. I had rheumatism for more than forty years, having contracted it in the army, but S. S. S cured me sound and well, and have had no return of the trouble. I think S.S. has no equal for ouring rheumatism. offspring. This explains why some persons are afflicted with the disease, and suffer its pains, who have otherwise

been perfectly healthy. S.S.S. cures Rheumatism and cures it permanently. It goes into the circulation, and removes the uric acid, purifies the blood, and in this way destroys the cause. S. S. S. changes the blood from a sour, acid-steeped stream to a rich, healthy fluid, which quiets the excited nerves, eases the

throbbing muscles and painful joints, and filters out of the circulation the irritating matter which causes every painful symptom of the disease. When the blood has been purified and enriched by S.S.S., it nourishes the different lain's Cough Remedy. Pleasant to members that have been weakened and starved because of imperfect blood, take, soothing and healing in effect. Book on Rheumatism and any medical advice free to all who write.
