

Daily United States Weather Map

FORECAST FOR ROCK ISLAND, DAVENPORT, MOLINE AND VICINITY.
Probably Thunderstorms this afternoon or tonight. Friday, fair and cooler.

WEATHER CONDITIONS.

An area of relatively low pressure now extends from the west gulf sections to the north Atlantic coast, with the greatest barometric depression over northern New England and Alabama. This disturbance has been attended by thunderstorms on the eastern Rocky mountain slope and in the Mississippi and lower Missouri valleys and the upper lake region, while high temperatures continue in the central valleys and the eastern sections. A rainfall of 1.96 inches is reported from Dubuque. The northwestern half, with its fair, cool weather, overlies the territory from Manitoba and Minnesota southwestward to Colorado. Another area of low pressure, accompanied by higher temperatures, is developing on the Rocky mountain plateau. Owing to the low pressure to the southwestward and the approach of the northwestern

high, cooler weather is indicated for this vicinity, with thunderstorms this afternoon or tonight, followed by fair Friday.

RIVER FORECAST.

Only slight changes in the Mississippi will occur from below Dubuque to Muscatine.
J. M. SHERIER, Local Forecaster.

Life insurance organizations—assessments and the like—amounted to \$881,440,000. The estimated total of the amounts paid by regular companies in dividends to policy holders, for surrender values, to annuitants and on claims in foreign countries was \$182,000,000.

Summation of life insurance payments of all kinds in 1910:
Claims paid in the United States and Canada.....\$381,440,000
Payments for dividends and for surrender values and to annuitants and foreign policy holders (estimated).....182,000,000
Grand total.....\$563,440,000

Along all lines of benefits under policies—death claims, endowments and dividends—the transactions of the regular life insurance companies continued to increase last year under the normal conditions that prevailed. New insurance for more than \$2,600,000,000 of protection was written, and after the policy account deductions the insurance in force showed an increase of nearly \$1,000,000,000.

An indication of normal business conditions in 1910, according to life insurance records in the New York insurance department, where 90 per cent of the insurance in force throughout the country must be accounted for, was the decrease of disbursements for surrendered, lapsed and purchased policies. The amount of the decrease was about \$187,000 compared with \$3,059,000 for increase in 1909 and \$14,543,000 for increase in 1908.

FAMOUS SPECIALIST TELLS WHY WOMEN HAVE NERVES

Came From Italy to This Country and Got His Answer.

A famous Italian specialist, Dr. Enrico Serafini, has been trying to find out why women have nerves, and after thorough studies in Europe he came to the United States to seek the secret here.

He has answered the question promptly. The woman with all the diversion she wants has so much more than she needs that she is headed straight for the miseries of neurasthenia.

Neurasthenia in its scientific perfection was found by Dr. Serafini to prevail among American women of wealth and refinement. It is worse in Washington than in New York because Washington's activities are almost wholly social, while New York in spite of its tremendous crush of energy mixes business and pleasure so thoroughly that people have less chance to suffer the monotony of continual amusement.

Our very phase of neurasthenia is peculiar. The Latin races become so exhausted that they are limp with lassitude; the pure Saxons grow utterly dull and torpid; the Americans are overstimulated, as though they must keep going on faster and faster. The best thing to do with these human comets is to condemn them to such absolute rest and silence that they won't even think.

"The fundamental trouble that lies back of a good deal of American neurasthenia," Dr. Serafini says, "is the lack of resource for genuine diversion on the part of both men and women. It goes back to their early education."

The Message in the Box.
On a table in the waiting room of a specialist is an invalid box. When one opens it—and most visitors to the specialist do—a smaller box is found and one not so large inside that. This continues until finally the last is reached, a tiny thing with a slip of paper inside it. On the paper is a single word, "Curiosity."

"I keep it there to amuse waiting patients," explained the specialist. If there was only one who went through the scale of boxes he might feel some about it, but he or she leaves the box closed for the next comer, and when there are quite a few in the waiting room it gets to be a pretty good joke, and I can hear laughter as the latest arrival gets stung. I picked the box up on a trip to India and happened to leave it in the waiting room one day. Now it stays there all the time."—New York Sun.

New Kind of Screw.
The common screw has a slot across the head, which soon fills with dirt and rust, making it hard to unscrew in the wood. A new kind substitutes a square socket in the head of the screw to take the place of the slot. Of course the common screwdriver has to be changed to meet this alteration and is provided with a square driving point that fits the new socket. It prevents the tool slipping and scratching the woodwork, and many other advantages are claimed for the new arrangement.

Gulf of Mexico.
The gulf of Mexico is about ten times the size of Lake Superior and about as large as the sea of Kamchatka. Bay of Bengal, China sea, Okhotsk or Japan. Lake Ontario would go in each of them more than fifty times.

THE GRAIN MARKET.

Liverpool, July 6.—Wheat: The market was steady at the opening, although values were unchanged to 1/4 higher, and following the opening declined 1/4 with profit taking. The firmness in America was offset by more

favorable American crop advices, and although the Buenos Ayres close was stronger, offers were liberal. With the exception of India and parts of Russia, the crop summary was favorable, and latest advices from Russia are less bullish. The spot market was firm to 1/4 higher, with cargoes firmly held, at 1 1/2 higher and forecasts of lighter shipments from Argentine this week. The general feeling in the market was toward profit taking by traders who had covered on the very bullish reports received from Russia and the excitement among coarse grains, and at 1:30 p. m. the undertone was easy, 1/4 to 1/2 lower than yesterday.

Corn opened 1/4 higher on September on strength in America and firmness of spot, but later there was an easier undertone with a decline of 1/4 on the quiet demand and the decline in wheat.

LET BARS DOWN FOR TOGO

Japanese Hero to Be Allowed Full Privilege of Navy Yards.

Washington, July 6.—The Japanese naval hero, Admiral Togo, who fought the battle of the sea of Japan, will have no difficulty in viewing everything he cares to see in the New York navy yard or indeed in any other part of the naval establishment. Although a regulation of long standing prohibits the exhibition to foreign visitors of any of the construction in the navy yards, this will be gladly suspended by the navy department for the benefit of Admiral Togo. It is expected he will board the giant battleship Florida, now nearing completion in the New York navy yard. Details of the program for the admiral's entertainment have not yet been completed, but when he arrives in New York about Aug. 8 he will be received as the guest of the nation by a number of distinguished officials and army and navy officers.

PRESIDENT IN A PICKLE

Division in His Household Over Alabama State Chairman.

Washington, July 6.—A factional row over the selection of a republican state chairman for Alabama boiled to the surface at the White house today and has put President Taft in the predicament of choosing between Postmaster General Hitchcock and Secretary C. D. Hilles, as the political adviser to the administration. Secretary Hilles and Booker T. Washington are understood to be backing J. O. Thompson, while Na-

CLARK AGAIN PRESIDENT

International Convention Endeavors Opens in Atlantic City.

Atlantic City, N. J., July 6.—Full of enthusiasm for a successful meeting a thousand members of the Society of Christian Endeavor arrived here today for the international convention of that organization. The formal opening takes place this evening, but the election of officers will be held this afternoon. Rev. Dr. Clark, founder of the society, will be re-elected president. The big feature of the convention tomorrow will be a visit from President Taft.

All the news all the time—The Argus.

STEEL MEN GET CLOSER

International Body to Grow From Brussels Conference.

Brussels, July 6.—Steel men today concluded business which called them together. A committee of 39 was appointed to work out a plan for an international steel organization and submit the same to a full conference when called. Judge Gary, who was made chairman of the committee, feels that distinct progress has been made toward a common world code of feeling and practice in steel affairs.
