Provide \$20,000 for River Survey.—A dispatch from Washington, D. C., says the rivers and harbors bill in the senate has been amended in a way fairly satisfactory to the Iowa senators. "This practically puts the matter under the jurisdiction of the Mississippi river commission," said Senator Kenyon. "While it is not all we asked I believe it will effect about what we wanted."

Two Women Tell How They Escaped the Surgeon's Knife by Taking Lydia E. Pinkham's Vegetable Compound.

Swarthmore, Penn. — "For fifteen years I suffered untold agony, and for one period of nearly two years I had hemorrhages and the doctors told me I would have to undergo an operation, but I began taking Lydia E. Pinkham's Vegetable Compound and am in good health now. I am all over the Change of Life and cannot praise your Vegetable Compound too highly. Every woman should take it at that time. I recommend it to both old and young for female troubles." — Mrs. EMILY SUMMERSGILL, Swarthmore, Pa.

Baltimore, Md. — "My troubles began with the loss of a child, and I had hemorrhages for four months. The doctors said an operation was necessary, but I dreaded it and decided to try Lydia E. Pinkham's Vegetable Compound. The medicine has made me a well woman and I feel strong and do my own work." — Mrs. J. R. PICKING, 1260 Sargent St., Baltimore, Md.

Since we guarantee that all testimonials which we publish are genuine, it is not fair to suppose that if Lydia E. Pinkham's Vegetable Compound has the virtue to help these women it will help any other woman who is suffering in a like manner? (Advertisement.)

standpipe. It has been asserted that a pressure of 219 pounds will be exerted upon the mains which feed the tank and that this great force will prove disastrous. Figures obtainable in the city hall fail to produce any result which will show such pressure. The 219 pounds pressure is based upon calculations which say a lift of 506 feet is necessary to fill the tank. Instead of this being the case it will be necessary to raise the water only 245 feet.

Make Effort to Check Smallpox.—City Health Inspector George Kemmerling thoroughly fumigated every car running on the interurban route while they were quartered in barns at the foot of Sixteenth street. This was done under orders of the commissioner of public health and safety as result of the evidence of a smallpox case Sunday evening. A young fellow from East Moline came in on one of the cars to consult a local physician who pronounced the case to be one of smallpox in its incipency. East Moline health authorities were at once notified and a quarantine was established. The precaution taken by the Moline commissioner in the fumigation of the cars is one that precludes any danger of contamination. The two patients in Moline, both with mild cases, are now comfortably provided for in the new pesthouse in Riverside park. Quarantine was raised on the Wagner home on Thirty-fifth street yesterday. Three new cases of smallpox developed yesterday in East Moline. The Mike Klotz home has been quarantined for some time. Now R. W. Niles, tax collector for South Moline township, who was held in the house, is a victim. The William Noden home also has been under quarantine. ENGLISH SUFFRAGET IN U. S. PEACEFUL

Mrs. Philip Snowden.

Mrs. Philip Snowden, club woman and suffrage lecturer from London, and the wife of a prominent British statesman, is now making a tour of America. Though very decided in her suffrage views, Mrs. Snowden deplores the militant methods that have been adopted by the Pankhursts and their following.

"People have a right to make martyrs of themselves for their cause," declares Mrs. Snowden, "but they have no right to make victims of innocent persons who disagree with them."

Mrs. Snowden recently addressed the lower house of the Ohio legislature and captured that body by storm. The first woman ever to address the assembly while in session, she received an ovation from Governor Cox and the lawmakers.

"Such an honor as you are paying me would be quite impossible in my country," Mrs. Snowden told the legislators, "and that you pay it demonstrates your superiority in that point."

The campaign for suffrage is a campaign for the divine right of personality. All legislation on modern conditions affects women. Women who do not know the sorrows of their poor sisters do not appreciate their opportunity for help that is offered. We can contribute to society that intimate knowledge of the interests of the child, that placed in touch with the developed knowledge of property in the minds of men, make for a broader justice, a higher civilization and a happier and more just world."

Mrs. Snowden has lectured much in England for women and their cause.

The First Hinge.
The first hinge was probably that of the oyster. The thorny oyster of the Pacific coast has its two shells joined together by a hinge as good as any found in any hardware shop of the country. There are other hinges found in nature, but that of the oyster reaches the highest perfection. We have made little advance upon this device in all of our years of patenting and inventing.—St. Nicholas.
