### And You Wake Up With Beautifully Curly Hair!

(Town Tattler)  
This is a secret that will, I know, be appreciated by my lady who dislikes the tedious and "nervous" task of twisting her locks around a heated iron, perhaps singeing the hair, burning off the ends, and blistering fingers or scalp in the operation. From any drugist procure a few ounces of pure liquid silimerine and at night pour a little onto a clean tooth brush and draw this down the full length of the hair. A simple thing to do, but remarkably effective, as will be apparent in the morning. The hair will have a wonderfully soft, fluffy curliness, much more natural looking, glossier and livelier in appearance than where a waving iron has been used. Silimerine doesn't make the hair sticky or greasy, and there will be no trouble doing it up in any style desired.—Olga Ormsbee.
