MONDAY, JUNE 23, 1890. DEMOCRATIC TICKET. STATE. For United States Senator, JOHN M. PALMER.

Tomorrow's Election. The election tomorrow for two members of the board of education promises to be a highly interesting, if not an exciting event.

As was the case a year ago when Dr. C. C. Carter squeezed through with a small majority, tomorrow's contest is likely to be perturbed from its natural channels into a religious controversy.

Resolved, That we, the members of the board of education, are heartily in sympathy with the movement of citizens in supplying the American flag to the different school buildings, but that they can not permit such presentation in the name of any political or religious order.

The candidity of Dr. Bernhardi is probably the result of the objections raised by German Lutherans to that portion of the compulsory educational law conferring power on local boards to regulate parochial schools.

TARIFF ESTIMATES. Comparative Figures on the Two Customs Bills.

BLAINE'S PLAN FOR RECIPROCIITY.

WASHINGTON CITY, June 23.—The clerk of the senate finance committee has completed the preparation of the statement called for by the Plumb resolution adopted by the senate, showing the increases and reductions in revenue which are estimated to follow the enactment of the senate tariff bill compared with the present law, and the house or "McKinley" bill.

Only About \$3,500,000 Apart. The estimated duties on these articles (or an aggregate equal to that of the fiscal year) under the house bill is put at \$200,344,977.75, while under the senate bill the estimated receipts from the same aggregate are \$203,898,907.08.

Reduction of Revenue Figured. Adding to the first of these amounts the amount of the internal revenue reduction found in the house bill (and struck out of the senate bill), the total reduction of revenue by the house bill is found to be \$71,064,774.18, while that of the senate bill is the figure named above—\$69,569,843.69.

Value of the Estimates. "These tables," says the committee, "are prepared upon the plan and theory usually followed, and the estimates are largely conjectural and more or less unreliable and misleading. They are based upon the assumption that if the bill should become a law merchandise of like quantities and values would be imported as was imported during the fiscal year 1889.
