The readers of the Argus will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer one hundred dollars for any case that it fails to cure. Send for list of testimonials. Address, F. J. AN OCTOBER ECLIPSE.

Old Sol's Brilliance will be Dimmed on Oct. 20th. The astronomical event of October will be the partial eclipse of the sun on the 20th, which will be visible throughout nearly all of North America and the West Indies. It will reach its greatest magnitude way up on the north Atlantic coast of Greenland—not an especially salubrious place for observation at this season of the year. Of the United States, New England will see it to the best advantage; but to residents of the Mississippi valley it will appear larger than to people of the farther west. The eclipse will begin here about 10:50 a. m. and end at 1:40 p. m. Its size it will be 3 80 digits—the sun's apparent diameter being considered at 12 digits, and it will pass over the sun from west to east. On the 29th the same actors will repeat the pleasing spectacle, though they will be more than twice as far apart and will not reach their point of closest approach till shortly after 11 p. m. "I was deaf for a year, caused by catarrh in the head, but was perfectly cured by Hood's Sarsaparil."—H. Hicks, Rochester, N. Y.
