

Local and Personal

The fact that Henry Ford has carried Michigan and Nebraska in the presidential preferential primaries, is no joke. It is a serious and significant thing. It is significant of a state of public mind and you can draw conclusions from it just as you can from the victory of Dr. Shuler at Raton, the defeat of Mayor Boatright in Albuquerque and of the old line candidates for the village council in Deming. These are little straws and indicate that the wind is blowing in much the same direction that it did in 1912.

"I confess that I can see little reason for pride in our boasted democracy when a few men go around with their counties in their vest pockets. Citizenship doesn't mean very much in Sante Fe county if Senator Catron can swap its delegation wherever he wants to. It does not mean much in Bernalillo county if Mr. Gillerwater can whisper absolute instructions as to how men shall vote. It does not mean much in the imperial county of San Miguel if the Black Eagle or the doughy Secundino can crack the whip in defiance of every other interest in that county.

"Men get tired of these things. They are disposed to inquire if no one else lives in Taos county other than Malaquias Martinez.

Meanwhile we have the blessing of good roads 300 days of the year without any labor or expense on them.
