In asking for night trains on the branch line, the people of DeLand are asking only for that which should have been given them for the past three or four years. We don't expect the passenger service will pay for the operation of the train. But the people of DeLand and vicinity pay for good service, and should get it. There is not a merchant or any other business man who doesn't sell a lot of goods on which he makes no profit. But he tries to "make good" on that which he handles for the benefit and accommodation of his customers. We want good service from the railroad company, which probably makes more out of DeLand than out of any other town between Jacksonville and Tampa. We don't care whether they run the branch train or back the main line trains into DeLand. All we want is the service.

Thousands of Tennessee eggs are brought to DeLand by express and retailed here. On the other hand, a gentleman in Enterprise—12 miles south of DeLand—gathers from 1,000 to 3,000 eggs every day and supplies a choice market. Mr. Throop, of Enterprise, has built up his business from a very small beginning, and has constantly made money at it. He has nothing but white leghorns for layers. Others who have chickens find them a constant source of profit, in proportion to the number they keep. Ten thousand dozen eggs should be shipped from DeLand every month.
