MOTHERS TO BE

Should Read Mrs. Monyhan's Letter Published by Her Permission.

Mitchell, Ind.--"Lydia E. Pinkham's Vegetable Compound helped me so much during the time I was looking forward to the coming of my little one that I am recommending it to other expectant mothers. Before taking it, some days I suffered with neuralgia so badly that I thought I could not live, but after taking three bottles of Lydia E. Pinkham's Vegetable Compound I was entirely relieved of neuralgia, I had gained in strength and was able to go around and do all my housework. My baby when seven months old weighed 19 pounds and I feel better than I have for a long time. I never had any medicine do me so much good."--Mrs. PEARL MONYHAN, Mitchell, Ind.

Good health during maternity is a most important factor to both mother and child, and many letters have been received by the Lydia E. Pinkham Medicine Co., Lynn, Mass., telling of health restored during this trying period by the use of Lydia E. Pinkham's Vegetable Compound.

There is no standard recipe for "victory bread," the only requirement being that it must contain not more than 80 per cent of wheat flour, the remaining 20 per cent being composed of corn meal or corn flour, rice, potato flour, or other cereals recommended by the Food Administration. "Victory" pies and doughnuts, which contain not less than one third nonwheat flour, may be sold on wheatless days if the same recipes are used throughout the week.

TRESPASS NOTICE.

All persons are hereby warned not to trespass upon the estate lands of J. J. Schwartz, deceased, located about 3 miles from Chapin by hunting, fishing, hauling straw wood or lightwood. The law will be strictly enforced against all persons violating this notice.

Will you wet down your roughage and save several dollars on every ton?

SOME farmers are still paying top prices for old style cottonseed hulls because they prefer a bulky filler. Others are paying much less for

BUCKEYE HULLS
COTTONSEED HULLS
LINTLESS

and are making them as bulky as old style hulls by wetting them down a half hour or so before using.

By adding an equal part of water to Buckeye Hulls and stirring thoroughly they will swell and give you as bulky a roughage as you want. Most important, the bulkiness will be due to water which is of value to your cattle--not to lint which has no food value whatever.

Other Advantages

Buckeye Hulls go farther. They allow better assimilation of other food. No trash or dust. Sacked--easy to handle. They mix well with other forage. Take half as much space in the barn.

Mr. Benjamin Thompson, Bald Knob, Ark., is feeding Buckeye Hulls to stock cattle. He says that he gets more food value per ton with less waste. He has bought five tons and has them stored in barn. He says that they occupy less space than old style hulls.

To secure the best results and to develop the ensilage odor, wet the hulls thoroughly twelve hours before feeding. It is easy to do this by wetting them down night and morning for the next feeding. If at any time this cannot be done, wet down at least thirty minutes. If you prefer to feed the hulls dry, use only half as much by bulk as of old style hulls.

Book of Mixed Feeds Free

Gives the right formula for every combination of feeds used in the South. Tells how much to feed for maintenance, for milk, for fattening, for work. Describes Buckeye Hulls and gives directions for using them properly. Send for your copy to the nearest mill.
