SOCORRO NEW MEXICO

## REGARDING SHORT LINES.

The best line to success is always a short one. Successful people do not go around a ten acre field. They go across lots. That is why the Santa Fe Route to Chicago is so popular. It is the shortest line; therefore the most successful with the public. Thirty miles less distance to cover between Kansas City and Chicago than any competitor. Equipment is all that can be required for comfort and convenience, consisting of solid vestibule trains of Pullman palace sleepers, library chair cars, dining cars and day coaches.

Leave Kansas City 5.25 p. m. or 6:40 d. m. and arrive Chicago 8:30 a. m. or 9:15 a. m. the next day. A slower train leaves Kansas City 8:35 a. m. and arrives Chicago 7:50 a. m., with sleeper. Fort Madison to Chicago. Inquire of Thos. Jaques, local agent, A. T. & S. F. Co.

H. J. ABERNATHY,

PHYSICIAN AND SURGEON.

Office over Socorro National Bank

W. S. McKellar, M. D.  
PHYSICIAN AND SURGEON.

OFFICE:—Northwest Corner of Plaza.  
SOCORRO, NEW MEXICO.  
Special attention given to diseases of women and children.

JAMES G. FICHT,

L. L. HOWISON,

JUSTICE OF THE PEACE,

COLLECTING AGENT,

Socorro, N. M.

## THE PELTON WATER WHEEL

Give the Highest Efficiency of any Wheel in the World. Over 1300 in use.

Affords the most simple and reliable power for all mining and manufacturing machinery. Adapted to heads running from 20 up to 2,000 or more feet. From 20 to 200 per cent. better results guaranteed than can be produced from any wheel in the country.

**Electric Transmission.**  
The advantages of the Pelton Wheel—its size in the way of a uniform and reliable power, close regulation, and the facility of adaptation to varying conditions of speed and pressure, have brought it into special prominence and extensive use for this class of work.

All applications should state amount and head of water power required, and for what purpose, with approximate length of pipe line. Send for Catalogue.

The Pelton Water Wheel Co  
121-123 Main St., San Francisco, Cal., U. S. A.

**Pelton Water Motors.**  
Varying from the fraction of 1 up to 10 and 20 horse power; supplied for all light running machinery. Warranted to develop a given amount of power with one-half the water required by any other.

Send for Motor Circular. Address the above.

NOTICE OF FORFEITURE.

Territory of New Mexico }  
County of Socorro }

To William W. Dedrick, George W. Pomeroy, James D. Lucas, Heuben T. Poney, Henry W. Ritchey:

You are hereby notified that I have expended one hundred dollars (\$100) in labor and improvements upon the Wall Street mining claim, situate in the Silver Mountain Mining District, Socorro county, New Mexico, being the amount required by law to hold the same, as assessment work for the year ending December 31st, 1890 and, that if within ninety days after the first publication of this notice you fail or refuse to contribute your proportion of such expenditure as co-owners; your interests in said claim will become the property of the undersigned, under the provisions of section 3234 of the Revised Statutes of United States. JOHN J. A. DOBBIN.  
Socorro, N. M., Feb. 27, 1891.

## CERRILLOS.

[Bullter] It is stated that the Milwaukee parties who were to build a smelter at Cerrillos, have succeeded in raising the necessary capital for the purpose and that the plant is assured.

Copper matte, carbonate ores, silver-lead and zinc concentrates, anthracite and bituminous coal and coke are among the principal products shipped from Cerrillos. The small and more precious shipments according to bulk, are gold bricks, nuggets and dust, and turquoise.

It is said that Cerrillos had the biggest pay day for this month, Saturday and Monday, which that mining section has enjoyed within the past two years. The coal mines and the Cash Entry all paid off, and the town was filled with happy miners. The coal business continues good, and a few more months of the same kind of business will go far to make up for past depression.

Manager R. Y. Anderson, of the Lincoln-Lucky, is feeling elated over the nearly completed condition of the Middleton shaft, which will make the mine a great producer again as soon as it reaches the ore body. When the mine gets fairly to work, it should ship from 50 to 80 tons ore a day, and this, with the increased matte and coke hauling for the Copper Company will make teaming lively again between San Pedro and Cerrillos.

## MOGOLLONS.

[Enterprise.] Col M. C. Logan, of Silver Creek, has contracts for furnishing wood to the Last Chance and Maud S. mills. The contracts aggregate over 4000 cords. The colonel has a sufficient number of men under his control to be entitled to promotion, and hereafter will be designated as Brigadier General.

The Confidence company have just completed their main adit level to a distance of 1300 feet from its mouth. Of the entire length only 200 feet is in barren or non-paying ore, the other 1100 feet is all in good pay ore. At last a company in Southern New Mexico has had the nerve to properly develop one of our mines, and their success is beyond their most sanguine anticipations.

General Miles, of New Orleans, made a trip to Silver creek last week to inspect and report upon a large mining property. He has had a great deal of experience in western mines, having superintended good dividend payers. He expressed himself as well pleased with the property examined, and the Enterprise from a personal knowledge of the mine believes it to be first class. We are not at liberty to give the name of the mine.

The Last Chance mill and mine are working smoothly and steadily and the output of gold and silver bullion continues to be shipped regularly through Well-Fargo's office in this city. By some oversight the management neglected to have a supply of wood delivered before the completion of the mill and the mill is now handicapped trying to make steam with green pine wood. The engineers do their own firing and work eight hours shifts, yet it is such hard work that changes are frequent. Outside of this obstacle everything is in good shape, the mine

showing immense ore reserves in sight and already developed for stoping. A good sized gold and silver brick was shipped last Tuesday.

## SILVER CITY.

[Enterprise.] The Silver Bell mine at Pyramid has been bonded by the Pyramid Silver mining company. Superintendent Hamilton will put a force of men to work immediately, opening up the property and taking out ore. The mine has a shaft 90 feet deep, which shows up considerable high grade ore, as well as large quantities of medium grade. The claim was located by Enoch Warrington some twelve years ago, but has never been worked systematically. Ore was shipped from this property many years ago, which netted \$80 per ton in silver, over and above excessive freight and reduction charges. The price to be paid for the property is \$15,000.

The Bremen mill has turned out 14 bricks from custom ore in 19 days this month up to last night, and yet the croakers say there are not sufficient resources in the vicinity of Silver City to maintain a city of large size. Thirty-five tons of ore a day at the Flagler works, a \$1000 brick every day from the Bremen, and still not sufficient capacity for the reduction of our ores, thousands of tons being shipped to Denver, Pueblo, Socorro and El Paso. Every dollar being spent in the county is coming out of our mines and the amount of money in circulation in Silver City is greater per capita than in any town in the west. The ore reduction business will grow, a new smelting plant will soon be started, and the Colchis company will complete their mill ere long, which will probably handle 60 or 70 tons of ore per day, putting in circulation an average of \$2500 or \$3000 per day more than at present. While business at present is as good as any point in the west the outlook for the immediate future is exceedingly bright.

Dolan & Co., leasers on the St. Louis mine at Pinos Altos, made a strike last week fraught with importance, and of great significance when considered in connection with the many different limestone areas within a radius of ten miles from Silver City. These men who are practical miners with much experience in limestone districts, leased the property with nothing in sight. For six months they have worked faithfully risking their time money and labor on their belief in the existence of good ore at the contact, staking all they had on their opinion formed upon the result of former experience in similar formations, they followed a small seam of iron carbonate, which at a depth of 75 feet opened a chamber of ore the extent of which is not yet made public. The ore is a heavy galena, assaying 97 ounces silver and 47 per cent. lead. The boys have a bonanza and they deserve it. There are many such ore strata outcroppings in the lime around this city and Lone Mountain, many of greater value on the surface than this one, and with equally as promising indications accompanying them, who will take hold next?

A party of relic hunters while digging among the ruins of an old church near Santa Fe, recently, unearthed the corner stone, in the cavity of which was found a roll of parchment and several Spanish coins bearing the date of the tenth century.

B. S. Rodey, of Albuquerque, purchased a lot in that place a month ago for \$3,000 and sold again a few days ago for \$6,000. That is the result of always blowing for you own town.

## LOCAL NEWS.

The tramps have sprinkled the streets around the plaza. The dust will not bother for several days.

The family of Cruz Nunas, of Water Canon, will move into Socorro the coming week, for the purpose of sending the little folks to school.

On Friday morning Andres Romero was up before his Honor L. L. Howison, on charge of disturbing the peace. Fine, \$10 and costs.

Adna Lamson, on or about January 1st, will go to Central America to investigate the gold fields of that coming country. He is closing out everything in Socorro with that end in view.

Jim Hill has got the measles—got 'em bad. We do not mean "big Jim," but that dear little fellow that bosses the home, and makes life worth living at J. M. Hill's, of Hill & Bruton.

Judge A. A. Freeman and daughter, Miss Trixie, came up from Eddy on Friday evening. Miss Trixie will be the guest of her sister, Mrs. Garner, until the present term of court is over.

In looking over the list of new members recently elected to congress, we find the name of Hon. Allen R. Bushnell, of Wisconsin. Bushnell was a member of the old Iron Brigade during the war.

Frank Kleimer, of the Brush-Heap mine, at Kingston, was in Socorro, Thanksgiving day with a shipment of Brush-Heap ore. This ore goes to the Rio Grande Smelting Works for treatment.

An item has been going the rounds of the press that Hon. Pinito Pino is dead. This is not the fact—Mr. Pino has been very sick, but now recovering. THE CHIEFTAIN is glad to announce this.

Mrs. E. Murphy, 75 Ashland ave., Cleveland, Ohio, wants word of her son John W. Murphy, who was in Socorro, September 29, and left then for camps in the south part of the Territory. Southern exchanges please copy.

The joice for the roof and ceiling of the School of Mines building are being hauled out to the grounds. The contractor is pushing the work and will have the roof on and the principal work done by Xmas.

THE CHIEFTAIN is informed the wedding in high life will not materialize as was expected in last week's issue. The thing broke on the turn. Whether the young lady or young gent recanted we do not know—the furniture all went back.

Councilman J. J. Leeson, chairman of the committee on water closed contract with the Santa Fe company on last Saturday for water for the use of said company. The rate fixed was \$300 per year, payable quarterly, which makes quite an addition to the water revenue.

John J. A. Dobbins, of Water Canon, came to Socorro Monday, looking hale and hearty. He is preparing to do a large amount of work on the Wall Street and the famous old Ruby, in Silver Mountain Mining District. Mr. Dobbins will astonish the boys some one of these days.

The business of Socorro has been good all the fall, in fact their jobbing trade has been steadily on the increase. With a bridge over the Rio Grande it would more than than thrive. A bridge should be built. If the county has not the funds and one cannot be gotten that way, why then let our merchants form a joint stock company, build the bridge and charge toll. Lets have the bridge.

Yesterday quite an army of tramps arrived in the city and within one hour the back doors of our citizens were shaded by their unsightly appearance. Within two hours the marshal had eight of the gang locked up. In the meantime the other twelve steered their cargo for the south. The marshal to-day will wet down every street in the city and for a time at least do away with the dust.
