We call attention to the new advertisement of Price Bros., which appears in this issue. It will be seen by their proclamation that they propose to sell goods at prices lower than any other house in the territory. They mean just what they say and if any one doubts it they will be convinced by giving them a trial.

The communication in execrable Spanish, which appeared in a recent issue of the Sun and was signed 'L', was attributed by some of our citizens to the Rev. Father Peters or to Professor Longmire. We are authorized to state that both of the gentlemen deny the soft impeachment.

Wm. Swapp of Luna Valley 175 miles South West from here, has been suffering physically and worried morally from the excessive heat coming on his right side. Yesterday Dr. Goehner assisted by Drs. In this issue we call attention to the new firm of Blinn Brothers, who have recently opened a fine stock of general merchandise in the building formerly occupied as Judge Kelley's court rooms on the plaza. They are pleasant gentlemen to deal with, and we predict for them a large share of the patronage. Give them a call.

The reports circulating that the large store room of Simon Lyster, at San Marcial, had fallen on account of the high waters, prove to have been unfounded. Nevertheless the damage done at that place is very great and amounts to thousands of dollars. The river flows between the old and new towns, boats being required for transportation.

Chas. Melville and Stanley Bakbridge, two prominent young men of Lincoln county, arrived here last week, and will make this city their home for some time in the future. They are both energetic, industrious and reliable young men whom we take pleasure in recommending to the favor of our citizens.

The St. Michael parish church is undergoing extensive repairs, and is also being greatly enlarged. As the size of the church was entirely inadequate for the wants of the large congregation frequenting it, Father Lester, the enterprising pastor in charge, has gathered the means to make all no esary changes and the work will be pushed to completion as rapidly as possible.

The Alamillo washout seemed for a time to present insurmountable obstacles, but finally the company placed the work in the hands of contractors Duncan and Hampton who laid the track around the break, so that on last Sunday the road from here to Albuquerque was in good condition, allowing the resumption of travel. It is supposed that the change at Alamillo will be a permanent one.

The water business has of late been somewhat demoralized, but at last the evil has been remedied. The Major Do no Jacinto Gallegos was bitten by a fierce dog, which obliged him to desist from his duties for about a week, but being sufficiently able to do so, he resumed his duties on Tuesday morning, and now we hope that there will be no further cause for complaint.

Messrs. Armstrong & Coon, who lately bought out the Enterprise saloon, have one of the neatest places of resort in Socorro. Mr. Armstrong has lived here for a number of years, and lately had the great misfortune to lose his sight and is now totally blind, but being a man full of grit and enterprise, he decided to start in business amongst his old friends, who show their appreciation of his efforts by giving him a liberal and generous support.

At the request of a number of prominent citizens, we publish in full the address of Gov. St. John as reported by Mr. M. Shaw of this city. All persons desiring extra copies will find them at all the news stands in the city, or at this office. Price five cents.

Gen. Geo. A. Forsyth, Maj. Lucwellyn, Brewster Cameron and several other prominent gentlemen who were passengers on the delayed train this morning, took breakfast at the American House. Gen. Forsyth's command of Fort Lowell Arizona. He has been one of the most successful, and is one of the most popular officers on the border. Maj. Lucwellyn is on his return from the Chicago convention, and is still as ever the popular Indian agent. Brewster Cameron, we'll know in the East is now receiver of public moneys at Tucson Arizona.

G. L. Brooks, the efficient manager of the Texas Investment Company for New Mexico and Arizona, with headquarters at Socorro, has just closed a contract with Col. Wm. T. Hall, of the Holt Live Stock Company, of Colorado, for the sale and delivery of 4,000 head of Central Texas yearling heifers to be delivered in sixty days at Col. Holt's breeding ranch, in Lincoln county, and several car loads of saddle horses and thoroughbred bulls are included in the sale. The Colonel also has about the same number of stock coming from his Colorado ranch for Lincoln county.

Our well known and popular fellow citizen, John Egger, came to the front this week with an extensive advertisement in THE CHIEF-TAIN. Mr. Egger is one of the pioneers of Socorro, having come here over four years ago, being engaged in business ever since that time. He is a gentleman thoroughly understanding all the points in his business, and will assure perfect satisfaction to his customers, who may purchase anything in his line. His stock of saddles, harness, etc., is very extensive and varied, so that he is able to supply all tastes at the most reasonable prices.

The Las Vegas Optic has been badly galled by some fraud who reported that Socorro is completely inundated by the raging waters of the Rio Grande. There is about as much danger of an overflow at Las Vegas, and as Socorro remains high and dry there is no cause for alarm. The only injury resulting to this place is caused by the washout above and below us, which delay trains to the inconvenience of our business men and the traveling public. The loss and trouble falling upon different sections of the valley are serious enough, and the papers of the Territory should see to it that no false or exaggerated reports are published as they will had created among people not familiar with the situation.

A prominent railroad official, whom we met a few days since, said that it would be only a short time before there would be at least ten smelters in Socorro, equal in capacity and as successful as the Billing smelter, and we can see no reason why his predictions should not prove true.

Information Wanted To know how it is that the city auction house on Court street, sells such large quantities of goods, if you wish to know, step in and price the goods, the low prices will inform you.

The Court House The contracts for the construction of the new court house have all been signed, and work will begin this week. The bonds will be issued under the funding law, passed at the last session of the legislature, and the whole matter now seems to be satisfactory to the contractors and county commissioners. As the enterprise will be the means of placing a large amount of money in circulation as well as in giving us a court house that the citizens of Socorro are well satisfied and are eager to see the structure completed.

The Magdalena Railroad. Work on the railroad from Socorro to the Magdalena mountains, was delayed to some extent on account of the washouts on the main line, but during the last few days operations have been resumed with renewed vigor, and will be pushed energetically until the last rail is laid. A large force of men was sent out on the line last Monday, and as the necessary material is on hand they will be constantly employed from this time forward. The people of the many mining camps and ranches to the West of us, are overjoyed to know that they will soon be in close communication with Socorro, and the mutual benefits to be derived are incalculable. It assures the rapid development of the country between this city and the Arizona line, rendering it tributary to us, and securing our position as one of the leading cities in the South-West in the very near future.

The Trouble not in the Family A few days since we witnessed a friend taking an early evening stroll down Magdalena avenue towards the depot, and as they passed, their acts and looks indicated domestic happiness, but on their return we observed a seeming coolness. The wife was somewhat in the lead, with head erect and a far away expression of countenance, while she grasped the rear department of her apparel with both hands and walked as though she was treading on eggs. The husband had a downcast suspicious look, keeping his eyes constantly in the direction of his wife's hands, as though he was expecting something to "drop," or explode. He felt sure that a family "bustion" had, or was about to take place, and meeting the husband a short time afterwards our curiosity led us to refer to the matter and ask him what caused the trouble between him and his wife: "Trouble? Wife?" he answered, "Why, there was no family trouble, but as we came up that miserable side walk there by Walker's place, my wife's dress-skirt caught on a nail and she broke a hamstring, or something, and had to hold her clothes on with her hands until we got home for repairs. Gosh, but wasn't she hot though! but not at me. You see, I was walking along habitually to report on appearances from a rear standpoint—wonder how many generations will pass away before they fix that sidewalk anyhow!"

Walter Cook, of the Magdalena, made us a call this week and reports that THE CHIEF-TAIN is rapidly becoming the favorite Chief of the mountains.

"Well, Doctor, what is the news?" "Oh nothing: all the talk now is about those fine pot flowers and window plants for sale at the City Auction House, Court Street."

Those samples of Socorro marble, on exhibition at the meat-market of Young & Bell, are magnificent specimens, and prove Mr. Brown to be a skilled artist in his line. They are well worth a careful inspection.
