SPANISH PREACHERS.

The Session and Appointments of the New Mexico Spanish Mission Conference.

The conference was held at Valverde, across the Rio Grande from San Marcial, and about four miles up the river.

It was presided over by Bishop W. H. Warren, D. D., of Denver.

The same bishop held the conference of this Spanish mission some eleven years ago, and was surprised to see the increase and improvement of the mission.

Some twenty-four members answered to their names, and a congregation of about one hundred and fifty people were present at the morning session, Oct. 4th, in the church building.

The usual conference business was dispatched, reports read, statistics gathered, candidates examined in their studies and efficiency, and advanced in their studies. Two children were baptized by the bishop and two persons ordained, one by deacon's orders, Rev. Eguiguren Flores, and one to older orders, Rev. J. E. Sosa.

The appointments were made at 4 p. m. Sunday and the conference adjourned. The bishop preached at San Marcial at night and the sermon was said to be very fine.

Col. J. L. Bullis, the agent for the Juarez Apache and Pueblo Indians, who was in the city for a few days, returning from Laguna, went up to Santa Fe last night.

N. Van Slyke, accompanied by an invalid sister, arrived last night from Burlington, Kansas, and registered at the San Felipe. They will probably remain here during the winter.

Hon. Anthony Joseph, the democratic candidate for delegate to congress, and Hunter Woodson, representing the New Mexican, passed through the city last night, en route to White Oaks and Roswell.

Col. J. S. Hutchinson, the old miter, would like to find out the name of the driver that handled the Cochiti or from the fair grounds to the Commercial club building. He wants to pay him, no doubt, for his work.

H. D. Homer, the excellent and competent night yardmaster at the depot, returned last night from El Paso, where he was called as a witness in a case on trial. While absent, his position here was in good hands, that of Col. W. T. Strain.

A. D. Risdon, A. W. Summerlin, A. E. Showen and A. H. Elliott, a party of California miners arrived yesterday from the west and are at the Armijo. They will prospect the Sandia mountains east of the city, after which they will return to the city and then go up to the Cochiti mining district.

Hon. C. M. Wm. Burns, his efficient deputy collector for this division, met the collector at the depot.

J. W. Farnsworth, chief clerk under ex-Division Superintendent Kesley, came up from San Marcial last night and is in the city to-day, registered at the European. It is more than likely that the retirement recently inaugurated by J. J. Frey, general manager of the Santa Fe road, also touched Mr. Farnsworth. If such is the case, he will not remain out long, for the railroad company needs good, competent employees scattered here and there.

signs on the register at the Armijo.

H. T. McKinney, who believes that more fish mineral bearing rock remains unmined in the Hill County mining district than in any other district in the territory, drove into the city from the canon this morning. He is interested in the mining field for the Milagro group of mines, but is now mining on his own hook, having opened up a fine prospect, which he has named the Tariff Reform.

G. H. Waterbury, the postoffice inspector, is in the city, arriving from the north last night. City Marshal Fluke had charge of the gentleman this morning, not as an arrested party, but as a friend of several years' standing. The inspector, who is a democrat, is making war upon the dishonest democrats whom he finds here and there throughout the southwest.

Hon. J. W. Fleming, mine inspector for the territory, came up from the south last night and during his short stay here Judge Burns explained to him his reasons why the populists are making such a howl down in the southern counties, thus lessening Joseph's chances of victory. Mr. Fleming left on the 11 o'clock passenger train for Gallup.

The broom and brush factory of Chas. May, late of Galesburg, Ill., was started up this morning, the machinery having arrived yesterday from the east. Mr. May called at THE CITIZEN'S office this afternoon and stated that he has only three men at work at present, but he expects to increase the force in a few days.

A COMET COMING.

Splendid Traveler Due to Come Within Human Vision in 1911.

Halley's comet is coming back, the comet which in the year 1906 shed a colossal splendor over the Norman continent, whose terrific inspirations were commemorated by the band of Queen Matilda in the Bayeux tapestry. The comet, which was the year of the battle of Heston, searched the Turk and Christian alike, and was annihilated by a bull from the pope; the comet whose strange scimitar form still shilled the marrow of the ignorant and superstitious at its latest return in 1835.

It is yet far away, says the Chicago Times, but the eye of science sees it, already, within the orbit of Neptune, rushing onward in existence and constantly increasing velocity as it falls along the steep curve of its orbit. And a call to arms a call for preparation, has just been issued from one of the chief watch towers of astronomy. Prof. Glasebapp announces that the computing bureau established by the Russian Astronomical society has undertaken the calculation of the true path of Halley's comet with a view to predicting the exact date of the next return. He hopes that astronomers acquainted with unpublished observations of the comet will communicate the information to the society.

After its perihelion the comet was watched retreating out into space until May, 1896, when it was finally swallowed from sight. It will be in perihelion again about 1911, but with the great telescopes now in existence and the greater one that may then have been constructed it is probable that the comet will be detected coming sunward a year or more earlier than that. The fact that the labor of computing the precise time of its return is already about to begin gives assurance that the next time it will not be a question of how many days but rather of how many hours or even minutes the calculations will be in error.

A Wonderful Violin.

David Johnson, of Alliance, O., has in his possession probably the oldest violin in America. The instrument has been a family relic for many years, dating to the property of Johnson's father, Ellis N. Johnson, the contractor who died a few years ago.

The violin is a very handsome piece of woodwork, the rim around it having been cut from thick wood and richly carved. On the stem is carved a bust of one of the old-time masters. On the back, in inlaid work, is a design representing one of the ancient towns of Italy, while the keys are mounted with pearls. The instrument has a very rich, deep tone, but cannot be tuned to any of the violins now manufactured. It is almost an exact counterpart of the famous Mojetta violin, and has been handled by some of the finest musicians of the land. Around the edge is a Latin inscription signifying: "Whilst living I was in the woods for God, but dying I passed away into a world of beauty. The instrument is of the violin is not known, but exceeds two centuries and possibly four.

It is pretty hard to believe how ignorant some people are about matters with which they have no personal acquaintance, but there are numerous instances to prove. A lake steamer, on its way from Chicago to St. Joe, came near colliding with a smaller boat—so near, in fact, that the fenders were scraped. The boat was drawn up to the dock, and while the farmers were bringing on their produce, the carpenters were putting on new fenders. Two farmers came up and looked at the boat admiringly. "That's the reason that I will carry us over to Chicago," said one of them. "Yes, and she'll take us over in a mighty little time," said the other. "I heard she made the trip in four hours this morning." "She'll go back in less time than that," was the first farmer's response. "Look at the new legs they are putting on her."

There is a party in the city who is looking around for a location for a first-class family restaurant. THE CITIZEN would suggest to him to inspect the room recently vacated by The Progress store, the location is central and excellent.

Col. Daniel Boone's Wild West show is expected here in a few days. When last heard from the show was at Gallup. The company has met with bad luck, financially, along the Atlantic & Pacific.

MR. DE LA LAMA'S CHARIOT.

Federico de la Lama's chariot to traverse the Mesilla valley.

P. G. de la Lama, of Albuquerque, came to Las Cruces last Thursday, and before he had time to put his pocket pistol away he was seized by a policeman, searched and arrested for carrying a weapon.

When the case came before Justice Monte, the prosecuting attorney, Mr. Newcomb, admitted that there was no cause for the arrest, that Mr. Lama, being a traveler, had not broken the law, and the case was promptly dismissed.

The above item is clipped from the Las Cruces Independent Democrat, and is somewhat different from what our Las Cruces correspondent had to say upon the subject. After paying his respects to a young man named Federico Ochoa, our correspondent says:

He (Ochoa) is a devoted disciple of P. G. de la Lama, the editor of La Opinion Publica, of Albuquerque, who, by the way, was put to day in the county jail for furnishing a revolver on our streets. Pino and Ochoa immediately went Lama's bonds and the rascal is out again. He was not fined \$50—but the drinks! He is at large. Had he been a republican, it would have been \$100 and thirty days in the county jug and the trimmings.

Mr. de la Lama has returned to this city, and this paper understands that he has prepared a communication, dipped in carmine, denying what our correspondent said about him, but he cannot deny that he was not arrested, and that for carrying, like a brigat, a loaded weapon in such a civilized community as that of the Mesilla valley and Las Cruces. This paper doesn't care as much as the snap of a trigger what such people like de la Lama says, for all he can write will have no weight upon the free thinking, educated public, but will make, what our correspondent's article failed to do, an impression upon the people that de la Lama must be a coward or he would not be strutting around the country with a loaded pistol in his hip pocket. He reflected seriously upon the Mesilla valley, as a law abiding community, when he started out parading his prowess in such an armed fashion, and the officer did his duty when he arrested the Spanish editor.

A riot accident.

While Troop B. of the First cavalry, stationed at Fort Bayard, was engaged in a skirmish drill near Hanover, Grant county, Sunday afternoon, one of the horses stumbled and threw his rider. Before the man following could check his speed, his horse had struck the fallen trooper, and likewise caused his rider to be thrown. Both troopers were seriously injured, and the Red Cross hospital corps were summoned to take care of the injured men. It is thought one of the men will die. No names could be learned. The drill was in charge of Lieutenant Galbraith, and the clouds of sand blowing at the time was responsible for the second rider failing to stop his horse in time.

THE BUSINESS MAN'S LUNCH.

Hard Work and Indigestion go Hand in Hand.

Concentrated thought, continued in, robs the stomach of necessary blood, and this is also true of hard physical labor.

When a five horse-power engine is made to do the work of a horse, the engine is going to break. Very often the hard-worked man coming from the field or the office will eat his food in a few minutes because they do not get the nourishment they require from the blood.

Finally the ill-used brain is morbidly weak, and when the overworked man sits down to eat he finds that he cannot eat. The application of common sense in the treatment of the stomach and the whole system, brings to the busy man the full enjoyment of life and healthy digestion when he takes Dr. Pierce's Pleasant Pellets to relieve a bilious stomach or after a too hearty meal, and Dr. Pierce's Golden Medical Discovery to purify, enrich and vitalize the blood. "The Pellets" are tiny sugar-coated pills made of highly concentrated vegetable ingredients which relieve the stomach of all offending matters easily and thoroughly. They need only be taken for a short time to cure the biliousness, constipation and flatulence, or torpor of the liver; then the "Medical Discovery" should be taken in teaspoonful doses to increase the blood and enrich it. It has a peculiar effect upon the lining membranes of the stomach and bowels, toning up and strengthening them for all time. The whole system feels the effect of the pure blood coursing through the body and the nerves are vitalized and strengthened, not dozed, or put to sleep, at the so-called celery compounds and nerve mixtures do—but refreshed and fed on the food they need for health. If you suffer from indigestion, biliousness, nervousness, and any of the ills which come from impure blood and disordered stomach, you can cure yourself with Dr. Pierce's Golden Medical Discovery which can be obtained at any drug store in the country.
