

From Wednesday's Daily.

W. C. Archer, a cowboy of El Paso, Texas, is in the city.

M. C. Nettleton, the jeweler, left this morning for El Paso.

J. L. Peres is in the city from his extensive cattle ranch east of this city.

Mrs. G. W. Hamilton, registering from Laramie, Wyoming, is at Sturges' European.

F. J. McElvitt, representing the San Francisco Examiner, has returned to the city from a trip up north.

A. L. Barney, son of Conductor Barney, has returned to the city from a vacation stay in New York state.

Donald McKee has his name on the San Felipe register. Mr. McKee is here as a representative of the Santa Fe News Mexican.

G. C. Smith and wife, of Santa Fe, are among the late arrivals from the north, and have comfortable quarters at the European.

M. R. Moore, of Denning, who has been appointed to succeed C. L. Hetterton, as deputy internal revenue collector, has arrived at Santa Fe.

At the Hotel J. P. McFadyen has sold out his business, and the Hotel Mac will soon be transferred to Valentine Schick, of Santa Fe.

H. C. Snyder, of the Zuni Lumber company, this city and district, is here from the latter town to spend the holidays with city friends.

Chas. Zeiger, who has been to southern California, where his family are residing, returned home in time to partake of Christmas turkey at the cafe.

Thos. J. Smith, chief justice of the territory, and wife spent Christmas with Mr. and Mrs. W. B. Childers. The judge returns to Las Vegas this evening.

Rev. Mark Holgerson and family, of Socorro, arrived in town last night to spend a few days with his brother, Rev. Robt. Holgerson, and to attend the revival meeting.

J. J. Donahue, of this city, is temporarily engaged in the train dispatcher's office of San Marcial, while the permanent holder of the post is making a vacation.

Hugh Morrison, of the Atlantic & Pacific auditing office, spent Christmas with his parents at Santa Fe, and G. M. Montgomery with his sister, Mrs. Dr. Lind, of Bernalillo.

T. R. Gabel, general superintendent of the Atlantic & Pacific, returned home from the west yesterday. He severs his connection with the above company on the 1st of January.

J. B. Lazenar, the national bank examiner, J. L. Stubbins, the western superintendent of Wells Fargo Express company, and B. Brooks, are Denver gentlemen, who were registered at the Hotel Columbus.

P. L. Timen, the salesman of Allerton, drove down to the metropolis yesterday, behind his thoughtful tractor, a half brother of Zeiger's, celebrated Berringer. Jim McCortison has Mr. Timen in tow this afternoon.

James A. Parson, V. Van Kirk and J. F. Diamond, three railroaders from Winslow, ate Christmas turkey in the territorial metropolis. They are here today, enjoying the holidays.

Not every woman, who arrives at middle age, retains the color and beauty of her hair, but every woman may do so by the occasional application of Ayer's Hair Vigor. It prevents baldness, removes dandruff, and cures all scalp diseases.

George W. Champion, who is working some new mines up in the Colorado mountains, came down to the city Monday night, ate Christmas turkey with his wife at their home on the Highlands, and returned to the mines this morning.

District Attorney Wm. H. Whiteman has returned from his trip to Vermont, where he went to try to collect delinquent taxes from the stockholders of the broken Albuquerque National Bank. He reports that the chances are good for securing the collection of the money, about \$4,000.

A. R. Hudson, the painter, has returned from Needles, Cal., where he was doing some work for the Atlantic & Pacific railroad company. He reports Jim Phelan, a former butcher of this city, celebrating the arrival at his home of a fine girl baby. Mr. Phelan now resides at Williams.

Colonel Lofland, who has been the editor-in-chief of the Democrat, called at Tax Critzer's office this morning in company with Chas. O'Connor, editorials, and stated that he had quit writing editorials. He held down the editor's chair, to his astonishment, about three weeks. He expects to go to Santa Fe on Thursday.

G. W. Miles, the democratic candidate who was fairly defeated for the legislature in the southern portion of the territory, but who has been persuaded, in opposition to his wishes, to contest the seat of his successful opponent, came up from Silver City last Sunday night, with his wife and baby, to spend the Christmas with ex-Governor Ross and wife, parents of Mrs. Miles. Mr. Miles desires to visit Santa Fe before the convening of the territorial legislature.

Rev. W. H. Fenton Smith, of the Episcopal church, and mother, will leave tomorrow morning for Phoenix, Arizona, provided his mother is able to travel, where they will reside in the future. Rev. Smith has had charge of the St. John's church, in this city, for the past few months, and was getting well acquainted with his congregation when he concludes to leave the city. For the time being W. M. Driscoll will conduct the services of the St. John's church.

The carriage horse of Mr. and Mrs. Jacob Korber took flight yesterday morning at the Railroad avenue depot crossing, as Mrs. Korber was driving to her home on the Highlands. The horse wheeled around and Mrs. Korber, who was the only occupant of the vehicle, jumped out just as the carriage tipped over, but righted itself a moment later. The horse was captured near the store of Joe Beardslee on south Third street, and strange to say no damage was done either to the horse or carriage.

The handsome doll which attracted attention at Mrs. Shields, on Gold avenue for the past week, while voting was going on for the most popular child, was won by little Miss Josephine Campbell, daughter of G. A. Campbell, bookkeeper at K. J. Post & Co's., and the doll was turned over to the victorious little miss last night; she received 1208 votes against her next highest opponent, Miss Nellie Flournoy, who received 938 votes. The votes received by the other contestants ranged from 250 to 130. Miss Josephine was at the German dance last night with her parents, and she felt very proud over her victory.

George E. Hopkins, of Denver, Colo., arrived this morning with his outfit for ditching, and began transferring his goods to the Rio Puerco this morning. He has a contract for building ditches, reservoirs and dams for the Western Homestead and Irrigation company. Sebastian C. Martin and son, of Hanson county, South Dakota, also arrived with six teams, having driven

all the way from Dakota, a distance of 1,300 miles. Mr. Martin will locate with the colonists on the Rio Puerco, and will assist in the work of building the ditches. The irrigation company will have twenty teams and thirty men at work in a few days. The works are to be completed by March 20 next.

In Barrios precinct the people met in mass convention last Friday and nominated the following candidates for precinct officers: For Justice, E. Tafuya; comptroller, Ramon Sedillo; foreman of accounts, Abram Stanton; assistant foreman, Rafael Sedillo; treasurer, Vicente Sedillo.

Miss Frances Britton gave a Christmas party to all her little girl friends, and her brother Tom invited all his boy friends. After supper Miss Lizzie Barrett served them with fruit and candy, and they had a pleasant time.

Honors fairly earned were the highest award at the World's Columbian Fair in Chicago, the silver medal and gold medal at the California Midwinter Fair to Dr. Price's Baking Powder.

In a few days the grocery merchants, El Clouthier & Co., will remove from their present quarters to the store room recently occupied by the A. C. Briggs Furniture company.

From Thorsen's Daily.

Dr. R. G. Westbury, of Bernalillo, is here today.

Wm. Hoffman and wife, of San Marcial, are in the city.

Mrs. T. Scully and daughter are in the city from East Las Vegas.

Rev. J. M. Conders and M. Nagroble, of Bernalillo, are stopping at the European.

J. G. Chavez and family, Mrs. D. Munoz and family, of Los Lunas, are at the Windsor.

H. S. Nones, who writes policies for the Traverses Life Insurance company, was a passenger for Denver last night.

W. E. Martin, one of the legislators from Socorro county, made a pleasant call at the Tax Critzer's office this morning.

Hon. Silas Alexander and Col. W. S. Warren, both of Socorro, passed their names on Sturges' European hotel register, yesterday.

W. S. Hopewell, a member of the Territorial Cattle Sanitary board, came up from Hildesburg, Sierra county, last night, and registered at the European.

C. Gordon De Wense, of Colorado Springs, has arrived in the city, and takes the night shift at the Western Lumber company, where he is a very pleasant acquaintance.

Joseph Tridwell, who has been conducting a store at Fortuna, Ill., for the past two months, returned to the city Monday night, and has a "bit" at the big retail grocery store of the Golden Rule Dry Goods company.

W. S. Thomas, accompanied by E. Van Dorn and Sebastian C. Martin, and son left for the Rio Puerco this morning to start the work of building the ditches and reservoirs. Teams left this morning with supplies.

Conductor W. H. Barney, who has been ill with neuritis in the head for several weeks, is improving rapidly, and will be able to report for duty in a short time. During his illness, Thos. Somerville is officiating as extra conductor on the Atlantic & Pacific between this city and Winslow.

Austin Goodall and Portigliati, of Cerrillos, where they are in partnership in a paying business, are registered at the European. They have just returned from their coal mine near Carthage, in Socorro county, and this morning informed Thos. Somerville that the coal they are mining is as good as any that comes from the mines near Cerrillos.

Late visitors at the Commercial club: F. W. Hamon, Jr., of Socorro, Ariz.; J. S. MacFadyen, A. C. Vincent, of Buffalo, N. Y.; W. E. Walsh, Donald McRae, of Santa Fe; W. C. Meilan; H. P. Alfred, of Newberry, by T. R. Gabel. This afternoon several of the visiting educators of the territory were introduced at the club.

Chas. Trimble, brother of W. L. Noble and Miss Mary Trimble, son of A. A. Trimble, arrived the other day, and is enjoying the holidays with his home folks. He was one of the boys in the very early days of Albuquerque, but he only finds a few of those days now residing in the city. He is now an engineer on the Inter-Oceanic railroad down in Mexico.

W. A. Givens, who has been the general agent for the Singer Sewing Machine company for the past year, has resigned his position, to take effect on the 1st of January. It is understood that Mr. Givens will remove back to Las Vegas in a short time, where he will soon engage in business. Since resigning in this city, they made many friends, who will regret to read this notice of their early departure.

The Result of a Trial.

Cannelton, Ind. I have used Simmons Liver Regulator, manufactured by J. H. Zedlin & Co., Philadelphia, and found that for indigestion and liver complaint it is the best medicine I ever used.—K. E. Clark. Your druggist sells it for powder or liquid. The powder is to be taken dry or made into a tea.

The Poultry Show.

The poultry show grows more interesting daily, yesterday (Christmas) and today quite a number of our citizens and visitors having paid the price of admission in order to get a glimpse of some of the highest bred and fanciest fowls in the world.

In addition to the entries published exclusively in this Citizen, the people's journal, the following entries were made this morning: Pair of blue fantails and pair of white fantails, pigeons, and a pair of white-faced black Spanish chickens, by Miss Flora Otero, of this city.

In our report Monday the types made us say, "F. G. Swartz, Summit poultry yards, Denver, pen of buff cockins." Mr. Swartz is not from Denver, but from Gallegos, his county.

N. W. Gallegos has on exhibition "The Daisy Bone cutter," manufactured at Easton, Penna. The advantages of this cutter over any other invented are that the knife plays direct upon the bone, and puts the feed in feed morsels for the fowls. Mr. Gallegos is the agent for New Mexico for "The Daisy," and he has already taken a few orders.

To the aged, with their poor appetite, feeble circulation and impoverished blood, Ayer's Sarsaparilla is a boon beyond price. Its effect is to check the ravages of time, by invigorating every organ, nerve, and tissue of the body. See Ayer's Almanac for the new year.

Donovan's Seal.

The Flagstaff Democrat says John Donovan, the Maricopa train robber who is still at large, is in hiding in this county. The officers have located his base of supplies, and are getting ready to bag their game. It is quite probable that Donovan will be in the toils of the law within a few days, and perhaps within twelve hours.

Buckingham's Dye for the Whiskers does its work thoroughly, coloring a uniform brown or black, which, when dry, will neither rub, wash off nor soil linen.

IT IS WITHOUT EQUAL

Advantages of New Mexico in Phthisis Pulmona is.

AN ABSTRACT OF INTEREST

The American Practitioner and News of recent date has the following, written by Dr. S. D. Swope of Marion, Ky.

The treatment of phthisis pulmona is has been a theme to occupy the medical mind since the first sufferer progressively emaciated and coughed his pulmonary tissues away, despite the arduous efforts of the pre-historic medicine man, whose charms and incantations proved little less satisfactory than the present therapeutic endeavors with the light of time shining with resplendent effulgence on their enterprise.

The treatment of this arch enemy of science has exhausted scientific research as well as empiric speculation, as is evident to every medical mind since the serum of dog's blood has been employed in France.

In sheer desperation we turn from the field of allopathy and fill our mental abodes with the arguable but unstable morsels in the pastures of similia similibus, until we find we have gorged ourselves with a substance absolutely indigestible, "Koch's Lymph."

There has been so much written and said in the last few years with regard to etiology and pathology in this affection that the careful reader of current medical literature would necessarily be bored by any rehashing of the subject. Suffice it is to say that it is a commonly accepted conclusion that the bacillus tuberculosis now has the credit of producing the pathological results under discussion.

At this micro-organism the basins of the universe are leveling their weapons, but, despite the storm of therapeutic agencies and empirical endeavors, unscathed he stands and waves defiance at the attacking cohorts, so far secure in the fact that whatever may be able to deprive him of vital force will pull down the temple which he inhabits about his dead body, so he takes his dose of alcohol, carboles indica, iodine, strychnine, and carbolic acid with a feeling of perfect security.

The observant reader and practical practitioner is forced by perfectly natural conclusions to turn to a long list of unscientific and irrational agencies until some new experiment extenuates the adage that "hope springs eternal in the human breast," when with laudable animation, but unfortunately with no scientific conclusions, once the ignis fatuus lures him away from the path of science and duty.

From following these will-o'-the-wisps of past experience we turn with wearied brain and exhausted resources to the winter with a patient whose left lung was almost entirely hepatized, who had night sweats, progressive cough, profuse pulmonary hemorrhages, and great emaciation, his exhaustion was almost complete. Leaving him here I went to southern California to investigate its climate, returning in twenty days. I found my patient, who was scarcely able to walk when I left, riding readily and walking everywhere. He now is working on a cattle ranch. His cough has disappeared, he has gained much strength and considerable weight. He can now ride forty miles a day, and with myself is overjoyed with the change.

I am conscious that one swallow does not mean that summer has arrived, and yet with my experience and the happy result with this patient, in which the diagnosis was unobtainable, I do feel warranted in suggesting that most phthisical patients sent to this climate in time, placed in desirable surroundings, and given the regular palliative and supporting treatment, will come nearer recovery from phthisis than under any other now known treatment; and I firmly believe that at the foot of the hill, from which issues the hot spring of which I speak, will some day be built a sanitarium which will prove a Mecca, if not a fountain of life to many a poor consumptive.

In passing through this region the average traveler, in pursuit of either health or pleasure, is a little interested here. The sandy waste, the acupetic brush and sleepy towns are of little interest, and do not compare favorably with the orange groves all laden with their golden fruits, the red tinged cactuses, graceful yuccas and pine trees, and the evergreen firs of Lower California.

North Carolina with her pineries does not fulfill the requirement, for her most popular resort, Asheville only has an altitude of 2,250 feet, while her temperature ranges from 100 degrees to 60 degrees below zero, and we instinctively turn to the western plateau.

The professional mind has long since been led in this direction, though we have had more theoretical conclusions than personal experience in this region.

Early in the present century many a poor consumptive left his eastern home in poor health to try his fortune in the gold states of the west, and while he did not always fill his pockets with the precious metal he did his lungs with the pure oxygenized atmosphere of a high, dry climate, and many a sickly, scrawny cougher became a brawny miner.

After careful research and some personal experience in looking over the regions I come to the conclusion that southern and central New Mexico comes nearer fulfilling all the requirements for the advantageous treatment of pulmonary diseases than any other region with which I am familiar.

Southeast of Silver City there is a high plateau, partly across which runs a little mountain stream, the Mimbre river, until it loses itself in the dry sandy plains. This plateau, from 4,500 to 5,000 feet in altitude, about forty miles long and forty wide, is sheltered on every side by high mountain ranges and peaks. The wind blows continuously from the northwest

and west. The greatest velocity recorded at Silver City is only twenty miles an hour, while Denver has a record of forty-two, New York forty-eight, Chicago thirty-five, St. Louis thirty-seven. The sun shines nearly all the time, there being only thirty cloudy days recorded by the signal service office at Fort Bayard in 1901.

Some idea of the dryness of the atmosphere may be gathered from the fact that ten inches is considered a heavy annual rainfall, and no one in the region expects rain from October until the following July. Vegetation in this region does not decay, but simply dries up.

So perfect is this desiccation that I dug from the site of an old Aztec village a piece of pine which had been used as a post. It still remained in a perfect state of preservation. Even the charcoal burned intact where the Indians had burned it off at the lower end many years ago. Animals do not decay, but simply dry up on the plains. Beef will keep here without salt for weeks, when a man is not uncomfortable in his shirt sleeves.

In this valley the maximum temperature is 90 degrees, but the ever present breeze from the mountains so tempers the heat that it is not oppressive. The minimum temperature for the last ten years has been 28 degrees F. The hottest days are sure to be followed by nights when a blanket is a necessity, an adding one to secure a good night's sleep though the heat of the day may have been oppressive.

Here an invalid may be out of doors 330 days in the year, while the mountain scenery and many geological developments afford pleasant diversion.

I found here many persons whose physicians had informed them that only a few months were left them on earth, when in reality comparatively free from the effects of their malady, they were pursuing their vocations after several years had elapsed.

Pulmonary phthisis does not occur so far as I could learn among the natives, nor does the disease develop in offspring of tuberculous families.

Asthma and hay fever are unknown. At the northern extreme of the plateau there wells up a hot spring that flows at a temperature of 142 degrees F., affording ample facilities for bathing and irrigating quite a scope of country. This spot seems to me the most favored I have ever yet seen for the treatment of pulmonary disease. With a mean temperature of 54 degrees, humidity the lowest possible, in a latitude of 32 degrees, 46 seconds, longitude 108 degrees, 31 seconds, in an altitude of 4,500 feet, highest temperature 90 degrees, lowest 28 degrees, with a high, dry air in which purification literally does not take place, we invest our patient with surroundings which facilitate the healing process and invigorate his body to the highest possible degree.

When I reached this region late in the winter with a patient whose left lung was almost entirely hepatized, who had night sweats, progressive cough, profuse pulmonary hemorrhages, and great emaciation, his exhaustion was almost complete. Leaving him here I went to southern California to investigate its climate, returning in twenty days. I found my patient, who was scarcely able to walk when I left, riding readily and walking everywhere. He now is working on a cattle ranch. His cough has disappeared, he has gained much strength and considerable weight. He can now ride forty miles a day, and with myself is overjoyed with the change.

I am conscious that one swallow does not mean that summer has arrived, and yet with my experience and the happy result with this patient, in which the diagnosis was unobtainable, I do feel warranted in suggesting that most phthisical patients sent to this climate in time, placed in desirable surroundings, and given the regular palliative and supporting treatment, will come nearer recovery from phthisis than under any other now known treatment; and I firmly believe that at the foot of the hill, from which issues the hot spring of which I speak, will some day be built a sanitarium which will prove a Mecca, if not a fountain of life to many a poor consumptive.

In passing through this region the average traveler, in pursuit of either health or pleasure, is a little interested here. The sandy waste, the acupetic brush and sleepy towns are of little interest, and do not compare favorably with the orange groves all laden with their golden fruits, the red tinged cactuses, graceful yuccas and pine trees, and the evergreen firs of Lower California.

North Carolina with her pineries does not fulfill the requirement, for her most popular resort, Asheville only has an altitude of 2,250 feet, while her temperature ranges from 100 degrees to 60 degrees below zero, and we instinctively turn to the western plateau.

This plateau, from 4,500 to 5,000 feet in altitude, about forty miles long and forty wide, is sheltered on every side by high mountain ranges and peaks. The wind blows continuously from the northwest

THE POULTRY SHOW.

A Magnificent Display of High-bred Fowls.

GO AND SEE THEM.

It is Poultry Day in the territorial metropolis, and the fancy, high-bred fowls, on exhibition, are making themselves heard.

The second annual exhibition of the New Mexico Poultry association opened in a vacant store room on Railroad avenue this morning, and will continue through the week.

The attendance this morning was small, but will increase in number and interest daily.

The following are entries now on exhibition, which they represent considerable money expended in high-bred fowls: Dr. C. R. Winslow, city—Three pens of single-combed brown Leghorns. Cavin Whiting, city—Pen of silver Wyandottes.

B. Siegel, city—Pen of single-combed brown Leghorns. I. N. Olin, city—Pair of Pekin drakes. H. B. Ferguson, city—Pen of barred Plymouth Rocks.

P. Inerworth, Sr., city—Pair of golden sea-bright bantams, and single contest White Leghorns.

John Roger Haynes, city—Pair of black red game bantams. J. P. Kester, city—Pen of black crested red game.

C. H. Finney, city—Pair silver laced Wyandottes, and three barred Plymouth Rocks.

K. H. Stagg, city—Brown Leghorn cockerel, and buff Leghorn pullet. W. Anderson, city—Pen of single contest brown Leghorns.

N. E. Sowers, city—Pen of barred Plymouth Rocks. G. Pratt, city—Pen of barred Plymouth Rocks.

W. A. Lowe, city—Pen of white Plymouth Rock and black Langshans. A. F. Overmann, city—Two pens of barred Plymouth Rocks, brown Leghorn cock, and pair of bronze turkeys.

L. U. Albert, city—Pair of bronze turkeys. Mrs. R. P. Hall, city—Pair of Houdans. G. H. Brown, city—Two pens light Brahmas.

J. F. Luthy, city—Four pens single combed white Leghorns. Geo. Lester, city—Pen of black Leghorns, a pair of bronze turkeys.

Mr. Alger, city—Two pens rose combed white Leghorns. A. E. Bennett, Barr's Station—Pen of silver-laced Wyandottes, black Langshans, light Brahmas, silver-spangled Hamburgs, and pen of Indian game.

E. Chase, Santa Fe—Two pens barred Plymouth Rocks. C. Lowenberg, Pena Blanca—Two pens of barred Plymouth Rocks, pen of white Wyandottes, pair of white turkeys, pair of Pekin ducks.

Ferry Gail, San Marcial—Pen of white Wyandottes. D. McMurdo, Castle Rock, Col.—Pen of white Wyandottes.

J. W. Talcott, Denver—Pen of barred Plymouth Rocks. F. G. Swartz, Summit Poultry yards, Denver—Pen of buff cockins.

Mr. McDowell of Denver offers a silver medal for the best pen of black Langshans, bred and owned by a New Mexico breeder.

Those abroad here in attendance and have fowls on exhibition are as follows: Perry Gail, of San Marcial, president of the association and superintendent of the show; A. E. Bennett, Barr's station; E. Chase, of Santa Fe; C. Lowenberg, of Pena Blanca; D. McMurdo, of Castle Rock, Colo.; P. K. Crabtree and J. W. Talcott, of Denver. Mr. McDowell is expected in the city tomorrow.

The other principal officers of the association, besides Mr. Gail, are A. F. Overmann, secretary, and F. G. Pratt, treasurer.

Tierra Amarilla Grant.

Secretary Smith, of the interior department, has refused to recommend to the department of justice that suit be instituted to set aside the patent to the Tierra Amarilla grant. The grant, comprising 5,515 acres, of which it is claimed, 135,000 is held illegally on account of errors in the north and east boundaries. The grant was confirmed by congress in 1860, surveyed in 1876 and patented in 1881. The secretary takes the position that in order to set aside a patent the proof of fraud must be clear, and cites the supreme court decision in the Maxwell grant case in support of his refusal to make recommendation to the department of justice.

Caught Stealing.

W. E. Cartmill, clerk at Hildesburg, ate his Christmas turkey at Castle Valley, in the city building, where the jail is located. Mr. Cartmill arrived in the city about two months ago from Montana, and being a salesman by profession, accepted a position at Hildesburg. He and another clerk slept in the store, and for the past week articles have been missing. A watch was included, the game spotted, and yesterday morning a warrant was placed in the hands of Marshal Farnoff, resulting in the arrest of Cartmill. He has a wife and three children. He has wired his ill brother in Ohio to the effect that he is in serious trouble, and making a call on the Ohio brother for money. An answer is expected this afternoon.

For Hignamy.

Joseph Evans, who is in the county jail in connection with the sheep stealing case of Elias Garcia, was brought before R. W. D. Bryan, United States commissioner, this morning, charged with bigamy. He waived examination and in default of \$1,000 bail was remanded back to the county jail. The two women, who claim to be his wives, were present. Maria Chavez, who lives near the old town, claims to have been married to Evans by Father Persons in May, 1893, and she has a child about a year old, and which she says belongs to Evans. The other woman, Olympia Garcia, lives in Carmel, and claims she was married to Evans at San Antonio in August, 1894, by the justice of the peace of that precinct.

Mrs. James McCarty, of McCarty's eta, from the Atlanta & Pacific, was in the city yesterday, and stopped at Sturges' European.

B. Alexander, of Socorro, was in the city last night, registered at the European, and left this morning for Santa Fe.

Rev. John B. Brun, of Socorro, came up to the metropolis last night. He has a comfortable room at the European.

Lawyers Clancy and McMillan have gone north on legal business. They will return to the city this evening.

S. W. Young, a prominent gentleman of Bland, Cochiti mining district, is in the city and has his name on the register at the Windsor.

OFFICIAL NOTICE OF THE WORLD'S FAIR AWARD TO

Dr. Price's Cream Baking Powder.

JOHN BOYD THACHER, Chairman of the Executive Committee on Awards at the Columbian Exposition, writing from Washington, D. C., to the Price Baking Powder Company, says:

"I herewith enclose you an official copy of your award, which in due time, will be inscribed in the Diploma, and forwarded to your address, unless otherwise indicated by you."

Thus are the honors awarded Dr. Price's Baking Powder at the World's Fair fully verified.

On the other hand the claims to awards at the Fair by a New York Baking Powder are proven wholly false. Official records show it was not even an exhibitor. Was it because it contained Ammonia?

THE EDUCATORS.

Session Proving Interesting and Very Instructive.

Promptly at 1:30 o'clock yesterday afternoon, the teachers of the Association were in their places ready to listen to the program and enter into any discussion that might be invoked by the several papers that were to be read.

After the opening, Prof. J. A. Wood, of Las Vegas, proceeded to read his paper on "Health in the School Room and the Hygiene of Education," after which a general discussion took place, included in freely by nearly all the teachers present.

The next paper, on "Literature in the School Room," by Prof. E. O. Creighton, of Elly, showed a comprehensive knowledge of the subject by the speaker and represented a vast amount of preparation.

"The Limit of Arithmetic in Academic Work," by Miss M. R. Koeler, of Raton, provoked a very general and animated discussion, the general trend of which seemed to be that more attention should be paid to speed and accuracy in the elementary branches and not so much to the mere mechanical and parrot-like work generally observed where rote work, memorization, bank discount, etc. are taught to young pupils.

Owing to the absence of M. Francis Duff, of Socorro, who was to have read a paper on "Importance of Orthography in School Work," Prof. Hadley, of the University, kindly consented to read his paper, which was very interesting.

He had undoubtedly put a great deal of time on the study of this important "report." While it was generally admitted by those present, that the subject was a very deep one and required a large amount of study to understand thoroughly, nevertheless it was agreed that the "Report of the Committee of Ten" was one of the most important documents ever published in any country on educational matters, and should be adopted wherever possible in the school work of our territory.

Gov. E. K. Stover, being called upon for a few remarks, expressed his pleasure at the zeal and earnestness exhibited
