

PRactical TRAINING.
This is an age of specialists. American enterprise long ago took cognizance of this fact, and the trend of industry and education has been toward individualism and practical special training.

THE SOCIALIST VOTE.
The country will make a mistake if it attempts to ignore the socialist vote in Illinois. In Chicago alone Debs received as many votes as were cast in Kansas City on Tuesday for all candidates, says the Star.

There is only one inference from such a showing. Many people are evidently losing hope of correcting abuses under the present industrial system, and they are ready to go to the extreme of social revolution in order to remedy existing evils.

The great majority of thinking men are agreed that the remedies proposed by socialism would involve the country in troubles far more serious than those that exist today. But the trend of opinion shown in the Debs vote will not be checked so long as present evils are allowed to persist.

THE TERRITORIAL FAIR.
The territorial fair last month was held in this city under the most adverse conditions. Arrangements had been made at heavy expense for a large exhibition and under good circumstances the association would have come out several thousand dollars to the good.

IRRIGATION CONGRESS.
The annual meeting of the irrigation congress will be held this week at El Paso, Texas. This congress is one of the deepest interest to New Mexico and other portions of the great west which are either arid or semi-arid in character.

A GREAT COUNTRY.
A correspondent who has been ruminating on the greatness of the country, exhibited questionably in the campaign literature of the two great political parties, asks for some figures indicating the strides the United States has made from Washington to Roosevelt.

OWNERS OF HOMES.
The twelfth United States census as a whole is a mass of very dry, uninteresting reading, and would never secure a person's attention for one moment unless driven to it by some of the many facts that have been placed there in convenient reference form.

MARRIAGE OF KITTIE.
An evening of healthy and hearty fun may be confidently looked forward to when that brilliant semi-musical comedy, "The Marriage of Kittie," is given here soon. This was the most pronounced comedy success of last season in New York, and in London it ran for 250 performances.

of her homes being owned free, while the District of Columbia shows the opposite extreme in the matter of homes owned free, having a little more than 15 per cent shown as owned free, about 9 per cent mortgaged and 76 per cent rented.

STRIKES AND LOCKOUTS.
From 1851 to 1909 there were in the United States 22,793 strikes, involving 117,509 establishments and throwing 4,165,694 persons out of employment. The duration of each strike was about twenty-three days.

From these figures it will be seen that labor disturbances are more damaging to employments than to the employers. The chances of winning a strike at most are no greater than the chances of losing it.

THE AMERICANS ARE GREAT BANANA EATERS.
Every year we import from 25,000,000 to 30,000,000 bunches of this nutritious fruit, for which we pay between \$7,000,000 and \$8,000,000.

There are full 2,000,000 civil suits of law brought in this country every year. If the plaintiffs were different in every case, one in eight of the voting population could be said to be a litigant.

DEFENSES CANNOT BE CURED.
by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube.

Who is He?
R. C. Garrett, assistant superintendent of the penitentiary, last evening picked up a drunken man from Albuquerque, who was lying in the street at San Antonio, the settlement just south of the penitentiary.
