Horton Tice.

Horton Tice, a native of Phillipsport and for years a resident of this town, died on Friday, March 11th, at Red River City in Taos county, a mining district in the northwestern part of New Mexico, among the Rockies and some eight to nine thousand feet above the sea.

Information of his death was received by Wawarsing Lodge, F. & A. M., of which deceased was a member. As we write no particulars have been received. Mr. Tice's remains were conveyed to Raton, the most accessible point on the Topeka and Santa Fe R. R., for shipment east, and are expected to reach here to-day or to-morrow.

Deceased was born at Phillipsport sixty-two years ago, the son of David and Philona Tice, He enlisted in the war for the Union, serving, we believe, in Col. Van Wyck's Fifty-sixth N. Y. V.; was for a time clerk with the Hornbecks at Wawarsing; later with C. S. Brigham and Chas. Ver Nooy, and for a time in trade for himself at Napanoch; then came to Ellenville and for several years operated the variety store now of L. Francis. About twelve years ago he joined Wiakham and De Lourie Tice in a brick business at Philadelphia, which however did not meet their expectations, and "Hort" adventured in the west, finally settling in mining locality where he died. Engaged in mining and in trade with varying fortune, he is said to have left a little property. Mr. Tice is survived by three brothers and two sisters: Alpha D. Tice, of Wawarsing; Harvey R. Tice, of Ellenville; Theodore Tice, of Phillipsport; Mrs. George Crawford, of Titusville, Pa. and Mrs. Wm. H. Clark, of Ripod, Wisconsin.—The Ellenville Journal, Ellenville, New York On Tuesday, March 23, 1904.

RODEY'S RESOLUTION PASSED

The U. S. Senate—5,000 Copies of Governor Otero's Report and 1,000 Maps to be Printed.

Special to the New Mexican.

Washington, D. C., March 26—The United States Senate yesterday passed the House resolution introduced and pushed by Delegate Rodey for the printing of 5,000 copies of the secretary of the interior for the year ending June 30, 1903, and for the printing of 1,000 additional copies of the new general land office map of New Mexico for distribution by the delegate.

The government printing office will immediately comply with the provisions of the resolution and soon there will be plenty of Governor Otero's report and New Mexico maps for distribution.

It is quite a surprise to many people that all the Democrats of the Supreme Court, should decide in favor of the Northern Security Company, but such was the case.

The Governor's report to the Secretary of the Interior, is on our table and it is full of good words for New Mexico.

The mineral production of the United States for 1903 is very pleasing by experts that 1904 will far exceed 1903.

Gold production \$74,425,340.
Silver do \$30,520,685.

Copper, pounds, 714,250,000.
Lead and Zinc, tons, 156,318.

The "Knockers" at Work.

It looks as if the "knockers" are still hard at work. They insist that Red River has smallpox when all the doctors that have examined the cases, pronounce it not smallpox. It looks on the face of it that we have certain persons in Red River who are trying to injure our camp simply because they cannot rule it. It seems to be a question of rule or ruin, with them. The statement made to Mr. Smithers when he was in town, that there were twelve cases of smallpox at B. J. Young's, was not one word of it true and the party that made the statement knew that it was not true. The whole family with the exception of one, were out in front of the house when Mr. Smithers passed, which of itself gave the statement the lie.

Our Position on Statehood.

The Las Vegas Optic is a little off on the opinion of the editor of the Prospector. The editor believes in single statehood for New Mexico and said so to the Optic editor. We also stated if there was no hope for separate statehood for New Mexico we would take joint statehood but right here we differ with the editor of the Optic for we feel confident that by standing firm we will get single statehood and we are willing to wait at least ten years for single statehood before taking jointure.

We have not for one moment doubted the honesty of Delegate Rodey as we believe no man has ever held the position of delegate and worked so hard for New Mexico in and out of Congress. We agree with Mr. Rodey that there is no hope for single statehood at this session of Congress.

The Democrats of Taos County.

the Democrats held a convention at Taos and elected the following delegates to represent Taos county at the Territorial convention to be held at Silver City, Antonia Joseph, Ojo Caliente; Julian, Martin, Arroyo Honda; Santiago Abreu, Penasco; J. N. Virgil, Talpa, P. O. Lauriano Mares, Taos; P. M. Dolan, Taos; Pablo Gomez, Taos, and Juan Andres Bernal, Costilla.

They passed one resolution endorsing the Kansas City Platform with the exception of the silver plank, thus putting themselves on record against the silver issue and joining the eastern democrats on the money issue.

Cattlemen Opposed to Jointure.

Single Statehood or None Says New Mexico Cattle Growers Association.

Roswell, N. M., March 24—The New Mexico Cattle Growers' Association after a two days session here passed a resolution favoring the national leasing law and passed the following single statehood resolution without a dissenting vote:

"We are unalterably opposed to the union of New Mexico with any other state or territory. That union with Arizona is neither desirable nor practical and that we, the stock-growers of New Mexico representing its taxable interests stand for single statehood or none."

Washington Letter.

The Republican leaders in Congress still take an optimistic view of the possibilities of adjournment. They draw on their feelings for their facts, and do not see why the road will not be clear for getting home in a fortnight or three weeks. A member said to your correspondent this afternoon "We will be home by May 20th." I do not see how they can. The naval appropriation bill has got in the way seriously, and what with amendments and propositions and debate, has delayed the procession for ten days. And now the Indian bill is up. The committees on the labor bills are yet to be heard from. Gardiner in the House and McComas in the Senate are bejeweled with magnificent promises to the labor unions, but these will probably not mature in laws. I do not think that either of these chairmen is bluffing, but the great manufacturing and commercial interests of the country are in the fight to stay, and it is not likely that any eight-hour or anti-injunction bill will do more than barely reach the calendar.

The ship subsidy bill is submerged and though the name of the dead Hanna is, or was, a name to conjure with, it is not likely that it will bring it to the surface this session. The Philippine shipping bills drawn expressly for the benefit of American commerce at the expense of Filipinos, may (therefore?) keep at the front and be enacted into law. Secretary Taft has been violently opposed to these bills and told your correspondent that such a policy would be the robbery of the Filipinos; but it is reported today that he has changed his mind and will withdraw his opposition. Why?

The usual commissioners in

tend to sail for Panama next Tuesday to look over the ground and plan the campaign. They have a gigantic task but will receive all the backing which the President can give. In an open letter addressed to them he expresses his wish that the work be thoroughly and economically done. He declares that there is no politics in it; that he does not know the party affiliations of his appointees; that it is for the benefit of all mankind. He warns the commissioners that they must do the work as well as it can be done or he will find some other engineers to take their place. He also expects all subordinates to be efficient and honest, otherwise they must be "discharged out of hand." Evidently the President looks upon this work as the crowning glory of his administration.

The hearty acquiescence of the Northern Securities Company in the decision of the Supreme Court without further contest, and its haste to comply with the law as interpreted by the distinguished tribunal, pleases and encourages the officers of the government. The company gracefully submits to being disbanded and retires from business, thereby vindicating its assertion that in its organization Mr. Hill intended no violation of the law. Democrats in Congress insist that other great trusts shall be prosecuted with equal vigor, to which the administration responds that they will be attacked as fast as the Attorney-General accumulates evidence on which to base a sufficient indictment.

The Report of Dr. C. R. Bass.

Dr. C. R. Bass of Elizabethtown was here yesterday, and examined the so called smallpox cases in town, as we are all ready to go to press, we will state what he says about the disease: "There is an epidemic in Red River. It resembles to a certain extent variola (smallpox) but all in all it lacks quite a bit, according to my knowledge, of being real smallpox. It does not run the course nor does it leave the marks of that disease."

Photograph and Birds.

A perfect photographic record of the exquisite song of the brown thrush was procured before the American Ornithologists' union by Prof. S. D. Judd. With equal success Dr. Judd has been experimenting with other birds, and his achievements are attracting attention in the scientific world. The educational possibilities of the undertaking are generally conceded. Nature study in schools is just now receiving more attention.

Caustic Alkalies.

The electrolytic production of caustic alkalis and chlorine has proved of the greatest importance to the world of trade. The chlorine produced is used for making bleaching powders which, in turn, has revolutionized the bleaching trade here and abroad.
