

NEW MEXICO-WEST TEXAS FRUIT AND TRUCK GROWERS

Lee D. Martin, Traffic Manager of the Association, Will Talk to Alamogordo People Next Monday

BRANCH OF ASSOCIATION FORMED AT LAS CRUCES

J. M. Walker of Mountain Park is a Director in the Company

The New Mexico-West Texas Fruit and Truck Growers' association has been incorporated under the revised statutes for 1912 of the state of Texas...

A branch of the association was organized at Las Cruces last week with fifty members and it is expected to increase the membership to at least 200.

Among the directors of the association for the first year are Otis L. Williams, Hope, N. M., and J. M. Walker, Mountain Park, N. M.

For those who are interested in having an effective organization to handle our local produce with more system and to a better degree of cooperation, we quote from the articles of incorporation as follows:

New Mexico-West Texas Fruit and Truck Growers' Association. (Incorporated.) State of Texas, County of El Paso.

Know all Men by These Presents: That We, the subscribers, Citizens of States of New Mexico and Texas, under the provisions of Paragraph 48, Art. 1120, Revised Statutes of the State of Texas, of 1912, do hereby form and incorporate ourselves, and such others as may associate themselves with us hereafter, under the terms of this Charter for the protection of ourselves, as farmers in the sale, inspection and proper distribution of our farm and fruit products.

"Art. 1. This Association shall be known as the New Mexico-West Texas Fruit and Truck Growers Association, by which name it shall contract and be contracted, will sue and be sued, and transact all of its business.

"Art. 2. This Association is formed for the purpose of protecting ourselves and associates as farmers and fruit growers under the provisions of Paragraph 48, Article 1120 Revised Statutes of the State of Texas for 1912, in the sale, inspection and distribution of our crop, consisting of all farm and orchard products of every character.

"Art. 3. The business of the association shall be conducted in El Paso, El Paso County, Texas, and its principal office shall be in El Paso, in said County and State.

"Art. 4. The said association shall exist for the period of thirty (30) years.

"Art. 5. The business of the association shall be transacted by and under the supervision of the Board of Directors, said Board to consist of eleven (11) members, who shall be elected by the Stockholders annually, the first Tuesday in August and every following year during the existence of the association. The Board of Directors shall elect a President, a first and second Vice President, a Secretary and Treasurer for a term of one year, and the Board of Directors shall further employ such agents, inspectors, and other employees as may be necessary to carry out the purposes of the association.

"Art. 6. The following named Shareholders are hereby declared Directors for the first year and until their successors are elected: Otis L. Williams, Hope, New Mexico; J. M. Walker, Mountain Park, Otero County, N. M.; James J. Stuart, Mesilla Park, Dona Ana County, N. M.; A. E. Kerr, El Paso, El Paso County, Texas; P. F. Brinck, El Paso, El Paso County, Texas; J. A. Wright, El Paso, El Paso County, Texas.

"Art. 7. The Capital Stock of the Association shall be Ten Thousand Dollars (\$10,000) divided into ten thousand shares of a par value of One Dollar (\$1.00) per share, and this charter shall take effect and be filed with the Secretary of State when the full amount of ten thousand shares have been subscribed, and Five Thousand Dollars for Five Thousand shares have been paid in cash. And it is hereby declared that no individual grower, or other person shall ever become the owner or holder of more than one-tenth of the entire capital stock, and it is further understood, that any section having a corporation or association may not subscribe to exceed the proportion of the acreage of that section to the entire acreage subscribed.

"Art. 8. The members of this Association for the purpose of defraying expenses of maintaining the same, paying inspectors, sale agents, and other expenses of the Association, shall fix such charges as may be necessary, and the charges for the present year for handling all produce and fruits handled by the Association shall be as follows:

Onions, seven cents per crate or fourteen cents per sack; tomatoes, four cents per crate of four baskets; cabbage, ten cents per 100; cucumbers, 10 cents per 100; beets, carrots, ten; potatoes seven cents per box, peaches, plums, prunes, six cents per box of 20 lbs; cantaloupes, ten cents per crate; watermelons, fifteen dollars per car.

"Art. 11. Any sum of money remaining in the treasury, after all the expenses of the season shall have been paid, including ten per cent of the amount of the capital stock actually paid in by the subscribers to the stock of this Association realized for marketing said crops of apples or other crops from the tax imposed in Article 9 of this charter shall be refunded to the growers in proportion to amount paid in by them under the provisions of Article 9 of this charter."

In view of the fact that there is not sufficient truck and fruits grown in any one section or community to justify the employment of a competent sales agent, it therefore should appeal to each and every small district to join in and be a member of the general organization and co-operate with them, to the mutual advantage of all concerned. Hence this organization.

FRIDMANN WILL IMPART SECRET OF HIS CURE

Remedy for Tuberculosis Derived From Turtle Into Which Bacilli Had Been Injected

New York, Feb. 28.—The United States government took official recognition of the claim of Dr. Friedrich P. Friedmann to the discovery of a cure for tuberculosis when, by the order of the surgeon-general, a physician of the United States Marine hospital service, Dr. Milton H. Foster, was sent to meet the young German physician on his arrival here on board the steamship Kronprinzessin Cecilie. At the request of the government surgeon, Dr. Friedmann consented to turn over a quantity of his bacilli to be tested by the government and to demonstrate the efficacy of his cure before the physicians of the hospital service. Dr. Friedmann, who comes to this country at the invitation of Charles E. Finley, a New York banker, who hopes the physician will be able to cure his son-in-law of the disease, declared tonight that his remedy was not a secret and that he proposed to make known "to all the world" the method by which it was created and the manner in which it was administered.

It consisted of bacilli taken from turtles into which the tubercular bacilli from a human being had been injected, he explained.

"I have been working upon the cure for fourteen years and in the last two and one-half years I have treated from 2,500 to 3,000 patients," he asserted.

"How many I have absolutely cured, I cannot estimate, but their number has run into the hundreds. The remedy cures all forms of tuberculosis except such cases as are quite hopeless—that is, on the point of death. The process is a slow one, but the first effects are to be seen two or three weeks after inoculation. The time when an absolute cure can be said to be effected is a matter of months. The methods of administering is 50 per cent of the cure.

"I want all mankind to benefit by my discovery. I already have turned over some of my bacilli to the German government and I am very glad to turn it over to the American government."

Dr. Friedmann denied that he had been offered \$1,000,000 by Mr. Finley if he would cure ninety-five out of one hundred patients in this country. He admitted that he was receiving a "substantial compensation" in the event that he cured the banker's son-in-law, Ray Paris, of this city.

"I am not mercenary," he said. "All I care about is sufficient reward to enable me to demonstrate my cure to the world."

Dr. Friedmann, who is accompanied by an assistant, and a private secretary, was met at the pier by Mr. Finley and taken as his guest to a banquet tonight at the Lotus Club. The surgeon brings a quantity of his bacilli which he expects to administer to the banker's son-in-law tomorrow.

School Entertainments

Seventh grade entertainment to be held March 7th, at the high school auditorium; admission 10 cents.

Senior Class Play, "Why Not, Jim," at the high school auditorium, March 15th. Only 200 tickets will be sold. All seats reserved. Admission 25 cents; reserved seat ticket only. Good music will be furnished between acts.

The principle of free text books for the public schools is in force in several of the progressive states and in many foreign countries and it has never been abandoned where once introduced. It is the surest weapon against the manipulations of the school book trust. It is scarcely to be hoped that the state of New Mexico will adopt such a progressive measure, even though the matter has been placed before it.—Silver City Independent.

ROSWELL-EL PASO ROAD BILL PASSES THE HOUSE

Road to Start From Roswell and Go By Way of Alamogordo and Organ to Las Cruces, Thence El Paso

SPEAKER BACA INTRODUCES STATE MINERALOGIST BILL

Senator Laughren Says There Are Too Many State Institutions

Santa Fe, Feb. 28.—The house has passed Representative Tully's bill appropriating out of the Good Roads Fund the sum of \$300,000 for an automobile road from Hondo through Glencoe, Maralerio, Tularosa, Alamogordo, Las Cruces and thence to El Paso, this being a link in the Borderland route. There was no opposition to this bill, it passing the house by a vote of 40 to 0. What the senate will do with this bill is problematical, and should the senate stamp its approval on it, it is not uncertain that the governor's veto will be affixed to it, although this latter is but the opinion of two or three outsiders who have no way of knowing the truth. Of course, this appropriation only serves to call the attention of the good roads commission to the desire of the legislature when they appropriate the funds which we hope will be in the fund some sweet day.

House Bill No. 133, introduced by Representative Tully, February 6, 1913.

Be it enacted by the legislature of the state of New Mexico:

Section 1. There is hereby created a state highway, to start from the west end of Second street, in the town of Roswell, at the corporate limits, thence by the county road of Chaves and Lincoln counties to Pecos Post Office; thence by way of the Post Office of Tularosa, the Hondo Crossing of the Rio Grande, and the Post Office to Ruidoso Post Office in Lincoln County; thence via Mesalero and Bent to Tularosa and Alamogordo in Otero County; thence by the most feasible and practical line to the Post Office of Organ and the Town of Las Cruces in Dona Ana County, there to connect with the Camino Real System of State Highways.

Section 2. The location, construction, repair and maintenance of said state highway shall be done under the authority and control of the State Highway Commission, and out of the proceeds of the sale of bonds as provided in the Act entitled: "An Act providing for the issuance of bonds by the State of New Mexico, for the purpose of constructing and maintaining a system of state highways," approved June 10, 1912, and known and cited as the State Highway Bond Act, or in any other and subject to the disposal of the State Highway Commission. There is hereby specifically appropriated the sum of thirty (30) thousand dollars, to be expended according to the provisions of Section 4 of said State Highway Bond Act, said sum to be apportioned along the line of said state highway among the said three counties according to the provisions of Section 4 of said Act.

Section 3. It is hereby stated that this Act is necessary for the preservation of the public peace, health and safety, and shall therefore take effect immediately upon its passage and approval.

The bill introduced in the house by Speaker Baca proposing to establish the office of state mineralogist is receiving considerable attention from the mining men over the state, and wherein it looked a few days ago that the bill was a dead one, it now seems to have taken on new life and the chances of its passing the house are good. It is understood the School of Mines at Socorro believes this bill unnecessary, as this school is in a position to take care of all the work proposed by the bill, and some of the managers of the big coal companies are not looking on the bill with favor because it puts a straight tax of one cent per ton on the output of their mines. The real facts are that this bill, if passed, would be of inestimable benefit to our state. There is no doubt that the surface of New Mexico covers untold mineral wealth, and this properly looked after, and developed, and the results tabulated for reference, would soon entice mining capital into our borders. The trouble with our state now is that it has no official geologist whose duty it is to look after this much neglected industry, and inquiries from the outside world must go unanswered, or some private citizen must take care of them. Even then, many receive no attention. The governors of the territory and state have had hundreds upon hundreds of such inquiries, which have of necessity been turned over to the school of mines, and this institution, or its head, have been compelled to use his private time and funds to give the information desired, however inadequate it may have been because of so little development work and so little data on the conditions existing in the various por-

tions of the state. It may not be known generally, but it is nevertheless a fact that a company is now mining at a profit at Orogrande, in our county. The merest chance located these mining men at this point. The revolution in Mexico forced a great many mining men to suspend operations there, and some of them by accident heard of what was supposed to be a fair claim at Orogrande; they investigated, decided to take hold and they are now making good, shipping from two to three cars of ore each day. They are spreading out and soon the output will be greatly enlarged. This is but an example of what might be done all over the state if reliable information as to mining conditions, such as would be the duty of a state mineralogist to furnish, were available.

Senator Laughren has thrown a loud-explosive bomb into the state educational institutions by his bill proposing to combine them all into one institution, to be located wherever the legislature wants it. He believes we are spreading out too much and covering the ground too thinly. With one institution to be known as the state university, with branches for the normal work and all her educational divisions to be subsidized by the state, far better work could be done and at a considerably less outlay, although in reality a much larger appropriation could be made for the maintenance of the school. This bill has considerable merit and common sense wrapped up in it, although it will not meet with undue praise from some portions of the state. This bill, if it should become a law, would not effect the Board Institute.

The submission of a constitutional amendment for state wide prohibition to the people at the next general election in November is the object of senate joint resolution No. 15 by Messrs. Holt and Romero introduced Tuesday afternoon.

The resolution submitted embodies the prohibition restrictions advocated by the white ribboners of New Mexico and it is said that a petition bearing 17,000 signatures will be presented to the legislature in favor of the adoption of the resolution. The resolution in full is as follows:

SENATE JOINT RESOLUTION NO. 15

Proposing an amendment to the constitution of the state of New Mexico, prohibiting the manufacture, sale, keeping for sale of beverages containing alcohol, except in certain specified cases.

Be it resolved by the senate, the senate concurring, that there be submitted to the electors of the state of New Mexico, at the next regular election held in November, one thousand, nine hundred and fourteen, in said state, the proposed amendment hereinafter set forth, which shall be valid to all intents and purposes as a part of the constitution of the state of New Mexico, when ratified by a majority of the electors voting thereon. After the last article add a new article, amending the constitution as follows:

"Section 1. The sale, manufacture for sale, keeping for sale, barter, giving away or otherwise furnishing of any malt, vinous or spirituous liquors, wine, beer, ale, porter, or any intoxicating drink, mixture or preparation is forever prohibited in the state of New Mexico on and after the first day of July, one thousand, nine hundred and fifteen, except for medicinal, scientific, mechanical and sacramental purposes."

"Section 2. The legislature shall, without delay, enact such laws, with regulations, conditions, securities and penalties as may be necessary to enforce the provisions of this article."

MOUNTAIN ROAD IS NEARLY COMPLETED

A Stretch of Mountain Highway Comparable With Any in Colorado

The Highrolls-Alamogordo mountain road, the construction of which the state of New Mexico has aided, will be completed so far as grading, in about two weeks.

After the grading is finished there will remain some finishing touches, in the way of completing and placing culverts and the placing of several miles of iron railing along dangerous canons.

This road will shorten the distance to Mountain Park and Highrolls about six miles, but as it is much more passable that it has been estimated that between the old route and the new road the equivalent comparison will not be less than ten miles.

A man who passed over the new road a short time ago stated that the road was equal to any piece of road that could be shown in the state of Colorado.

The public will watch with interest the results of the change made recently in the method of handling the county funds for road construction. This until last September rested with the county commissioners, and the results, taking the state as a whole, could scarcely have been considered satisfactory. Now the money available for road building is being spent by a committee of three men in each county who serve without pay and who are known as the county road board.—Silver City Independent.

TELEPHONE LINE FROM CLOUDCROFT TO MAYHILL

Ranchmen of James Canon Have Lately Organized and Will Put the Line in Active Operation

C. A. REDIC OF CLOUDCROFT PRESIDENT OF ORGANIZATION

Movement on Foot to Connect With Mountain States Line

A number of people met in Cloudcroft last Saturday who are interested in a projected telephone line from Cloudcroft to Mayhill. The line will be about twenty miles in length and will run down James Canon and connect the ranches and farms along the line.

C. A. Redic, of Cloudcroft, is president of the organization and being an old telephone man he is capable of avoiding some of the pitfalls a local company might encounter. There are about twenty-five men interested in the enterprise, the prime movers being C. A. Redic, Eli Moser, Pink Hixson, Jack Popsy and R. S. Tipton.

Negotiations are being made with the Mt. States Tel. and Tel. company to connect at Cloudcroft with the long distance line. Another meeting will be held in Cloudcroft on March 1st when it is expected the organization will be completed and arrangements made to start the work of construction at once.

Texas Wins Boundary Dispute.

Washington, D. C., Feb. 28.—The report of the commission on the boundary dispute between Texas and New Mexico signed and formally approved by President Taft last week, is a victory in favor of Texas' contention that the present line of the 103d meridian and 32d parallel is the right boundary. The line claimed by Texas as the present boundary is therefore declared to be the true boundary on the east and south lines of New Mexico. This decision settles for all time the dispute between the two states that has existed for 50 years. The line was run in 1858 and was known as the Clark boundary.

Will Store Water by 1915.

Water will be stored at the Elephant Butte dam by 1915. Supervising engineer Louis C. Hill said so Monday morning when he returned from the dam. Discussing the work Mr. Hill said: "Work is going on at a lively rate at the dam. They will have at least 200 feet cleared from the west end early next month and will start concrete work early in April. They will begin to store water in 1915. However, that does not mean that the dam will be entirely finished by that time."

Albuquerque Wants Friedmann.

Albuquerque, N. M., Feb. 28.—Carrying a special invitation from the Albuquerque Commercial club, Dr. J. M. Clipes of this city left last week for New York City, where he goes to meet Dr. Friedrich P. Friedmann of Berlin on his arrival in the United States and urge him to come to Albuquerque to carry on experiments with his reported cure for tuberculosis. The Albuquerque commercial club will provide for Dr. Friedmann with a hospital and every other facility for continuing his work. There are now in this city victims of the great white plague who are suffering from tuberculosis in all of its known stages.

Everything now points to the immediate development of the oil and gas resources of the Dayton country. Companies already in the field are rushing the work and new companies are coming.—Dayton Informer.

Death claimed one of Lincoln county's old and highly respected citizens, when C. G. (Doc) Roberts passed into the great beyond. Mr. Roberts had not been in good health for a number of years, and suffered the past two months from Bright's disease. He died at the home of his daughter here, Mrs. Harry Edmiston, Sunday night.—Carriazo News.

The basket ball team of the high school returned home the first of the week after participating in a three day tournament at El Paso. The boys did not bring any slaps but may have better success the next time.

Scott B. Williams was a visitor from Cloudcroft Thursday.

The fire department was called out in response to a call from the county jail. The trouble was a defective stove.

Word came from Washington the first of the week that a number of suits against the Alamogordo Lumber company had been dismissed by the government. These suits were brought about five years ago against the company on account of timber land holdings. The exact import of the matter the News-Advertiser is not able to ascertain at the present time but will try and get the information.

amount of water as surface irrigation. If the demonstration proved to be a success and sufficient acreage would be guaranteed, this system can be installed complete for about \$25 per acre.

The J. L. Crossley farm, three quarters of a mile from Moriarty, has been selected as the best place to demonstrate what can be done. The subscriptions will be used only to buy the material, provided the company does not donate it, pay the freight and install same. Mr. Crossley will be placed under bond to keep sufficient water in the pipes and see that the crop of diversified products receives the proper attention.

No More Drinking Glasses.

After March 1st the Pullman Car company will not furnish glasses on any of its cars in the United States, with the exception that they will be furnished as part of the equipment in drawing rooms and state rooms. People riding on Pullmans will be required to furnish glasses or cups for drinking purposes. The new rule is a federal regulation and will be strictly complied with by Pullman people. The measure is a sanitary one.

SALARY BILL PASSES AT SANTA FE

It is Now Up to the Governor to Either Veto or Approve the Bill

Santa Fe, Feb. 28.—The house last Monday, acting under suspension of the rules, passed senate bill 104, the county salaries bill, by a vote of 39 to 13, or more than two-thirds the measure was in the house less than ten minutes before it was reported back to the senate, as having been passed. The vote upon the suspension of the rules was unanimous, 39 to 0. It was then proposed that several amendments be included, but the house voted down each one and passed the bill as it was pushed through the senate last Friday.

The votes as they stand in the two houses, 29 to 4 in the senate last Friday, and 39 to 13 in the house Monday, indicate that the legislators will be able to pass the measure over the executive veto if they so desire, providing of course that the governor vetoes the bill.

Cloudercroft News Notes.

Cloudercroft, Feb. 28.—T. V. Dykes and family of Kingsland, Arkansas, are in Cloudercroft and will no doubt locate here. They lived here several years ago.

Dr. Alderson of Iowa was a recent visitor in Cloudercroft.

Miss Ollie Thomason has been selected to teach the James Canon school which begins April 1st.

Scott B. Williams, of the firm of Williams & York, is spending several days in Alamogordo and El Paso in the interest of the firm.

Professor White of Mt. Park was a recent visitor in Cloudercroft.

Mr. and Mrs. J. W. Belk were recently in Cloudercroft.

Lee Wright of Weed made a business trip to Cloudercroft recently.

Rev. H. L. Wheeler of Tularosa is in Cloudercroft.

Work has been finished in rebuilding for about one-half mile the track of the Alamogordo & Sacramento railroad operating between Cloudercroft and this city. The work was made necessary by the encroachments of the arroyo upon the roadbed. The track was moved nearer the mountains, on the side of the canyon.

Jim A. Alexander of El Paso stopped over Thursday on his way to Cloudercroft.

Mr. and Mrs. C. F. Knight of Cloudercroft were in town visiting friends this week.

J. L. Lawson left Thursday evening for a few days business trip to Santa Fe.

Died—Tuesday, Feb. 25, the few days old baby of Mr. and Mrs. G. W. Van Dyke.

G. J. WOLFINGER Men's Furnishings

Outside of the large cities you would not find as large and up-to-date an assortment of Furnishings as we show.

In Men's Hats we can show the very latest styles and colors, as well as the staple shapes, at all prices.

"Walk and Talk" men's

Pants are displayed in our window; they represent the new styles for Spring and are hard to beat.

Shoes for the whole family. We have them for each member of the family, from Baby to Father and Mother, in all Styles, Colors and Prices.

For Simple but Tasteful Styles

Standard Fashion Sheet

March number now ready and Free at our Pattern Counter.

Shoes for the whole family. We have them for each member of the family, from Baby to Father and Mother, in all Styles, Colors and Prices.
