

WATCH CAREFULLY THE CHILD'S DIET

Start Them Off Right With a Good Laxative and Then Watch Their Food.

Mothers are often unconsciously very careless about the diet of their children forcing on them the same foods. The fact is that all foods do not agree alike with different persons. Hence, avoid what seems to constitute the child or to give it indigestion, and urge it to take more of what is quickly digested.

If the child shows a tendency to constipation it should immediately be given a mild laxative to help the bowels. By this is not meant a physic or purgative, for these should never be given to children, nor anything like salts, pills, etc. What the child requires is simply a small dose of the gentlest of medicines, such as Dr. Caldwell's Syrup Pepsin, which, in the opinion of thousands of watchful mothers, is the ideal remedy for any child showing a tendency to constipation. So many things can happen to a constipated child that care is necessary. Colds, piles, headaches, sleeplessness, and many other annoyances that children should not have can usually be traced to constipation.

RALPH M. PATTEN

Four wonders for her boy Ralph, who was constipated from birth but is now doing fine. Naturally she is enthusiastic about it and wants other mothers to use it. Dr. Caldwell's Syrup Pepsin is sold by druggists at fifty cents and one dollar a bottle, the latter size being bought by those who already know its value, and it contains proportionately more.

Everyone likes Syrup Pepsin as it is very pleasant to the taste. It is also mild and non-gripping and free from injurious ingredients.

Families wishing to try a free sample bottle can obtain it postpaid by addressing Dr. W. B. Caldwell, 418 Washington St., Monticello, Ill. A postal card with your name and address on it will do.

EAST LAS VEGAS IS INDIFFERENT ON CITY ELECTION

Nobody Out for Job of Mayor. In Old Town Across the River Lively Time is Anticipated.

[Special Correspondence to the Herald] East Las Vegas, N. M., March 5.—In East Las Vegas politics apparently is dead, and little interest is being taken in the coming city election. Prominent Democrats and Republicans have declared, upon being asked, that no plans had been made for the municipal campaign. A rumor was circulated for a time that Patrick D. McElroy, chairman of the city Democratic committee, would run for mayor, but Mr. McElroy emphatically denied it. If anybody is anxious to run

for mayor he has failed to let it be known, though the city committee likely will have some announcement before long.

On the west side the condition is different. Margarito Romero, a member of the last constitutional convention, is reported to be about to announce himself as a mayoral candidate upon a citizens' ticket. Prominent Republicans declare that Lorenzo Delgado, the present mayor of the town of Las Vegas, will be nominated to succeed himself. Mr. Delgado has made an excellent mayor. Under his administration the old town has been kept spotlessly clean and the streets have been improved. Mr. Delgado was one of the originators and boosters for the bridge street paving. He has a host of friends and there is no reason why he should not poll the full Republican vote.

Mr. Romero is extensively acquainted and has a large number of personal friends, but it is regarded as doubtful whether his personal popularity would be sufficient to induce his friends to scratch the Republican ticket for him. As is well known, the west side is almost unanimously Republican. A race between Mr. Romero and Mr. Delgado would be interesting, as neither is a man who does things by halves. The west side folk would be sure to have plenty of excitement during the campaign.

TODAY'S LIVE NEWS OF SUNSHINE STATE

BIG ACREAGE GOING INTO ORCHARD ON THE PECOS

One Company Planting 580 Acres of Young Trees and Probably 600 Acres Additional Will be Set Out

Roswell, N. M., March 5.—A total of 580 acres of its South Springs orchard project are to be put into young orchard this month by the Pecos Valley Investment company.

The contract for the work has just been let to the Roswell Nursery company and Manager Wyatt Johnson of the latter firm put a force of men to work on the job yesterday. This force is to be augmented during the next few days so as to make it possible to set from 50 to 50 acres per day until the entire 580 acres have been planted.

On the 580 acres a total of 25,000 apple, 2,000 peach and 350 cherry trees are to be set. The peach and cherry trees are to be used as fillers. With this job completed the Pecos Valley Investment company will have a total of 780 acres of young orchards on its project there. Two hundred acres were set to apples two years ago and the young trees are said to be in excellent condition, an evidence that the entire project is being carefully handled and cultivated.

The owners of the project have also planned other improvements to be made during the current year, not the least of which will be the construction of a fine residence on the project for the resident manager, Melville H. Summers. This building is to cost in the neighborhood of \$4,000.

This project will be remembered as being irrigated by means of underground conduits and is regarded as one of the best development projects in the entire valley.

In addition to this 580-acre tract of young orchard, it is estimated that possibly 600 acres will be set to young apple trees in the Roswell section of the valley this spring. The Roswell Nursery company has contracts ahead to make it necessary to set at least 30 acres per day during the remainder of this month and a large acreage has already been planted this spring on the Berredo. On the latter project one tract of 150 acres has been planted for C. J. Trees of Pittsburgh, Pa., while the remainder is represented in ten and 20-acre tracts.

Will Be Banner Year. "From what I can learn," said a well known fruit man this morning, "this will be one of the banner years for the setting of young orchards in the Pecos valley. There is certain to be at least 1,200 acres set right around Roswell before the planting ceases and reports from other points in the valley indicate that they are doing a lot of planting in nearly every section."

Apple wood is the favorite material for ordinary saw handles, and some goes into so-called briar pipes. New Jersey has a timbered area of about two million acres, on which the timber is worth about \$8,500,000 on the stump. It is mainly valuable for cordwood.

WORDS OF PRAISE

For Mayr's Wonderful Stomach Remedy.

"How thankful we are to you for getting a hold of your wonderful Remedy. My wife could not have had but a short time to live if she had not taken your Wonderful Remedy when she did. One more of those paroxysm pains she was having would have killed her without a doubt. Now she is free from all pain, free from heart trouble and free from that disturbing Neuralgia—all the results of five treatments—and the expulsion of five or six hundred Gall stones. Now she is able to eat anything she wants and her appetite is good and before taking your medicine she had no appetite and when she ate anything she would suffer death for so going and could not sleep at night, since taking your treatment she sleeps well at night long T. A. NEALL, Rossmore, Texas."

The above letter should convince you more than anything we could say in behalf of Mayr's Wonderful Stomach Remedy. Sufferers should try one dose of this Remedy—one dose should convince them that they can be restored to health. Nearly all Stomach Ailments are caused by the closing of the intestinal tract, with mucus and catarrhal secretions, allowing poisonous fluids into the stomach and otherwise deranging the digestive system. Mayr's Wonderful Stomach Remedy painlessly removes these accretions without a surgical operation and puts an end to Colic, Attacks, Gases in the Stomach and Intestines and all of the usual symptoms of Stomach, Liver and Intestinal Ailments. Ask your druggist about Mayr's Wonderful Stomach Remedy or send to Geo. H. Mayr, Mfg. Chemist, 154 Wellington St., Chicago, Ill., for free booklet on Stomach Ailments and many grateful letters from people who have been restored.

For sale in Albuquerque by Bull's Eye, and druggists everywhere.

CASA GRANDE RUINS TO BE THOROUGHLY EXPLORED

Senator Ashurst of Arizona Introduces Measure to Provide for Scientific Study of Prehistoric Buildings.

Tucson, N. M., March 6.—A bill has been introduced in congress by United States Senator Henry F. Ashurst of Arizona, making an appropriation for the exploration and preservation of the Casa Grande ruins, which are a short automobile journey west of this city. All automobile tourists who come through Tucson by the Borderland route on their way to the Panama-Pacific exposition at San Francisco next year should make it a point to visit these famous ruins.

It is to be doubted that there are traces of an older civilization within the United States than that they represented. The people who lived in the Great House, as it is translated, or the Tot House, as it is more properly known, had gone before the Spaniards came up through Mexico into the country that is now Arizona.

It is hoped by a thorough exploration of the ruins, which are in a fair state of preservation, to learn more about this mysterious race. Samples of their property and weapons, already unearthed, and now preserved in museums, tend to indicate that they had no mean order of civilization. There are no Indians living in Arizona today that could have had sufficient skill or sufficient ambition to build such high, solid and shapely walls.

That the Casa Grande was the site of a city of great commonwealth is a fair deduction. Outlines of other towns of the same period are found in other parts of southern Arizona, some of them within a few miles of Tucson, and throughout the southwest generally. They may be traced by their foundations on Tumacacillo hill west of Tucson, and among the foothills of the Santa Catalina mountains to the north.

W. E. Barnes, a railroad man, who is fast acquiring fame as an archaeologist, started the movement to have these ruins explored.

BUSINESS MEN OF RATON SUPPORT REGULATION

Take Prompt Action to Prevent Reconsideration of Action Revoking Three Saloon Licenses.

[Special Correspondence to the Herald] Raton, N. M., March 5.—At the meeting of the Business Men's association held last night, it was developed that the business and professional men of Raton are vigorously against the reconsideration by the city council of the action which deprived three Raton saloon men of the right to sell liquor during the year 1914. At the same time, there was a strong criticism of the action of the city administration in permitting these saloons to continue to operate after their licenses had been denied and instructions had been given the city marshal to see that these places were closed at noon of the day following the council's action.

On a vote taken at the close of the lively discussion this subject aroused, every man present supported a resolution of protest against the reopening of this matter by the council, and pledged himself to appear in person before the council at its next sitting, together with such other persons as he could get to accompany him, for the purpose of making this protest effective. From the temper of the meeting it was expected that a very considerable portion, probably close to 90 per cent, of our representative men heartily approve the first action taken by the council whereby three saloons were eliminated and the licenses raised on the rest to save the city from loss of revenue.

The residence of Joe H. Taylor, located two blocks east of the Oklahoma store in Srinatowas, was almost totally destroyed by fire Sunday morning, at about 1:30 o'clock, Mr. Taylor being absent on a visit to his ranch on the mesa at the time. The fire is supposed to have started from spontaneous combustion in a clothes closet.

The Santa Fe working crew, that has been at Cimarron for the past two weeks loading material from the abandoned Rocky Mountain shops, returned to Raton last evening after completing the loading of 60 carloads of material that will be stored at the Raton, La Junta and Topeka shops.

It is a good deal easier to save a dollar by taking advantage of the Clearance Sale of shoes than it is to make this amount by hard work. We have reduced our regular price from 25 to 20 per cent and it will pay you to buy in a supply of footwear for future use after providing for present wants. C. May's shoe store, 214 West Central avenue.

OIL DRILLERS AT CARLSBAD FORCED TO TRY NEW HOLE

Prospectors of Carlsbad Oil and Gas Company Have Serious Trouble With Loss of Tools.

[Special Correspondence to the Herald] Carlsbad, N. M., March 5.—Drillers on the oil lands of the Carlsbad Oil and Gas company, the property of Albuquerque and Pennsylvania men, are having their troubles in getting a hole into the ground. Some time ago the drill stem broke and the bit hung. It was necessary to ease to get the bit out. A few days ago the new drill stem was in place and 15-inch casing going into the hole and everyone was happy. It would be easy to get the bit out. But it hung. So they drove the casing down over the bit and turned the big engine loose to pull casing and all. But the casing parted at the first joint. Without further fuss they just pulled up and moved derrick, engine, machinery and all to a new location in record time of three days. Drilling on a new hole began this afternoon. A large delegation from town went out to see the drill go into the ground.

IMPORTANT CIVIL SUIT AT LAS CRUCES

Judge Pope Expects to Wind Up Session There Today and Come to Albuquerque.

[Special Correspondence to the Herald] Las Cruces, N. M., March 4.—The case of Horace C. Longwell vs. James T. Hall, a civil suit involving the ownership of an extensive tract of land south of here in the lower valley, is occupying the attention of the special term of the United States district court. Judge William H. Pope is presiding and a formidable array of counsel is representing the parties to the suit. It is expected that the introduction of evidence will be concluded by tomorrow when the court expects to adjourn and proceed to Albuquerque, where a special session will be held.

ACTUAL DRILLING FOR OIL TO START AT WAGON MOUND

[Special Correspondence to the Herald] Wagon Mound, N. M., March 5.—Following the rumors heard last week it is learned definitely here today that Levy and Nolan, oil men from Sapulpa, Okla. field, have secured leases upon those 12,000 acres of land in the immediate vicinity where gas has been encountered and that they expect to have a drill rig on the ground in the immediate future.

The leases are for a period of three years' time and provide that if oil or gas is discovered the owner of the land is to get one-eighth of the proceeds from its sale.

Canada has a society of forest engineers. Dr. R. E. Fernow, of Toronto, is president, and Mr. F. W. H. Jacombe, of Ottawa, is secretary.

PECOS VALLEY FAIR CARLSBAD HAS MORE TO BE ORGANIZED AT ROSWELL

Stock Company of Citizens Proposes to Make Southwestern Exhibition Permanent Institution.

[Special Correspondence to the Herald] Roswell, N. M., March 4.—Business men of Roswell are to hold a meeting in the commercial club Thursday night for the purpose of organizing the Pecos Valley Fair association and to make the fair which has been held each fall for several years past a permanent institution and to place it on a business basis.

Just what plan will be used is questionable. It is hoped that all the towns of the valley will cooperate in making it a fair worth while from year to year.

One proposition is to organize a stock company and charge admission, and make the amusement feature worth while. If this is done not only Roswell men, but citizens from the other towns of the valley will be stockholders.

REMAINS OF FORD CAR RESCUED FROM THE RIO PUERCO

[Special Correspondence to the Herald] Eden, N. M., March 6.—D. D. Cox and Billy Koenneke have brought to town what is left of Ben Cook's Ford automobile, which was lost in the Rio Puerco some two weeks ago. The remains of the machine were found about a mile and a half down the stream from where the auto was swallowed up by the quicksand. The spokes of the rear wheels were broken on off right across the hub. The whole car was buried all out of shape, and hardly worth the salvage. The condition of the car shows the force of the water and sand in its rush and tumble down the stream.

CARLSBAD HAS MORE WATER THAN IT CAN HANDLE

Pecos not only Supplies Every Need of Project But Could Irrigate Double the Acreage

[Special Correspondence to the Herald] Carlsbad, N. M., March 4.—The survey of the Pecos watershed by the government is being generally discussed and what to do with the water is the problem. The construction of the south canal of the Carlsbad project will also increase the actual available water supply. Inside the present limit of the project are only scattered small areas without water. Hence nearly all the surplus water belonging to the project must either be lost or else provided for applying it to lands south of Black river. The Pecos Irrigation company owns several thousand acres of land there, possibly 5,000 acres are in the hands of small growers, and the state has around 20,000 acres in the facility. The building of the third reservoir at Seven Rivers would supply the entire area through the present south canal if carried across Black river to the state line as originally contemplated. Below this are several reservoir sites that would be enough to take care of the Texas part of the valley. According to the contract with the government made at the time it bought the plant from the old company, the Pecos Irrigation company is entitled to water for their lands south of Black river when water is available. But this company is anxious for the greatest possible development and wants all irrigable land in the district included in case of further water development. The president, Francis G. Tracey, has called the attention of the state land department to the situation. In case the state lands could be watered south of Black river it would add much to their value and help the school fund of the state.

FOUR NEW SCHOOLS TO BE BUILT IN SANTA FE COUNTY

[Special Correspondence to the Herald] Santa Fe, N. M., March 5.—Southwestern Santa Fe county will soon be dotted with four new, up-to-date school buildings—Venus, Bachelor, Fair View and Hyer. These districts have bonded one dollar for every acre given by the state. The people in the whole north and northwest counties are to be congratulated upon their willingness to help and upon the class of directors on the different boards, for while it means work for every-

body, the directors will be required to put in considerable time besides the actual work done on the buildings.

These people have come to stay. They belong to the best class of home-owners and are anxious to give their children at least a common school education. New Mexico should be proud of these citizens and of the coming generation.

Chronic Stomach Trouble Cured. There is nothing more discouraging than a chronic disorder of the stomach. It is not surprising that many suffer for years with such an ailment when a permanent cure is within their reach and may be had for a trifle. "About one year ago," says E. H. Beck, of Wakelee, Mich., "I bought a package of Chamberlain's Tablets, and since using them I have felt perfectly well. I had previously used any number of different medicines, but none of them were of any lasting benefit." For sale by all druggists.

Canada has 23 million acres in timber reserves as compared with 147 million acres in the national forests of the United States.

Yell Defiance at Blood Disorders

A Remedy That Has Shown a Most Remarkable Purifying Effect.

At Last You Can Get Rid of Blood Troubles—E. S. S.

The word Medicine is one of the most abused in our language. There are certain medicinal properties just as necessary to health as the food we eat. Take, for example, the well-known medicine E. S. S. This famous blood purifier contains medicinal compounds just as vital and essential to healthy blood as the elements of wheat, oat, beef, the fat and 143 sugars that make up our daily ration. As a matter of fact, there is no improvement in E. S. S. which secures the entire purpose of withdrawing each cellular part of the body to the healthy and judicious selection of its own essential nutriment. That is why it permeates the blood rapidly, why it has such a tremendous influence in overcoming Rheumatism, Catarrh of the Stomach and Intestines, skin eruptions, and all blood troubles. Get a bottle of E. S. S. at any drug store, and in a few days you will not only feel better and stronger, but you will be the picture of new life. E. S. S. is prepared only in the laboratory of The Swift Specific Co., 211 Swift Bldg., Atlanta, Ga., who maintain a very efficient medical department where all who have any blood trouble, or a stubborn nature may consult freely. E. S. S. is sold everywhere by drug stores, chemists and general stores. Don't permit anyone to sell you a substitute. Insist upon E. S. S.
