NEW ARMOR-PIERCING BULLET BEING GIVEN TEST AT SANDY HOOK PLEASES OFFICERS

Army Men are Enthusiastic Over Results; Is of Only .30 Caliber and Can be Fired from Regulation Army Springfield.

PLOUGH THROUGH SHEET OF THREE-QUARTER STEEL

Will Pierce from Ten to Twenty Men Standing in Row, Is Believed; Would be Effective Against Famous British Tanks.

[By Evening Herald Special Wire] New York, Oct. 24.—Army officers who have observed the tests of the new armor-piercing bullet now in progress at the Sandy Hook proving grounds are enthusiastic over their results. The bullet is of only .30 caliber and can be fired from the regulation Army Springfield rifle. At a distance of 1,000 yards the projectile pierced through a sheet of steel three-quarters of an inch thick and then penetrated a 1 1/2-inch plate placed behind the steel plate. It is believed that one of the new bullets could be fired from the new rifle from ten to twenty men standing in a row.

The bullet was fired with a piece of steel channel in front which acts as a rifling when the bullet strikes steel and three other penetration. The projectile which passed through the plate is now being tested with a 1 1/2-inch plate. It is pointed out that the great value of the bullet will be against armor plating in tanks and against troops hiding in houses or behind other structures. This officer said they would be of service against the armaments of war as the new rifle is being used by the British on the Somme.

“By Their Fruits Ye Shall Know Them”

Hubbell dominated Bernalillo county for years. What progress did the county make under that regime? Did Hubbell make any effort to convert the county offices into models of honesty and efficiency? Is it not a fact that our roads were in a deplorable shape and that little or nothing was done to improve them? Was he always alert, as superintendent of public instruction, to improve the school system of the county? Were teachers selected after competitive examinations, or were the schools used to pay political debts without any particular regard to the fitness of the teachers? Did he lower the taxes and make living conditions better for the native people in the rural districts? How many school houses was he instrumental in having built? Did he, eighteen days after the passage of the Springer bill in 1901, draw from the treasury of Bernalillo county pay for 135 days visiting schools, at \$5 a day, or a total of \$675? Did he, 106 days after the payment of this bill, present another one for a like amount for visiting schools and receive payment therefor? Did he, about 100 days after the payment of this second bill, present a third one for the same amount and receive the money therefor? Did he, during a period of about 225 days, receive payment for 105 days' visiting schools? Was it not common talk that the man who did not support Hubbellism would always find his taxes higher than those of men who were lined up on the side of the boss? Did Hubbell stand for a free and honest ballot? Were voters allowed, under his reign, to express their wills at the polls? Did Hubbell stand for a government of, for and by the people? Does Hubbell's record as a public official in Bernalillo county indicate that he is a fit man to send to the United States senate? Has Hubbell ever demonstrated in any manner that he is the kind of man the people of New Mexico should have to represent them in the highest lawmaking body in the land? Would Hubbell, if sent to the senate, discharge his duties there in the same manner he discharged them as a public official in Bernalillo county? In short, what reason have the people for believing that Hubbell has changed any of recent years; that he has repented and promised to lead a more upright political life? "By their fruits ye shall know them."
