

SHE IS TO WED A BARONET. An Actress Who Was Educated in Maryland the Bride.

SHE IS BEFORE THE FOOT LIGHTS.

The Marriage Will be Consummated on the 11th of November.

NEW YORK, Sept. 9.—The coming marriage of a soubrette in Thomas E. Murray's "Our Irish Visitors" company to a wealthy English baronet has occasioned no end of talk in theatrical circles during the past few days.

During her life here her parents died, leaving her all their possessions, which were turned into an annual income for her. When she reached her eighteenth year it was found that convent life was telling on her health, which was rather delicate, and she left, going for a vacation to Europe.

Acquaintance soon ripened into love, and when Miss Guerand returned to this country a warm correspondence was begun and steadily kept up.

It was only with the proviso, however, that it should be her last professional engagement. The marriage will, it is said, take place in Philadelphia on November 11th, upon which date Miss Guerand will have attained her twentieth year.

THE TROUBLE NOT ENDED. Two Members Dissent from Verdict of Jury—Three Jurymen Criticize One for His Action.

ST. PETERSBURG, N. C., Sept. 8th, 1891.—There has been considerable stir in our city this week over a card being handed about here by three members of the late coroner's jury. It was brought out by the statement that the verdict of the jury

was not final as to anything. They claim that Mr. Williams signed the verdict without dissent, and after signing the verdict had himself reported in the Landmark as dissenting, when in fact no one but Mr. J. S. Ramsey dissented.

Copy of the Card Issued. A CORRECT STATEMENT AS TO M. C. WILLIAMS' DISSSENT FROM THE VERDICT OF THE CORONER'S JURY.

In the Landmark Extra Monday, Aug. 31st, 12:30 p. m., is the following under the signature of the jury: "Mr. J. S. Ramsey, of the jury, signs the report, but does not believe that any rail was loosened or misplaced before the wreck."

In the story of the wreck as published in the Landmark Thursday, noon, Sept. 3d, 1891, the paragraph reads as follows: "The conclusion of the jury not being final as to anything, Mr. J. S. Ramsey signed the report, but only with the stipulation that he be put on record as dissenting from the opinion that any rail was loosened or misplaced before the wreck."

We, the undersigned jurors, pronounce the statement published in Thursday's Landmark, so far as it relates to the conclusion of the jury "not being final as to anything" as possibly misleading and likely to leave an erroneous impression on the minds of the public and so far as it relates to Mr. Williams' dissent, utterly false, though we acquit the Landmark or its editor of the falsehood. The first intimation the undersigned had of Mr. Williams' dissent was in Thursday's edition of the Landmark.

T. C. CARLTON, J. STEPHAN, J. M. LAMFRECHT.

THE N. C. TOBACCO CROP.

Frenching, Frog-Eye and Black-Rot Doing Great Damage. Correspondence Southern Tobaccoist.

DURHAM, N. C., Sept. 5. A large crop of tobacco was planted this year, and at one time the indications were that a large crop would be produced, but the excessive rains have completely blasted all hopes of a good crop throughout the country, where such heavy and continued rains have fallen.

The county Board of Health also met and elected Dr. I. E. Green, of Weldon, county superintendent of health. The County Medical Society met and elected new officers. Dr. W. G. McDowell was elected president and Dr. H. B. Ferguson secretary.

I suffered from a severe cold in my head for months and could get no relief. Was advised to use Ely's Cream Balm. It has worked like magic in its cure. I am free from cold after using the Balm one week, and I believe it is the best remedy known.—Samuel J. Harris, wholesale grocer, 119 Front St., New York.

TALKS BY THE WAYSIDE.

Mr. W. T. Edwards, of Merry Oaks, who was here yesterday brings the bad news that crops in Chatham are sorry, and that late corn will not be so good as was expected.

Mr. Pulaski Cowper, who has returned from the Knap of Reeds and Stovall sections of Granville county, tells us that the people are very blue over the tobacco prospects. The tobacco is said to be very poor.

Rev. J. W. Lee, the well-known Irish evangelist, was in Raleigh yesterday en route for Norfolk where he goes after his two daughters who will be entered as pupils of Greensboro Female College.

"I wonder," said S. T. Pemberton, Esq., of Albemarle, who was here yesterday, "whether the Georgia legislature refused to accept the home for the Confederate soldiers because the constitution of Kansas will not allow a Confederate soldier to hold office in that State!"

Rev. P. L. Herman, of Cary, was here yesterday. He has recently held protracted meetings at Apex, Garner, Ebenezer, and Macedonia churches at which there were thirty-one additions to the Methodist churches. He will hold a meeting at Holland's next week, and will be assisted by Rev. Mr. Rowland, of Texas, who is visiting relatives in Wake county.

Scotland Neck Items.

(Scotland Neck Correspondence.) Yesterday the county board of magistrates held a joint session at Halifax with the board of county commissioners, and elected officers for the next term of the Inferior court.

It is composed of A. N. Hill, chairman and S. S. Norman and J. J. Robertson, associates. Mr. S. M. Gary was re-elected clerk, and Mr. W. C. Thorne was elected county solicitor in the place of Capt. J. M. Grizzard, who said he was not a candidate any more.

The county Board of Health also met and elected Dr. I. E. Green, of Weldon, county superintendent of health.

The County Medical Society met and elected new officers. Dr. W. G. McDowell was elected president and Dr. H. B. Ferguson secretary. They decided to hold their meetings monthly instead of quarterly, and the next meeting will be held in Scotland Neck the first Tuesday night in October.

Jackson Springs WATER AND New Hotel.

An All-the-year-round Health Resort.

WATER For Dyspepsia, Chronic Diarrhoea, Cystitis, Kidney Troubles, Cholera Infantum and Debility.

Balmy Breezes of the Long-leaf Pine and Deep-sand Section for Pulmonary and Asthmatic Troubles.

MCPHERSON & THOMPSON, PROPRIETORS, West End, Moore County, N. C.

Running far back beyond the memory of the earliest settlers of Moore County, North Carolina, there has bubbled forth from a solid rock-bed some sparkling springs, the flow of which forms a little rivulet of clear, cold, effervescing water, carrying in its liquid depths many of Nature's remedial and curative qualities.

These have long been known to the neighborhood as Jackson Springs.

For many years, that the waters of Jackson Springs possessed mineral properties which were powerful remedial and curative agents for indigestion, dyspepsia, cystitis, dropsy, diarrhoeal, and, in fact, all debilitating affections, was known only to the few who had located and made their homes in the immediate neighborhood.

Visitors from the surrounding country became frequent and numerous, and their stay of longer duration, to the extent that many small cabins were erected, and often whole families would drop in and remain for a week or more; cooking in the open air, sleeping in tents or wagons, and caring for themselves in the old-fashioned camp-meeting style.

More recently the reputation of Jackson Springs Water became so much talked of, that very shortly a party of gentlemen sought for and obtained an option upon the Springs and some 700 acres of long-leaf pine and deep sandy land surrounding it.

ANALYSIS No. 6,147. NO. CA. AGRICULTURAL DEP'T, EXPERIMENT STATION. RALEIGH, N. C., Jan. 3, 1890. SIR:—The sample of mineral water sent to the Station for analysis, in a demijohn, marked P. M. Wilson, contains an evaporation, per U. S. gallon—

Table with 2 columns: Substance and Amount. Includes Sulphate of Potash (.577 grs), Chloride of Soda (.825 "), Carbonate of Soda (.578 "), Carbonate of Lime (1.721 "), Carbonate of Magnesia (.833 "), Oxide of Iron and Aluminum (.181 "), Sodium Phosphate (Trace), Silica (2.567 grs), Total (7.546 ").

Your obedient servant, H. B. BATTLE, [SEAL.] Director. To P. M. WILSON, Raleigh, N. C. Upon receipt this analysis the option was and the pur-

chasers have erected near the Springs a new and comfortable hotel, fitted it out anew, and it is now open to the public as

Jackson Springs Hotel.

This new health resort is situated four miles from West End, on the Aberdeen and West End Railroad, about fifteen miles southwest of Southern Pines. The Aberdeen and West End Railroad is a branch from the Raleigh and Augusta Airl Line Road, and is the individual enterprise of Mr. A. F. Page, whose money paid for its entire construction and equipment.

Jackson Springs Hotel is situated in the very heart of what is known as the

Long-Leaf Pine and Deep Sand Section.

The healing influences of inhaling the odors of the long-leaf pine and living in and breathing the pure atmosphere of this deep sand drainage is not to be disputed.

We desire to extend to all who are sufferers from these terrible diseases all the benefits which Nature has so bounteously bestowed upon us. To this end we have opened the Jackson Springs Hotel, and invite the public to its hospitality at reasonable rates.

For further particulars address MCPHERSON & THOMPSON, West End, Moore Co., N. C.

Read carefully the following testimonials from those who have been benefited and cured by the use of the Jackson Springs Water:

Rev. W. S. Lacy, D. D., Thinks its Effects Marvelous.

Dear Sirs—I am very happy to be able to give you my testimony to the excellence of the Jackson Springs Water as a natural remedial agent, indeed a specific, in all forms of dyspepsia, and as a tonic when the digestive powers have been weakened by long debilitating disease, or have been over-taxed and disordered.

In my own case having suffered from a severe attack of cystitis in February and March, 1884, after recovering from a six-weeks confinement and much longer illness, early in April with appetite very poor and hard to please, and being much weakened by protracted suffering, I attended a meeting of Presbyterians at Jackson Springs, remaining six days. I drank the water freely and its effects were marvelous. My strength rapidly returned, my appetite was restored, and my improvement was, even for so short a time, very marked, and the effect continued long after my return home.

Mrs. Lacy was a sufferer from dyspepsia in aggravated form for two years, so that she was much enfeebled and confined for five months to her bed. She first used the water bottled, and the result was so satisfactory that as soon as she could bear the journey she was taken to the Springs, remaining three weeks. The water has proven so beneficial in her case that it is a matter of wonder and thankfulness to all her friends. She visited the Springs a second summer with like marked improvement, and it is to her a veritable Bethesda, a pool of healing, a Mecca of health. Whenever jaded or run down, or whenever feeling depression or suffering occasioned by indigestion, a week or a month at Jackson Springs is the potent remedy that answers all demands. Very truly yours, W. S. LACY, The Manse, 68 Boush St., Norfolk, Va., May 1, 1891.

Truly Wonderful what Jackson Springs Water Will Do.

[From W. T. Jones, President of Tyson & Jones Buggy Co. CARTHAGE, N. C., May 1, 1891. MESSRS. MCPHERSON & THOMPSON, West End, N. C.:

Gentlemen—It is truly wonderful what the Jackson Springs Water will do. I know of several persons who were so weak as scarcely to be able to walk, who in a short time were restored to robust health. Every year people flock there. After the house is all filled they camp in tents, and some sleep in wagons and cook and eat in the open air. At now that you have a good hotel there the accommodation will be a blessing to the people. We are eighteen miles from the Springs and I send for the water often. Have just received about ten gallons. Yours truly, W. T. JONES.

Presiding Elder Rev. S. D. Adams, Thinks it Saved his Life in 1873 when all Remedies Available had Failed.

CARTHAGE, N. C., May 1, 1891. MESSRS. MCPHERSON & THOMPSON, West End, N. C.:

Gentlemen—After an acquaintance of more than twenty years with the waters of Jackson Springs, and having thoroughly tested its curative properties in my own case, I do not hesitate to recommend it to those who are suffering with dyspepsia in any of its

forms, weak kidneys and other cases, as worthy of a fair trial. I believe it saved my life. I feel that all remedies available had failed. Permanent relief. Since then I have been much benefited by it. I think I am conferring a favor on those who are suffering in that way. "Do as I have done," I think you will be benefited.

For More than Twenty Years Advised Patients to go to Jackson Springs.

ROCKINGHAM, N. C., May 1, 1891. MESSRS. MCPHERSON & THOMPSON, West End, N. C.:

Dear Sirs—Jackson Springs Water possesses virtues in my respects unsurpassed by any other knowledge. For more than twenty years I have advised patients with indigestion and certain dyspepsia, unyielding to the remedial measures, to go to the Springs. The majority of these have been greatly relieved. My children, and especially those with diarrhoea, dysentery, and infantum, chronic in its character, generally cured by visiting the Springs.

Being situated on a high point of long-leaf pine and deep sand in the State, I should think it a valuable resort for those suffering pulmonary diseases. Please let me know the price of the water. I may go to the Springs this fall. Yours very truly, J. M. COVINGTON.

As a Last Resort Rev. A. N. Johnson Used the Jackson Springs Water.

LAURENBUG, N. C., March 1, 1891. MESSRS. MCPHERSON & THOMPSON, West End, N. C.:

Dear Sirs—It affords me great pleasure to give you my testimony to the value of the Jackson Springs Water as a specific for dyspepsia. Ten years ago I became the victim of a disease, which was accompanied chronic diarrhoea. I tried various remedies, but continued to grow weaker. Month by month I was, to all human appearance, on the brink of the grave, retaining a mere skeleton, weighing only 70 pounds. My physician, as a last resort, advised me to try Jackson Springs Mineral Water. I went, spent the month of July and August at the Springs, resting in the meantime of the week from the use of the water. The result was complete restoration for years after I had no trouble with dyspepsia whatever. Mine was a severe case, and during my stay at the Springs my improvement was gradual, for a time scarcely perceptible, but after leaving I improved rapidly. From my experience I have no hesitation in heartily recommending this water to those afflicted with this very common, but much to be dreaded disease, dyspepsia. It may be said it is, so to speak, the means of restoring the human frame to its normal condition. Yours truly, A. N. JOHNSON.

Dr. K. M. Ferguson's Opinion.

CAMERON, N. C., May 1, 1891. MESSRS. MCPHERSON & THOMPSON, West End, N. C.:

Gentlemen—I very cheerfully give my testimony to the virtue of the Jackson Springs Water. This water cures the qualities which relieve the exhausted from over-work and excessive processes, corrects the vitality of organs; and is especially adapted to promote appetite and aid in the health of the system. The location of the Springs is a health resort, particularly for the treatment of pulmonary phthisis. K. M. FERGUSON, M. D.

Packed for Shipping.

This valuable water is packed for shipping purposes, in flint bottles, six to the gallon, and two or three dozen bottles to the case. The strong mineral qualities make the water so effervescent it cannot be packed in large bottles or casks. For prices and further particulars address, MCPHERSON & THOMPSON, West End, Moore Co., N. C.
