

# Bile Poison

has a very bad effect on your system. It disorders your stomach and digestive apparatus, taints your blood and causes constipation, with all its fearful ills.

## Theford's Black-Draught

is a bland tonic, liver regulator, and blood purifier.

It gets rid of the poisons caused by over-supply of bile, and quickly cures bilious headaches, dizziness, loss of appetite, nausea, indigestion, constipation, malaria, chills and fever, jaundice, nervousness, irritability, melancholia, and all sickness due to disordered liver.

It is not a cathartic, but a gentle, herbal, liver medicine, which eases without irritating.

Price 25c at all Druggists.

She—Don't you consider it woman's work to talk? He—Certainly; but the trouble is, woman's work is never done.—Yonkers Statesman.

### MOTHER GRAY'S SWEET POWDERS FOR CHILDREN

Successfully used by Mother Gray nurse in the Children's Home in New York, Cure Feverishness, Bad Stomach, Teething Disorders, move and regulate the bowels and destroy worms. Over 30,000 testimonials. They never fail. At all Druggists, 25c. Sample Free. Address Allen S. Olmsted, Le Roy, N. Y.

"Were you frightened when you came to make your first speech?"  
"What should frighten me?"  
"The audience."  
"The audience left as soon as my name was announced."—Cleveland Plain Dealer.

A hundred years ago the best physician would give you a medicine for your heart without stopping to consider what effect it might have on the liver. Even to this good day cough and cold medicines invariably bind the bowels. This is wrong. Bee's Laxative Cough Syrup with Honey and Tar acts on the bowels—drives out the cold—clears the head, relieves all coughs, cleanses and strengthens the mucous membranes of the throat, chest, lungs and bronchial tubes. E. T. Whitehead & Co., Scotland Neck, Leggett's drug store, Hobgood.

Sunday School Teacher—"Tommy, does not your conscience tell you when you have done wrong?" "Yes, ma'am, but it doesn't tell my mother"—Chicago News.

The tar that is contained in Bee's Laxative Honey and Tar is harmless. It is not coal tar, but is obtained from the pine trees of our own native forests. Bee's Laxative Honey and Tar, is the best remedy for cold, because it acts on the bowels—thus expelling all colds from the system. Bee's is the original Laxative Honey and Tar, and is best for coughs, colds, croup, whooping cough, lung and bronchial affections. E. T. Whitehead & Co., Scotland Neck, Leggett's drug store, Hobgood.

The Eagle—I have one great advantage over you. I don't need to keep dodging automobiles all the time.

Does evil still, your whole life? Does you hate? Your thoughts abide on suicide? You need a pill!

Now for prose and facts—DeWitt's Little Early Risers are the most pleasant and reliable pills known today. They never gripe. Sold by E. T. Whitehead & Co.

In the traveling circuses of France the babies of the company are put to work as clowns.

A liquid cold cure for children that is pleasant, harmless, and effective is Bee's Laxative Honey and Tar Superior to all other cough syrups or cold remedies because it acts on the bowels. Ad ideal remedy for Coughs, Colds, Croup, Whooping Cough and all curable lung and bronchial affections in child or adult. Pleasant to take. E. T. Whitehead & Co., Scotland Neck, Leggett's Drug Store, Hobgood.

"To him that hath," said the man who loves to quote, "shall be given." "Yes," said the practical philosopher, "and to him that hath not shall be given a swift kick."—Puck.

ONLY 82 YEARS OLD.  
"I am only 82 years old and don't expect even when I get to be real old to feel that way as long as I can get Electric Bitters," says Mrs. E. H. Brunson, of Dublin, Ga. Surely there's nothing else keeps the old as young and makes the weak as strong as this grand tonic medicine. Dyspepsia, torpid liver, inflamed kidneys or chronic constipation are unknown after taking Electric Bitters a reasonable time. Guaranteed by E. T. Whitehead & Co., druggists. Price 50c.

### LUGGAGE CARRIERS.

FEATURES OF A BUSINESS PECULIAR TO A BIG CITY.

Grips and Bundles of Travelers Going To and From Depots Afford Chances of Earning Money.

In certain downtown streets that lead to railroad ferries and to steamboat landings are to be found young men and boys looking for jobs at carrying the luggage of travelers making for these points of departure. Warren street, for instance, says the New York Sun, is traversed by many people bound for the Erie ferry, and of these travelers a good many come down the town by the Ninth avenue elevated railroad to get off at the Warren street station.

And so, especially at about the sailing time of the Sound boats, there is always to be found at the foot of the stairs of the downtown station of the elevated railroad at Warren street a bunch of young men waiting for a chance to make a little something carrying grips and bundles for travelers from there to the boat.

It is at this point and at this hour that most of the luggage carrying business in Warren street naturally concentrates, and there, naturally, most of the luggage carriers assemble, for there they can call the people carrying heavy bundles and bags who might like to hire a carrier as they come down the stairs.

Many of these carriers make more or less of a trade of this work; that is to say, they are not driven to it by dire need, to get a few cents for immediate food, but they make a sort of business of it and hustle for the business in a businesslike way and come there every day.

Then there are transients at it, who take a look in here occasionally with the hope of picking up a dime which they may need very much right then. But as a rule no consideration of sentiment enters into the account between the traveler and the luggage carrier.

If the traveler wants somebody to carry his bag he is likely to take the first carrier that offers, and that's all there is to it; it's service for money and money for service, and it's conducted very well by both sides at this point, while the people come down the stairs from the elevated road all in a bunch to meet that bunch of carriers waiting and bidding for jobs at the bottom.

But not all of the luggage carriers that work Warren street always congregate at the bottom of those stairs. Occasionally one, and this likely to be an amateur casual, wanders up Warren street to intercept possible jobs coming toward the river from Broadway, and these wanderers may have experiences.

In the crowd at the foot of the stairs it's all over in a minute with the trainload; it's a crowd meeting a crowd; but up there in the street it's an individual man bidding for a job meeting an individual person carrying a valise.

There was a big stout man, comfortably clad, and comfortable and cheerful looking himself, making down the street from Broadway, carrying a big telescope canvas case at his side in the usual way by the handle with the straps running through it around the bag. And coming up the street at this time—not a regular at the work, this man, but looking for a job at it now—was another big man with an eye-out for bags to carry; a tall and rather spare man this was, and a man of some years, and incidentally, without an overcoat, and apparently he really wanted such jobs as he could pick up, and could make use of the money.

And when he met the big man coming along with the big telescope bag he sheered over toward him and reached down toward the bag and offered to carry it. And the big man with the bag didn't cheer off from the other, or steer clear of him, or go without paying any attention to him whatever, but he sized him up in a minute, and in the most natural way in the world he held the big bag up high to show how light it was, and said, smilingly, to the other big man: "It's empty!" and the other man said: "Oh, thank you."

Now this was a meeting as between man and man; for which both no doubt felt better, and then the big man with the bag held his way toward the river, and the other big man kept along toward Broadway, looking for somebody with a bag that was loaded.

**Harnessing the Rhone.**  
The French river Rhone is a subterranean stream near Bellegarde, vanishing in a subterranean gulf and there remaining for a considerable distance. The engineers propose to change this romantic geology by damming the river and turning the water into two parallel tunnels which will conduct the river two miles and a half to two power generating stations. Here a fall of 200 feet will yield 150,000 horsepower for 300 days in the year. The cost is placed at about \$5,000,000, and the use of the power is estimated as equivalent to working an inexhaustible coal bed supplying 1,600,000 tons a year.

**Hint for the Women.**  
It is as bad a plan to tire a man with too much honey talk and caresses as it is to neglect him altogether. He must do the wooing, you know. It is perfectly legitimate to coax him along a little with smiles and guarded compliments, but watch out that you don't overdo. Whenever a woman gets to begging a man to love her she loosens her grasp on his heart. If you do love him a little, make him fancy it is the greatest honor to him. Women often cheapen themselves, and when they do men not only lose interest, but respect too.

**A CERTAIN CURE FOR ACHING FEET.**  
Shake into your shoes Allen's Foot-Ease, a powder. It cures Tired, Aching, Callous, Sweating, Swollen feet. At all Druggists and Shoe Stores, 25c. Sample FREE.

**PARKER'S HAIR BALM**  
Cleanses and beautifies the hair, prevents itching, dandruff, itching scalp, itching head, itching neck, itching face, itching ears, itching eyes, itching nose, itching throat, itching chest, itching stomach, itching bowels, itching anus, itching all over the body.

**ONLY 82 YEARS OLD.**  
"I am only 82 years old and don't expect even when I get to be real old to feel that way as long as I can get Electric Bitters," says Mrs. E. H. Brunson, of Dublin, Ga. Surely there's nothing else keeps the old as young and makes the weak as strong as this grand tonic medicine. Dyspepsia, torpid liver, inflamed kidneys or chronic constipation are unknown after taking Electric Bitters a reasonable time. Guaranteed by E. T. Whitehead & Co., druggists. Price 50c.

### GETTING RID OF WEEDS.

Certain Ones Can Be Smothered by Sowing Grass Seed Thick—About Fertilizers.

Such perennial weeds as the dandelion, speedwell, plantain, dock, monkey plant, etc., can sometimes be smothered by growing an abundance of grass seed and making the soil so rich that the grasses will choke them out, but if they have obtained a strong "root-hold" it will be cheaper in the end to pull them out and then put on the grass seed and fertilizers. If the lawn was covered over winter with coarse manure it should be raked over, leaving as much of the fine material as possible on the land to supply summer food for the grasses. If a heavy growth of grass leaves was left on the lawn last fall it should be raked with an iron-tooth rake to straighten out the leaves and then the lawn mower run and the clipping removed before grass seed and manure or fertilizers are applied.

If one has no fine stable manure for a spring dressing one may use fine ground bone and wood ashes or a little muriate of potash. The lawn mixtures put up by manufacturers and seed dealers make good dressings, but they are more expensive. If the grass starts green—a little nitrate of soda—100 to 300 pounds an acre, will give the plants a better color and a rapid start. These mixtures should be put on as early in the spring as possible and be raked a little into the grass roots to prevent the loss of nitrogen from the decomposing bone. It is better to apply bone and ashes separately, and if the former is applied a week or two before the latter there will be little loss of nitrogen.

After the spring raking, fertilizing, clipping and seeding of the lawn the mower should not be run until the ground has become settled, that the grass roots may become well rooted. If heavy rains follow this work it may be only a few weeks, but if there are no rains it may be a month or more.—Chicago Chronicle.

### WHEN CLEANING GARMENTS

How to Use Gasoline to Get Good Results—Don't Iron Until All Has Evaporated.

If one has a black lace dress that looks very stringy and limp, let her try the following method of rejuvenating it. Rip it up and wash it in gasoline and dry; then proceed as follows: Carefully iron each piece on the wrong side, pulling it into shape, then place over it a damp cloth and iron until the cloth is nearly dry. Remove the cloth and iron until quite dry. It will then be as crisp as when new. Always darn any torn places before washing it, and remember that gasoline must not be used in a room where there is the least light, flame or fire.

For cleaning dainty silks or crepe waists without ripping, place several quarts of gasoline in a clean bowl or jar; place the soiled garment in it and gently squeeze and work until the soiled spots are gone. It is a good way to mark the soiled spots before washing, by tacking a basting thread in them. When clean, rinse in clean gasoline. Do not be sparing in clean gasoline, and if the rinse looks dirty, rinse it again in clean fluid. Squeeze out all the gasoline you can, but do not wring, and then hang the garment out to dry. As it dries (the gasoline evaporates), carefully pull the trimming into place. Let it hang until the smell of the fluid is about all gone. The gasoline should be left to settle and the clear gasoline poured off for use again; but it should not be used for white goods. For cleaning ribbons, the ribbons may be placed in a fruit jar with the gasoline, well shaken until clean, rinsed, and then wrapped around a bottle to dry smooth.—The Commoner.

**Italian Cream.**  
Soak half a box of gelatine in a cupful of cold water for an hour. Heat four cupfuls of milk in a double boiler, and when hot stir into them the yolks of four eggs beaten with half a cupful of sugar, stir over the fire for two minutes, add the gelatine, and keep stirring until dissolved. Take from the fire, flavor with a teaspoonful of vanilla, and set aside to cool. Beat the whites of the eggs stiff, and add them to the custard when it is cold, but before it has begun to form. Turn into a mold wet with cold water, and set aside to form firm.

**Banana Blanc Manger.**  
Soak a table spoonful of gelatine for an hour in a teaspoonful of water. Bring a cupful and a half of milk to the boiling point, add a pinch of baking soda, and stir in a half cupful of sugar, and the soaked gelatine. Boil for five minutes, stirring carefully. Line a jelly mold with sliced bananas and pour the lukewarm blancmanger carefully in upon these. Set in the ice to form. Turn out and eat with whipped cream.

**Mint Lemonade.**  
A favorite beverage at the soda fountains can be made at home without much trouble. Squeeze lemons over sugar and add a little water and creme de menthe in the proportion of a liqueur glassful to a tumbler of lemonade. At the last moment fill up the pitcher or punch bowl with any sparkling water. Club soda is best.

**To Remove Grease.**  
Either is one of the most effective remedies for removing grease spots from clothing.

**ASK FOR ALLEN'S FOOT-EASE.**  
A powder for swollen feet, hot, smarting feet. Sample sent free, also FREE sample of the FOOT-EASE SANITARY CORN PAD, a new invention. Address Allen S. Olmsted, Le Roy, N. Y. 5-31-41.

She—What makes you think I would say "yes" if you proposed to me? He—Because I know you always like to be on the side of the winner.—Yonkers Statesman.

### SOME ODD WATER WHEELS

They Are Employed in Various Countries to Utilize Power of Currents.

The people of Syria and Tiflis make their streams do things that Americans do not seem to have learned the secret of persuading the water courses of this country to perform, says the New York Tribune.

At Tiflis the natives have learned how to utilize the power of the current of the River Kur without building dams. What they have accomplished possibly might be done by an American farmer living on the banks of a rapid moving stream and desiring a small, cheap power. The Caucasians build floats on the surface of the river. Into them are set water wheels. The whole affair is fastened to the bank in such a way that it will rise and fall with any change in the level of the surface of the river, so that the power is about constant all the time.

In Hama the ancient "entering in of Hamath," the Syrians have accomplished a feat that makes one think of lifting one's self over a fence by tugging at one's bootstraps. They have harnessed the historic Orontes, or Nahr el Asi, as the Syrians call it, into the work of lifting itself many feet toward the zenith and trained it thus to water their fruitful gardens and orchards.

As for size the water wheels which do this work are as to other water-wheels what Niagara is to other waterfalls. As one stands by one of these great wooden frames revolving upon their wooden axles and looks up at its periphery 40 feet above one thinks it large and is astonished when he turns his gaze upstream to see that relatively it is not a great wheel, for in the distance looms up one 60 feet in height. Even then he is not prepared for the spectacle of one 90 feet in diameter, grunting around on its cumbersome axle just outside the town.

Life in Hama for some people is like the liking of others for olives, an acquired taste, because of these very water wheels. According as one feels about it, it is a musical city or one filled with nerve-racking groans. Day and night without ceasing these massive, slow revolving structures utter speech. For those who have acquired a taste for their companionship the never-ceasing tones are soothing, resembling the ocean roar or a slow fugue played on some cellophane organ. The diapason tones are deeper and louder than the deepest organ stop. Now they are in unison, now repeating the theme, one after another, now for a brief moment in a sublime harmony never to be forgotten, according to one traveler, then once more together in a tremendous chorus. The sounds are described as a slow movement up the scale, followed with a heavy drop to the keynote as: Do mi, so, do, do, do; do, so, la, do, do. This unceasing Sisyphian music, it is said, has been going on for a century at least.

### PUT HIS FOOT IN IT.

That Was What the Dude Did, Metaphorically to the Official's Hat.

Mr. J. Nota McGill was walking from the patent office to his own office when he came face to face with a nor'wester, relates the Washington Post.

Mr. McGill is not of the excitable kind, but when that nor'wester struck him he lost his head—or rather his hat.

"Hey, there," cried the ex-register, "stop that brand new hat of mine! Won't some one stop it?"

There was something in the professor's voice that appealed to a dapper looking stranger, who made a lunge at the headgear, but could do no better than put his foot through it. Consequently the brim was the only part recognizable after the fatality.

"Well, you certainly have put your foot in it," shouted Mr. McGill.

"Beg pardon, what did you say?" asked the dude.

"I say you've put your foot in it." "By Jove, say not so, old chap."

"Say not so, yourself," growled the professor, "you surely have fixed my hat up all right."

"I am awfully sorry—really," confessed the dude. "Let me 'ave it mended."

"Oh, no," said the ex-register with sarcasm, "the brim is not worth a crown now."

"A crown? I should say it is! Why, the blomin' thing is worth a sovereign at least!"

**Prince or Sergeant.**  
The German papers are telling a story of the German crown prince. The kaiser's heir had occasion recently to speak to a street sweeper near the barracks of the riflemen of the guard. Good morning, sergeant," said the sweeper, who did not recognize the prince. He said that his son was fighting in south-west Africa, but he hoped soon to have him back safe and sound. The prince, smiling, said: "Why, yes, I hope so, too!" and pressed a five mark piece into the old man's hand. But the sweeper, looking wistfully at the coin and then at the giver, handed it back, saying: "No, no, sergeant; I doubt you have none too much of that yourself!"

**Standing Up for It.**  
The orchestra, consisting of a violinist and a pianist, stopped to rest, and the chairman of the meeting took occasion to step to the front of the platform to apologize for the poor ventilation of the hall.

"Gentlemen," he said, "I know how we have all been suffering for the last 15 minutes. This had air—"

"De air is yooost as good as de ag-companiment!" interrupted the indignant violinist, glaring at the piano player.—Chicago Tribune.

Eat one of Ring's Dyspepsia Tablets after each meal and you will not suffer with indigestion. E. T. Whitehead & Co., Scotland Neck, Leggett's Drug Store, Hobgood.

For thirty-five years the government of Great Britain has owned and operated the telegraphs.

The cleansing, antiseptic and healing properties of Pinesave make it superior to family salves. E. T. Whitehead & Co., Scotland Neck, Leggett's drug store, Hobgood.

### WHAT SHALL MATRONS WEAR

Ideal Summer Outfit a Black Taffeta Suit with Touch of White Chiffon in Entre Donx.

It was the wife of a millionaire who went to one of Chicago's great matron dressmakers. She was a meek little woman of the gentle, parted hair type, of whom all is told satirically in saying that she was and had been for many years in the habit of topping off her coiffure with a quiet, though altogether beautiful and costly, bonnet, which she tied on with "strings."

The great matron dressmaker looked at her with an all seeing eye and disapproved, although he had had her gay daughters among his patrons. "You will have such a gown as I would make for your daughter, madam, I will make you something," said the mighty man, "but if you want an old lady's gown, I can't supply you."

The idea of the matron's gown of the dinner time has recently been expressed prettily by Miss Fanny Brown, in the "Indecision of Mr. Kingsbury," in a mole colored chiffon, elaborately trimmed in mole colored velvet. Dark chiffon is particularly used now by those who make a specialty of the elderly matron's gown. Either as the top and waist part of the cloth gown or suit or as the complete evening or dinner dress there is no prettier idea when trying to get away from black. All the shades of plum and subdued violets, or the darker blue grays, the mole color, dark blue, and certain shades of pale tan are likely to be becoming to the elderly woman. As for make, the long lines and semi-fitting which is the present way of manipulating the princess style, are something which the most conservative dresser need not be afraid of, the up and down effect being especially becoming to the older figure.

Grays, always recommended indiscriminately to the white haired woman, are the last thing that should be chosen, especially in light shades, by the anemic; and that elderly people are to a certain extent anemic it is only necessary to notice the general pallor of skin attached to white hair to believe. Light gray emphasizes this pallor, and it is this type whose salvation is in the mounting of black laces and chiffons over white. The matron who has this style of dress has a "dress like her daughter's," and one which is at present the envy of every woman, young or old, and yet she is distinctly within her own preserves. White lace, with a finishing of light blue, is the fitting adjunct to this costume, and especially becoming to the delicately refined and pale type with white hair. Lavenders, shading to a faint touch of cerise in the figures of black net or organdie, if mounted on black and relieved by white lace and muslin de sole for collar, vests, and undersleeves, are equally pretty with dark chiffons for the thin evening or dinner dresses. Gay Londoners of uncertain age are now affecting plinks.

Black taffeta, in the new soft kinds, is, however, the standby for this summer at least, and in it the matron may find a suit complete, including skirt and plan morning shirt waist, with an open and cut out waist for dress, made with a few black silk entre donx, and mounted over white chiffon. With a coat of becoming length such an outfit of taffeta needs only to be supplemented by a few wash things to make an ideal summer outfit.—Chicago Tribune.

### THE HANDKERCHIEF TO GO

Some Day the Medical Folk May Impose a Kerchief Burned as Soon as Used.

Is the linen handkerchief doomed? In a recent issue of the New York Medical Record, Dr. L. A. Barkan urges the use of paper handkerchiefs, which shall be burned up. The handkerchief, he says, "is quite a dangerous bacteria carrier and preserver, chiefly on account of being stored in the depth of a pocket where a mild temperature, humidity and seclusion of air and light contribute to the increase and spread of bacteria." He specifies the bacteria of pneumonia, tuberculosis, "their frequent precursor, influenza," and cerebro spinal meningitis. The handkerchief, he asserts, deposits the bacteria in clothes and pockets and spreads them broadcast. The moral seems to be that the man who would preserve his own health and that of the people about him, should begin the day with a few dozen paper handkerchiefs, which are destroyed as fast as they are used.—N. Y. Evening Post.

**Apple Snow.**  
Three large tart apples, three whites of eggs, half cup powdered sugar, half cup jelly. Stew or steam the apples, cored and quartered but not pared, and then rub them through a hair sieve. Beat the whites of the eggs stiff, add the sugar, beat again; add the apples and beat till like snow. Pile light in a glass dish; garnish with jelly or holly leaves; serve with boiled custard.

**To Avoid a Draught.**  
If one fears a draught from the open window in the bedroom have the opening at the top covered with a strip of muslin, and keep the window open the year around.

**Fresh Air for Baby.**  
Never shut out fresh air and sunshine from baby's living and sleeping rooms. Sleep is more refreshing at night for the flood of sunshine and air let into the room during the day.

**A HARD LOT.**  
of troubles to contend with, spring from a torpid liver and blocked bowels, unless you awaken them to their proper action with Dr. King's New Life Pills; the pleasantest and most effective cure for Constipation. They prevent Appendicitis and tone up the system. 25c at E. T. Whitehead & Co's drug store.

An eminent bacteriologist has a theory that typanosomes in fish are responsible for the sleeping sickness in Uganda.

# Is It Your Own Hair?

Do you pin your hat to your own hair? Can't do it? Haven't enough hair? It must be you do not know Ayer's Hair Vigor! Here's an introduction! May the acquaintance result in a heavy growth of rich, thick, glossy hair! Use this splendid hair-food, stop your falling hair, and get rid of your dandruff.

The best kind of a testimonial—"Sold for over sixty years."

### OFF FOR THE PHILIPPINES.

Party of Railway Men Fully Equipped Go to Build \$12,000,000 Road.

Kansas City, Mo.—The first corps of civil engineers sent to construct railroads for the United States government in the islands of Panay, Negros and Cebu, left Kansas City for Seattle a few days ago, whence they will sail for the Philippines. The party included doctors, stenographers, office men and in fact an entire railroad organization.

Philippine native labor is to be used for the actual work of construction of the particular railroad that the party of men will build. The road is to be 400 miles in length. It will be built across the islands named and will be so located that the connecting steamboat lines may most easily connect with the railway terminal of the different islands, thus making a continuous line of transportation from the main island of Luzon to the farthest island of Cebu.

The cost of this railroad will approximate \$12,000,000 and it is to be completed within about four years. All the supplies for the construction will come from the United States except the cement, which will be brought from China, and the ties, which will be cut by native labor. The road when completed will be modern in every respect.

The party, which includes 50 engineers, will travel to Billings over the Burlington, thence via the Northern Pacific via Seattle. This party is soon to be followed by another containing 100 men.

### Size of Army Officers.

President Roosevelt has issued an order fixing the minimum height of army officers at five feet five inches. The order, of course, will apply only to future officers. It is pointed out that the enforcement of this order may exclude many West Point cadets from the service. For a height of five feet three inches is enough to admit them to the academy. If they fail to gain an additional two inches they will no matter what their other qualifications may be, fail to get their commissions. An officer ought undoubtedly be a man of sturdy physique, but there seems to be no reason why he should be five feet five inches tall. Napoleon was only five feet two inches when he became first consul.

### In the Dismal Swamp.

As a further proof of volcanic disturbances through the Dismal swamp and along territory contiguous to Lake Drummond, it is reported that Jericho canal, which has not been waterless for many years, had gone dry. Jericho canal is a feeder for the lake and its dryness will mean a subsiding of the lake.

### Woman Rural Mail Carrier.

Mattie M. Marshall, a grandniece of former Chief Justice Marshall, of the United States supreme court, is one of the three women rural mail carriers in America. She is connected with the Granite City (Ill.) post office.

A sweet breath adds to the joy of a kiss. You wouldn't want to kiss your wife, mother or sweetheart with a bad breath. You can't have a sweet breath without a healthy stomach. You can't have a healthy stomach without perfect digestion. There is only one remedy that digests what you eat and makes the breath as sweet as a rose—and that remedy is KODOL FOR DYSPEPSIA.
