WANTED Men to learn barber trade. Few weeks required.

KODAKS & SUPPLIES We also do business in class of finishing.

Thrifty Scot. It was a hard-headed Scotchman, and he was in conflict with that enemy of mankind, the jobbing gardener.

RUB-MY-TISM Will cure your Rheumatism and all kinds of aches and pains—Neuralgia, Cramps, Colic, Sprains, Bruises, Cuts, Old Sores, Burns, etc.

Early Strategy. The origin and the local color of the following story is German.

Wed Without His Duds. The theft of a suit case containing his wedding outfit came near causing a postponement of the marriage of Charles R. Light of this city and Miss Ella Salem of Myerstown, but the nuptials went on.

Piles Cured in 6 to 14 Days. Your druggist will refund money if PAZO OINTMENT fails to cure.

True Once More. Orville Wright on his flying field at Dayton had just finished before a little band of capitalists a successful demonstration of his new automatic stabilizer.

How To Give Quinine To Children. FERRILINE is the trade-mark name given to an improved Quinine.

A Good Dressmaker can give a woman almost as much pleasure as a good bartender can give a man.

Whenever You Need a General Tonic Take Grove's. The Old Standard Grove's Tasteless Child Tonic is equally valuable as a General Tonic.

TEXAS GOVERNOR WIRES TO CRAIG

LONE STAR EXECUTIVE THINKS MARKETING COTTON CROP IS ENDANGERED.

LATE STATE CAPITOL NEWS

Review of the Latest News Gathered Around the State Capitol That Will Be of Interest to Our Readers Over North Carolina.

Raleigh. What effect the European war will have on the cotton crop of the South is hard to determine.

The following telegram was received at the governor's office from the governor of Texas, which shows that the question of the disposition of the cotton crop this fall is attracting national attention.

"Hon. Locke Craig, Governor of North Carolina, Raleigh: 'With the impending war in Europe, prospects are, the South's cotton crop will not bring more than one-half its value, and our farmers will become bankrupt. Will you join me and governors of other states in an early date at some convenient place for the purpose of trying to devise a plan by which advances can be made to farmers on their surplus cotton. In my opinion cotton should be placed in bond and advances made on it by the federal government. If you agree with this opinion will you join me in memorializing Congress to this end?'

"Governor of Texas." Governor Craig being out of the state, acting Governor E. L. Daughtride sent the following telegram in reply: "Hon. G. B. Colquitt, Governor of Texas, Austin: 'We received Governor Craig's letter in this time, but am sure he would join the governors of the Cotton States in any movement in protecting the South's cotton crop from being sacrificed on account of the European war.'

"Acting Governor North Carolina." In talking with representative business men of the state and city they all with one accord agree that the situation is one that calls for heroic measures and Congress will doubtless be appealed to, to help save this section from financial embarrassment caused by a condition of affairs of which they had no hand in the making.

Should the price of cotton be forced down to five or six cents a pound, bankruptcy would be the portion of many Southern farmers and when the farmers are hit other business becomes paralyzed.

A Chicago newspaper is also interesting itself in the salvation of the cotton crop. It received a world-wide commission to take the matter in hand and asking the co-operation and assistance of Governor Craig to this end. Thus it will be seen that this great question is not sectional in character, but concern entire nation.

Heads "Pig Club" Movement. C. L. McVein, late of the Pennsylvania State College, has been placed at the head of the "Pig Club" movement among the farmer boys of North Carolina under the direction of the North Carolina experiment station and the Federal government. He is to begin this work very soon. This new division of work will be carried on much as the corn clubs are now being conducted.

New Enterprises Authorized. The G. W. Kistler Company, of Fayetteville, with an authorized capital stock of \$100,000. The incorporators are G. W. Kistler, G. H. Williamson and Mrs. Catherine V. Williamson.

Soil Survey of Lincoln County. Washington.—The United States department of agriculture will send a representative of the bureau of soils to make a complete soil survey of Lincoln county, North Carolina, in cooperation with a representative of the state. The party is expected to take several months to complete the examination and mapping of the soils of the county. The department requests co-operation on the part of farmers and land-owners with the Federal and state soil surveyors.

Delegates to Farmers Congress. Acting Governor Daughtride commissioned a number of delegates from this state to the National Farmers' Congress at Fort Worth October 14-17 as follows: Col. J. Bryan Grimes, Raleigh; T. D. Brown, Salisbury; R. L. Shuford, Hickory; G. B. McLeod, Lumberton; Leonard Tufts, Pinehurst; S. B. Alexander, Charlotte; J. P. McRae, Laurinburg; H. C. Carter, Fairfield; C. N. Allen, Auburn; George Holderness, Tarboro; T. B. Parker, Raleigh; Col. Benehan Cameron, Durham; J. J. Laughinhouse, Greenville.

Contentment and Health. After all, the question of livability in any environment is, as a rule, one of the temperament and adaptability of the individual. This is the opinion of the Journal of the American Medical Association. Americans have braved the dreaded tropics with comparative comfort and remained in perfect health. Manila and Panama have lost the terrors of climate, while the far North has become the field of pleasure seekers. The healthfulness of an environment, urban or suburban,

Delegates to Cotton Congress.

North Carolina will have a able delegation at the extraordinary session of the Southern Cotton Congress which is to be held at Washington on August 13 and 14, which has been called by the president, Mr. E. J. Watson, of Columbia, S. C., owing to the effect that the European war is having on the price of cotton and the necessity for some extraordinary means to finance the crop which will soon be on the market.

North Carolina produces about 500,000,000 pounds of cotton annually and, therefore, is vitally interested in any plan that will help to prevent ruinous prices. A drop of five cents a pound would mean a loss of \$25,000,000 to this state.

Complying with the request of Mr. Watson, Acting Governor Daughtride appointed the following delegates to represent North Carolina at this extraordinary meeting of the Southern Cotton Congress: W. A. Erwin, Durham; M. C. Braswell, Battleboro; R. H. Hicks, Rocky Mount; T. M. Washington, Wilson; Herbert C. White, Goldsboro; Frank Borden, Goldsboro; J. A. Long, Roxboro; D. Y. Cooper, Henderson; W. L. Parsons, Rockingham; J. L. Scott, Jr., Graham; C. W. Mitchell, Aulander; H. D. Alexander, Matthews; C. C. Moore, Charlotte; A. J. McKinnon, Maxton; A. A. Thompson, Raleigh.

Acting Governor Daughtride in notifying Mr. Watson of the North Carolina appointments expressed the hope that the meeting might result in some plan by which the South's cotton crop may not be sacrificed.

President Watson has appointed the following well known bankers and farmers of the South who are interested in the cotton crop, to meet in Washington, and make arrangements for the meeting of the congress: W. G. P. Harding, of Birmingham, Texas; W. B. Thompson, of New Orleans; Harvey Jordan, of Atlanta; Dr. R. E. Lane, of Dardanelle, Ark.; Mr. Allison, of Concord, N. C.; F. M. Maxton, of Mounds, La.; Representative Witherspoon, of Mississippi, and others will be selected, he stated.

Lewis W. Parger, president of the Parker Mills Company, now in New York, has been asked to represent the manufacturers on this committee, and T. B. Stackhouse, of Columbia, has been asked to represent the cotton warehouse interests.

Insurance Commission Report Soon. The legislative commission for the investigation of the conduct of fire insurance companies in this state, at a conference just held here, agreed on a general outline for the report and recommendations to the governor and the next legislature and delegated J. S. Manning, as counsel for the commission, to draft the report, which is to be ready for final approval at an adjourned meeting to be held within three weeks.

While the members of the commission would not indicate just what the findings of the commission will be or the recommendations that will be made as to insurance regulations in this state, they stated that considerable changes will be recommended especially in the matters of publicity.

Work on Textile Building. Work is rapidly going forward in replacing the textile building of A. and M. College in good condition, following its ruin by fire during the latter part of the school term. Four cars of machinery have been received and the new equipment is being installed. It is the effort of the faculty to have the textile department prepared for the reception of students at the opening of the new term.

Finest Fruit Ever Grown. Notwithstanding the severe drought and other setbacks which have featured the agricultural world this year, there has been the finest crop of peaches this year ever grown on the state college farms, which have been marketed at a good profit. The trees have been sprayed at regular intervals, and the pests usually incident to the growth of fruit have been overcome. The value of scientific care has been fully demonstrated.

Tax Assessments Finished. The corporation commission has concluded the fixing of the tax assessments of the corporations of the state, about 4,000 in number. They did not increase the value of the cotton mills stock. There were fewer kicks this year than there were last year.

Red Cross Society Makes Appeal. There came to Governor Craig a long telegram from the headquarters of the American Red Cross Society asking the governor of North Carolina to make immediate general appeal to the people of the state for contributions for the support of the Red Cross work among the sick and wounded in the terrible European war now in progress. The appeal declared that Europeans contributed freely to the fund for the relief of the Americans in the Spanish-American war.

Returns Seventh Regiment Flag. There came to the executive offices of Governor Craig a letter from Governor Haines of the state of Maine to the effect that the Council of State of Maine has ordered the return to North Carolina of the regimental flag of the Seventh North Carolina Regiment, Confederate Army, which has been preserved in the Capitol building of the state of Maine all these years. The flag has already been forwarded to Raleigh by express by the Adjutant General of Maine.

inland or coastwise, has become almost entirely a question of personal hygiene and mental satisfaction coupled with the indispensable accompaniments of public sanitation.

His Idea. Bill—You know five years ago the banana was scarcely known in Germany.

Jill—Go on with the rest.

"What do you mean by the rest?"

"Why, now Germany's hospitals are crowded with banana-peel victims."

SERVIAN OFFICIALS IN CONFERENCE

Greater happenings have put Servia in the background. This photograph was taken at the beginning of the war with Austria, and shows Prince Alexis of Servia, on the right, talking to M. Paschitch, the prime minister.

GERMAN AIRSHIPS SAID TO BE MAIN THING RELIED ON

Assertion Made That Nation Will Surprise the World in This Direction.

CAPITALS AT HER MERCY?

Dirigibles, Which Form the Fighting Air Fleet of the Kaiser, Said to Be the Deadliest Weapon of War That Has Been Devised.

(From the Chicago Tribune.) This article is written by a man in the secret service of a great world power. Under the guise of a professional aviator he has flown over every capital in Europe, making photographs with a secret camera attached to his machine for the war ministry archives of his government. As a designer and operator of aeroplanes he is known the world over. His article, therefore, deals particularly with the air equipment of the various European nations for war.

Whatever the final outcome of the war, this is certain: Germany is going to surprise the world by her mastery of the air.

For Germany and not France ranks first in war aviation. The ponderous dirigible, not the fleet aeroplane, is the most destructive machine that soars.

Ready to Attack London. Germany stands ready to assault Paris, Warsaw, and even London by an attack from the air, and the odds are against the defenders.

While Frenchmen have been capturing the prizes in aerial contests, Germany has been far from idle. After experiments with every kind of engine that soars the air she has abandoned the newer, heavier than air creations for the dirigible of ancient origin. This she has made the deadliest machine that flies.

I have worked as an itinerant mechanic on the military air craft of every nation of Europe.

Germany and France represent two distinct and different types in air fighting. France stakes her all on the aeroplane. The Gnome motor is her foundation. The Russian air force is a mere shadow of the French system. Austria patterns her weak air corps after Germany. England's system is a composite between the two without the perfections of either.

The dirigible is a fighting machine—a dreadnought of the air. And the aeroplane is a scout cruiser, and little else.

Why Dirigible Surpasses. Here, in brief, is why the dirigible surpasses the aeroplane as a fighting machine: It carries a crew of from 10 to 25 men to take observations and direct operations.

Can carry as much as 25 tons of nitro-glycerine cartridges—sufficient to demolish Chicago.

Can hover over a city during night time in silence, and while slower, can outmaneuver an aeroplane, inasmuch as it can hold a stationary position, while an aeroplane must keep moving.

Carries rapid-fire guns which can be aimed with deadly accuracy.

An aeroplane carries four men at best. It cannot carry effective pieces

of ordnance and cannot drop bombs with any accuracy.

It can be heard and located by sound a mile distant, while a dirigible painted sky color with motors and lights shut off can neither be heard nor seen at night at a distance of 700 feet.

Plans for Attack Made. In the war archives of Germany are complete plans for aerial attacks on both Paris and London. Details for such attacks have been figured out with Metz as the base. For an attack on London they calculate upon leaving Metz as darkness falls, crossing the channel at a height of 8,000 feet. Under ordinary circumstances London would be gained before midnight. Then the bag would be dropped to 3,000 feet and the work of destruction begun. Its nitro-glycerine cartridges could render London helpless in a few hours. Furthermore, the English capital is inadequately protected with searchlights with which to detect a night attack.

Any of the nine non-rigid dirigibles in the British service would be unable to cope with one rigid Zeppelin.

Attacks on Paris have been outlined from the same base—Metz. Paris is better protected by sky searchlights than London.

France has 33 dirigibles, but all of the non-rigid type, which cannot be compared with the giant Zeppelins, of which Germany has 16, with as many more dependable dirigibles of other types.

On the Russian frontier Germany will find but trifling resistance to her air fleets.

Germany virtually is impregnable to an air invasion. At Metz, Leipzig, Cologne, Baden Baden, Hanover, Frankfurt and Johannesburg she has the most powerful searchlights in the world.

The express companies were able to afford much relief to those in financial straits and the steamship companies booked hundreds of passengers, although no guarantee could be given that British steamers would sail until their safety was assured by the navy.

The greatest demand, therefore, was for berths on American liners. Persons who usually travel in the most luxurious cabins were eagerly buying berths in the steerage which had been secured by earlier visitors to the steamship offices who were offering them for sale, but at greatly increased prices. The main office of the International Mercantile Marine was jammed with Americans, and a like condition prevailed at the offices of the Cunard and Canadian lines, which were still doing business.

Rush on Express Offices. The express companies' offices, which opened at an early hour, were crowded. They were well supplied with currency and honored their checks up to \$50. The American Express company supplied the temporary wants of over 3,000 persons from the time the office opened until 2 o'clock this afternoon. There were still hundreds in line desiring gold in exchange for their checks. They were told to return next morning.

The Wells Fargo Express company, which issues checks chiefly to westerners, was open all day. The cashiers were kept busy honoring checks.

transportation. Preparations for war in the United States outside of the army and navy is a joke. In Germany, France, Austria and Russia practically every citizen is liable to be called for war service, and as a result, the whole nation takes the matter with the utmost seriousness. It is no picnic when the reservists start for the front.

The reservists are divided into different classes, according to the number of years which have elapsed since they quit active service.

MADE THE CONDUCTOR SMILE

Dignified Lady Thought She Was Handing Man Her Ticket, But It Was Something Else.

With an air of satisfaction, a dignified matron living on the South side settled herself in a section of the Pullman bound for Chicago—the first stage in a trip to Europe, relates the Kansas City Star. Presently came the conductor, and the woman handed him a small envelope. The conductor had grizzled hair and eyes that twinkled. He looked long and carefully at the object he drew from the envelope.

"Did you think, madam," he asked, "that you could ride to Chicago on this?"

"Why, of course I did," said the woman.

"But I do not think I can possibly accept this as transportation to Chicago," persisted the conductor, whose eyes were now frankly laughing.

The woman became very reserved, but her eyes snapped. "On what grounds do you refuse my ticket?" she demanded.

"At this the conductor could not restrain his mirth. He held up the object he had taken from the envelope.

"I didn't—no, I couldn't have given you my bunton plasters."

But she had.

No Longer Strain on Her Nerves. For a week after Mrs. Wakefield gave her colored cook an alarm clock the family was awakened each day at 6 a. m. by the clang of its resounding bell. At the end of this time it was heard no more in the early watches of the morning, but Mrs. Wakefield fancied several times that she detected the muffled sound of its alarm toward evening. When questioned on the subject Dinah said with a shake of her dusky head:

"Well, Miss Wakefield, mah nerves ain' berry strong, as yo' know, an' dat alarm clock jes' riled 'em all up. I kin stan' it in de ebenin' ust rate, but ter be woke up sudden upsets me; so I jes' sets it fo' de ebenin' 'stead ob de mawnin' it goes off an' doan' disturb nobody."

RESINOL STOPS DANDRUFF AND ITCHING SCALP

If you are troubled with dandruff, eczema or other scalp, itching scalp affection, try shampoos with resinol soap and an occasional treatment with resinol ointment. You will be surprised how quickly the trouble disappears, and the health and beauty of the hair improves.

Resinol soap and ointment also heal skin eruptions, clear away pimples and blackheads, and form a most valuable household treatment for sunburn, heat-rash, etc. Sold by all druggists. Prescribed by doctors for 19 years.—Adv.

New Cures. "Music is the latest cure for melancholia! What marvelous strides the science of medicine makes!"

The speaker was one of the leading boxers of the Chicago Athletic club. George Ade gave him a quizzical smile and said:

"Right you are, my boy! And they tell me, too, that a summer girl in a slashed skirt will cure a cold every time, while as for these new-fangled one-piece bathing suits like Annette Kellermann's—well, there's nothing better going for sore eyes."

No. SIX-SIXTY-SIX This is a prescription prepared especially for Malaria or Chills and Fever. Five or six doses will break any case, and if taken then as a tonic the fever will not return. 25c.—Adv.

Why Worry? She was very much in love with him, and one evening, while they were alone, she asked:

"Frank, tell me truly; you have kissed other girls, haven't you?"

"Yes," replied the young man, "but no one you know."

Cures Old Sores, Other Remedies Won't Cure. The worst cases, no matter how long standing, are cured by the wonderful, old reliable Dr. Foster's Aesthetic Healing Oil. It relieves Pain and Heals at the same time. 25c, 50c, \$1.00.

Charity may cover a multitude of sins, but there are several still uncovered.

WOMAN WEAK AND NERVOUS Finds Health in Lydia E. Pinkham's Vegetable Compound.

Creston, Iowa.—"I suffered with female troubles from the time I came into womanhood until I had taken Lydia E. Pinkham's Vegetable Compound. I would have paid for it overworked or lifted anything heavy, and I would be so weak and nervous and in so much misery that I would be prostrated. A friend told me what your medicine had done for her and I tried it. It made me strong and healthy and our home is now happy with a baby boy. I am very glad that I took Lydia E. Pinkham's Vegetable Compound and do all I can to recommend it."—Mrs. A. B. BOSCAM, 504 E. Howard Street, Creston, Iowa.

Tons of Roots and Herbs are used annually in the manufacture of Lydia E. Pinkham's Vegetable Compound, which is known from ocean to ocean as the standard remedy for female ills.

For forty years this famous root and herb medicine has been pre-eminently successful in controlling the diseases of women. Merit alone could have stood this test of time.

If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

Make the Liver Do its Duty Nine times in ten when the liver is right the stomach and bowels are right.

CARTER'S LITTLE LIVER PILLS

gently but firmly compel a lazy liver to do its duty.

Cures Constipation, Indigestion, Sick Headache, and Discomfort After Eating.

SMALL PILL, SMALL DOSE, SMALL PRICE. Genuine must bear Signature.

"Cheap Jack" Got Some Satisfaction. A "cheap jack" was offering cheap clocks, finely varnished and colored, and with a looking glass in front, to a lady not remarkable for personal beauty.

"Why, it's beautiful," said the vendor.

"Beautiful, indeed; a look at it almost frightens me!" said the lady.

"Then, marm," replied the man, setting a bargain impossible, "you had better buy one that hasn't a looking glass."

Its Nature. "Auntie, what is a sad iron?"

"I guess it is what they press mourning suits with, dearie."

Sore Eyes Granulated Eyelids, Eyes inflamed by exposure to Sun, Dust and Wind quickly relieved by Murine Eye Remedy. No Smarting, just Eye Comfort.
