

OPPORTUNITY

By Walter Malone

They do me wrong who say I come no more,
When once I knock and fall to find you in;
For every day I stand outside your door,
And bid you wake and rise to fight and win.
Will not for precious chances passed away,
Weep not for golden ages on the waste;
Each night I burn the records of the day,
At sunrise every soul is born again.

AMBITION and purpose are the keys to the door of hope, to the unfortunate and fortunate alike.

They give to one a newer and brighter outlook, and to the other they encourage further accomplishment.

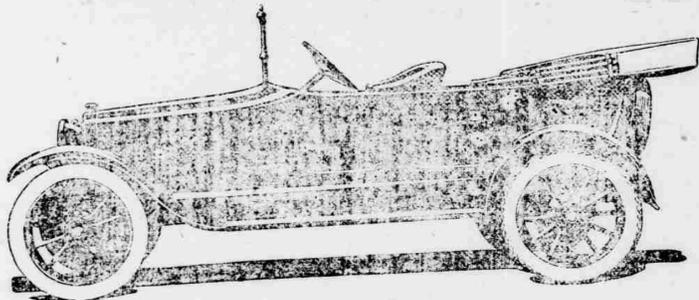

As the Statue of Liberty gives to the alien a new born hope for better things ahead, so will an account in this bank give to you and yours a sense of security, peace, comfort and provision and prepare you for a richer and nobler life.

YOU INVARIABLY READ IT FIRST IN THE COMMONWEALTH? YES!

SAXON "SIX"

A big touring car for five people

If You are Not Fully Acquainted with the Features of Saxon "Six" we urge You to Read them Carefully Now:

Light weight, powerful, six-cylinder motor of Saxon design, manufactured to Saxon specifications by the Continental Motor Company. This motor possesses marked power on minimum gasoline consumption. Ordinarily it will average 23 to 24 miles per gallon of gas. It will accelerate from standing start to 45 miles per hour in 24 seconds or less. It is notably efficient in hill-climbing and develops great speed. On an ordinary level road it will "idle" down to 1 1/2 miles per hour and pull the car along steadily and silently. It has 2 3/4 inch bore and 4 1/2 inch stroke. Saxon "Six" wheelbase is 112 inches. Every inch has been expertly utilized to promote the roominess of the car and to further the comfort of the passengers. The front seat is generously wide for two people. The back seat is more than wide enough for three occupants. There is ample leg and knee room. The finish is of a deep lustre and preserves its newness uncommonly long. There is a two-unit starting and lighting system by Wagner. No better can be had at any price. There are Timkin axles and full Timkin bearings throughout the chassis. These are the finest axles and bearings built. Their life is indefinite—their efficiency unflinching. The carburetor is the well-known Rayfield. The driving gears are helical bevel type. Running boards are linoleum covered and strongly bound in aluminum. There are also demountable rims and 32 x 3 1/2 inch tires. And you will find fully a score more of important refinements. No car on the market at less than \$1,000 is comparable to Saxon "Six" in equipment and conveniences. We would like to show you it more in detail at our showrooms.

Ask Riddick

Local and Personal

Miss Irene Whitehead has agreed to accept the appointment as Society Editor of The Commonwealth. It is with great pleasure that we are enabled to make this announcement, and we trust the ladies of the town will co-operate with Miss Whitehead in getting into print all the events that take place in the social set of the community.

Mr. Charles Woolard spent a few days in Elizabeth City this week.

Willys

KNIGHT
Sleeve Valve Motor

At Last!

The Real Thing in Motors

Ride in a Willys-Knight. You don't know the real thing until you've had this experience.

Don't judge it by any other car.

There's nothing with which to compare it.

The quiet powerful smoothness of the Willys-Knight motor is a thing to marvel at — it simply revolutionizes any previous notion you may have had about how smooth and soft a motor could be.

You can't possibly realize what it means until you try it.

You simply wouldn't have anything else after you know what it means.

See us today.
