Indigestion Causes Catarrh of the Stomach. For many years it has been supposed that Catarrh of the Stomach caused indigestion and dyspepsia, but the truth is exactly the opposite. Indigestion causes catarrh. Repeated attacks of indigestion inflame the mucous membranes lining the stomach and expose the nerves of the stomach, thus causing the glands to secrete mucus instead of the juices of natural digestion. This is called Catarrh of the Stomach.

Passing of a Pioneer. Samuel E. Williams one of the few remaining pioneers of this section, died at his home in Jackson on Wednesday evening. He had been sick for several weeks, the result of a general breakdown of the system. A stroke of apoplexy was the medium through which the current of life was at last stayed. He was a native of New York, aged 68 years. He was one of the passengers on the first boat that left New York for San Francisco, after the discovery of gold in 1849. In early days he mined in the vicinity of Michigan Bar in Sacramento county, and at one time was well fixed financially. He was one of the most expert teamsters in these parts. When the Comstock excitement was at its height, he drove a freight wagon for Belluomini over the Amador wagon road to Carson. He leaves four daughters and three sons, his wife preceded him to the grave some years ago. He was of a kind and charitable disposition. The funeral will take place to-morrow, services in the Catholic church.

MINING NOTES.

Bunker Hill—It is gratifying to be able to state that this property continues to develop into a paying mine. The explorations at the lower levels have resulted in the uncovering of good rock. A surplus has accumulated in the treasury, which will likely be directed toward the addition of 20 more stamps to the milling capacity, making 40 stamps in all. The ore bodies in sight are said to fully warrant this step.

A Jury Trial.

Henry Garbarini was arrested last Saturday for obstructing an officer in the discharge of his duty. It seems that the deputy poundmaster was in the act of capturing an unlicensed dog on Water street near the machine shop of Garbarini Bros. Henry interposed, it is said in behalf of the dog, and to prevent ill treatment. He was arrested, and demanded a jury trial. The case was to have been tried Wednesday before city recorder, Thompson. The dog concerned belongs to S. E. Williams, who had been very ill for some time, and his boy is one of the witnesses in the case. At the time set for trial Mr Williams was reported in a dying condition, and under these circumstances the case was continued until March 15. A Caminetti has been engaged to conduct the case for the defense, and the city attorney, J. W. Caldwell, will attend to the prosecution.

Hotel in Amador Changes Hands.

Harry Coster, who purchased the Imperial hotel in Amador City from B. White some time ago, and has been conducting the business since the transfer, sold this property this week to S. P. Pearce, of the Amador hotel. The purchase price was somewhat over \$8000, we understand, the sale includes all the furniture and fixtures. It is said Mr Pearce, the new owner, will conduct the hotel business as heretofore. He is now the sole hotelkeeper of Amador, and proposes to run both places. This is one of the largest transfers made in that camp for a long time. Harry Coster, it is rumored, will return to Plymouth, and go into business there.

HAND GRENADES.

It Requires Nerve to Use Them as the Bulgarians Do. Reginald Wyon in his book on "The Balkans From Within" writes from the interior of a blockhouse on the Turkish-Bulgarian frontier: "We are shown captured bombs, heavy cylinders used for blowing up buildings and the dreaded hand grenade, whose short fuse is calmly lighted by a burning cigarette and hurled among the attacking Turks. A man must indeed have nerves of iron to do this deed. Picture a devoted handful of men surrounded by an overwhelming force of Turks, slowly but surely drawing nearer. Now they are a hundred yards away, fifty yards—luckily they shoot automatically—but it is too far to put the weight with effect.

"They must wait, though here and there a bullet fired at random this and the little band. A rush—now. See! One coolly lights the fuse and quickly huris it at the foe. He must make no mistake, his aim must be correct and his arm strong. A slip at the moment of throwing means his and his comrades' lives instead of the Turks' for the fuse is very short. But he has thrown it well. The Turks see it coming and halt in blind fear.

"A deafening crash, screams and yells of anguish, and the Turks break and run, shot down by the triumphant insurgents. Down into the valleys they fly to the nearest village, where their officers, anxious to save themselves a semblance of authority, order their massacre and pillage. And the next day we read of the extermination of another band."

Woman in the Field.

A very smooth female has been working a little graft over in Visalia during the past few weeks. The person referred to, a smooth, pleasant appearing woman, about 33, appeared on the scene and presented herself to the pastor of the M. E. church. She states that she was going to get up a little book of information and wanted certain articles and information compiled by him. The book was to be gotten out and paid for through the advertising to be secured. Through the influence of the church the woman managed to secure a large number of advertisements and collected about \$50 in advance. Before the books were printed, the woman came up missing and the last heard was through a letter written at Goshen in which she stated that she had been called away very suddenly. When will merchants learn to cease being humbugged into paying in advance for advertising solicited by unknown gratters?—Merced Sun.
