TOURIST SEASON
WILL BE GREAT.
The Coming Season Bids Fair to be the Best Florida Has Ever Enjoyed.
Will Open Early.
Preparations for the approaching tourist season are now being made all over the State, but more especially on the East Coast, where it is confidently expected the season will be the best in the history of the State.
Railroad men are the best capable of giving an expression on the possibility and probability of travel and they are one and all unanimous in the opinion that Florida next winter will entertain more visitors than ever before in its history. To the end of accommodating this travel and dumping tourists into Florida, the railroads from the four corners of the country and every intersecting part are now preparing to give a train service that has never been equalled in the history of winter travel to the South. Not only will the cars be better and more elaborately equipped, but the time and schedules will be unprecedented in their shortness.
The East Coast Hotel System, anticipating not only a great, but an early season, have announced the opening of their hotels nearly a month earlier than usual. This company is in close touch with the traveling public and are in a position to know in advance of the ordinary channels, just what the travel will be.
Florida unquestionably will profit by California's misfortune and Cuba's insurrectionary troubles. Thousands who have been in the habit of visiting California for years, will come to Florida, and thousands who have gone through Florida to Cuba will remain in the Land of Sunshine and Flowers, because of the disturbed and threatening conditions there. The misfortunes of these are Florida's gain, and it now behoves all citizens, not only of Daytona, but of every city and section in the State, to set about preparing for a big season. We want the people from other parts to come among us, and we want them to be satisfied and pleased with the treatment and reception they receive. If they are, they will come again, but if not, we lose them forever.
Prepare for a big season. It is coming and the time is, but a few weeks or less when the advance guard will begin to arrive. Paint up, spruce up and make your homes and city attractive and inviting to them.

DAYTONA AND ITS
ATTRactions.
DAYTONA is situated upon the west bank of the Halifax River at its widest expanse and midway between its source at Bulow Bay and its outlet at Mosquito Inlet. It is in latitude 28, seventy-four miles from St. Augustine and one mile from the Atlantic Ocean. It is a city which is not to be without a rival for beauty among the villages of the South. Its site is upon what is known as high hammock land that was crowned by nature with a most royal growth of majestic forest trees, and among these trees is the town of today, with its beautiful cottages and well-graded walks and streets. The result is that all along the wide avenues that intersect the town are lovely live and water oaks and hickories, many of them draped with graceful festoons of the Spanish moss, that covers the street and walks, and among these are interspersed tall tropical palmettos, glossy-leaved magnolias, fragrant bay and coral-berried holly, and many other varieties, while in many places the wild grape, the trumpet vine and the Carolina jessamine and other vines and shrubs form shady bowers and adding grace and beauty.
The town lies parallel with the Halifax River, and extends for nearly two miles along the shore. This river is the delight of the angler and the fisherman, and is one of the town's greatest attractions.
The main avenues that run parallel with or intersect the river are all 100 feet wide, except Beach street, which is about sixty-five feet, but has a half-mile of open, beautiful water fronting upon its eastern side, where the salt waves ebb and flow and along and across which comes the cooling, invigorating and health-giving breezes from off the wide Atlantic, which temper and render the Halifax climate of the most perfect in the world. Daytona has many miles of well-graded, macadamized and shell roads, and streets, rendering it the
Wheelman's Paradise
and added to these, but a mile away are thirty miles of smooth, hard beach, that affords an unrivalled course for long-distance cycling and driving or automobile racing. No town of equal size, North or South, numbers so many wheelmen, and cycling is a favorite pastime with the tourists summer and winter.
The Beautiful Cottages
that have been erected during the past year and are being built are rendering Daytona as famous for its fine homes as for its beautiful river, trees and avenues, and they are adding yearly to its attractions.
Not the least of these attractions to those seeking homes in the South is the fact that its climate is so healthful and perfect of climate, it is the fact that its population is chiefly composed of cultivated and intelligent people, accustomed to the refinement of home and social life. Added to these features are good churches, good public and private schools, stores, banks, a market, movie theatre, bowling alley, an opera house, electric lights for street and house illumination, a good telephone system, ice factory, City Water Works, and hot and cold baths, etc., and everything else can be imagined that is necessary to make life comfortable. An important feature in the healthfulness of this town is the
Water Supply
which is derived from numerous flowing wells, of which there are probably 200 in the corporate limits. This flow is secured by boring wells to the depth of from 80 to 120 feet, passing through several strata of rock, and the depth assures purity from all surface contamination. The water is electrically impregnated with magnesia and iron, and holds sulphur in the shape of gas, which soon passes away.

in design and finish, are being erected, and beautiful homes, the abodes of wealth and culture are multiplying. Seabreeze (City Beautiful) and Goodall are settlements on the ocean side of the peninsula across the Halifax River from Daytona.
At the foot of Ocean Boulevard, Seabreeze, a pier reaches 600 feet across the beach into the swelling surf of the ocean. This pier is a favorite resort of those who delight in the sport of fishing. The surf here abounds in trout, pompano, yellowtail, cavalle, whiting, drum, sheepshead and many other varieties of edible fish. During the fall season the famous sea bass affords roya sport, and it has been no uncommon occurrence to land a thousand pounds of this gamey fish in an afternoon, individuals of them ranging from fifteen to thirty five pounds in weight. Not only does the ocean offer this splendid sport but the Halifax River, only half a mile back of the ocean, is equally famous for its fine fishing, and the varieties that abound in the ocean are present in the river.
Hunting and fishing good. Experienced guides and dogs may be had at reasonable prices.

Automobile Race Meet.
The Florida East Coast Automobile Association conducts an annual race meet on the beach, which has now a universal reputation as the greatest automobile race course in the world. The Daytona Grand Beach is hard as macadam, and an ideal stretch of thirty or more miles without a break makes it the natural racing ground for America.
At low tide the beach is bare for 200 feet and neither carriage wheel, bicycle or pedestrian can make a barely visible imprint on the smooth and well-packed sand. It is no unusual sight to see well-placed bicyclists speeding with the velocity of the wind before a stiff breeze along the smooth beach, thus affording the most exhilarating sport known to man. Besides these, miles of hard-shelled palm fringed boardwalks being the location of the wheel and vehicles into direct touch with the sand over the broad bridges which span the splendid Halifax River.
The beach from the sandy bluffs to the lowest point of soluble limestone, 700 feet, and the average depth of the water is about two feet. A continuous row of well-graded, from the ocean from one to two feet is deeply under normal conditions, making the beach an attractive and most largely safe place for surf bathing. Here the infant as well as the arduous traveler of every summer can safely enjoy the luxury of a sea bath throughout the larger part of the year, while the strong and expert swimmer can venture out further to test his strength and skill in battling with the inexhaustible powers of the mighty ocean.
The Peninsula
lying between river and ocean is one half mile wide, and is being rapidly improved, and there are many fine cottages and several good hotels, an opera house, two ocean pier, beach walk and a large casino.
A Remarkable Feature
at Daytona has been the yearly improvement in the style and value of the buildings that are being erected for homes. Men of capital of the North and West have become awakened to its advantages for winter residences, and valuable lots are being purchased and costly houses, beautiful
