The American National Bank has another statement for the perusal of the public this week. This makes five statements they have been called upon to render since their beginning just eight months ago. This statement shows a big increase in deposits since the last statement was made and shows that the bank is gaining the confidence of people with money. The same officials are in charge of the affairs in this institution and while they are accommodating they take very few chances that look unsafe and are worthy of the trust accorded them. Look up the statement and study it carefully. One thing we wish to have you note that is the total overdrafts remains the same as in all previous statements, "NONE."
