"THE OLD 5 and 10c STORE"

## WHY YOU NEED A SILO

THE SILO is the best solution of the two most important problems in livestock production—an easy available supply of the CHEAPEST and BEST winter feed. The solution of these feed problems is very largely the solution of the problems of successful livestock production in the South. For, so long as we buy hay and grain for livestock feeding, even so long as our cities and towns draw their supplies of feeds for livestock from other sections, just so long will they also draw their meat and dairy food products from other sections.

As a silo on the farm is a milestone well along the road to successful livestock feeding, it is becoming the best mark of intelligently progressive methods in Southern livestock production.

More livestock is needed in the South, both for the economical marketing of soil-improving crops and to furnish food supplies for our people. The development of the livestock industry is a problem of more feeds and cheaper feeds, and as a means of solving this problem there can be nothing more effective than "A Silo on Every Farm."

The only man who does not need a silo, or who can not afford a silo, is the man who has no stock to winter. With ten or more cattle to winter any man can afford to build a silo; with fifteen head he can afford to build a silo and buy an ensilage cutter; and with twenty-five or more animals to feed he can afford to build a silo and buy both the ensilage cutter and an engine to drive it.

The objections urged against the silo are (1) its cost; (2) the difficulty of getting it properly built; (3) the cost of the silage cutter; (4) the cost of the engine to drive the cutter and put the silage in the silo.

The interest on the investment and the loss from depreciation in value on a 100-ton silo and an ensilage cutter do not add more than 40 cents to 50 cents to the cost of a ton of silage. To produce silage and put it in a silo should not cost more than \$2 to \$2.50 a ton.

The total cost of an engine to run the silage cutter should not be charged against the silage, for there are other uses for an engine on most farms. If no such uses exist, three or more neighbors should co-operate in the purchase of the silage cutter and engine. But if the total cost of the engine—interest and depreciation—be charged to 100 tons of silage for each year, the total cost of the silage should, even then, not exceed \$4 a ton. Silage at not over \$4 a ton is the cheapest and best feed which

the Southern farmer can provide for his winter feeding, or for supplementing short pastures in dry seasons.

The difficulties involved in building and filling the silo for the first time may be overcome by simply asking the assistance of the dairy experts employed by the United States Dairy Division and the extension divisions of our state agricultural colleges. These men will give personal direction and assistance in getting the building of the silo started, and at no cost to the farmer.

The silo is valuable only when filled and when there is livestock to consume the silage. The only man who can afford to be without a silo is the one who can afford to farm without livestock, or who will not grow the corn or sorghum to fill it.

Progressive farming means more livestock in the West, and progressive methods of feeding mean the use of the silo. A silo on a farm is a monument to the intelligently progressive spirit of its owner. The most intelligent and progressive farmers are the ones who use silos. Look about you and see if this is not true. Is any further proof of their value necessary?—Progressive Farmer.

### Notice to Curry County School Directors

The following Curry County teachers are in attendance at the New Mexico Normal University at Las Vegas, and want to teach in Curry County.

#### FIRST GRADE

R. M. Mickle  
Dean Pattison  
Bernice Fry  
Ethel Herby  
Edna Boone

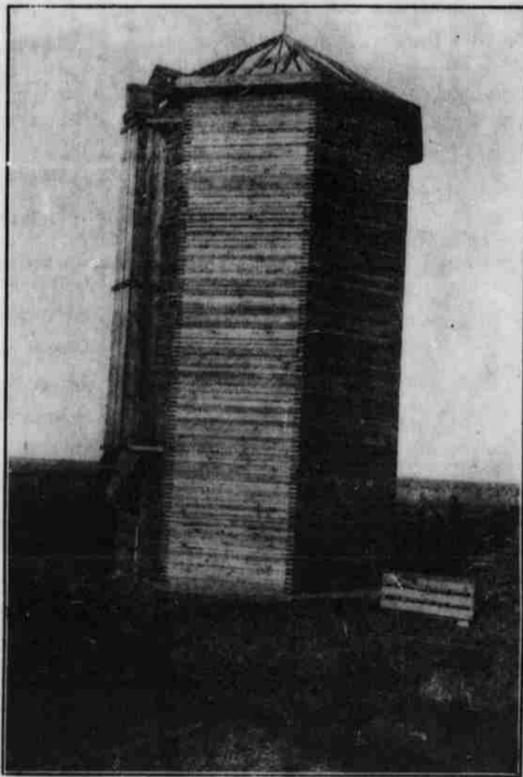

Minnie Monday  
Goldie Wickham  
Burton Rogers  
Ruby Neff

#### SECOND GRADE

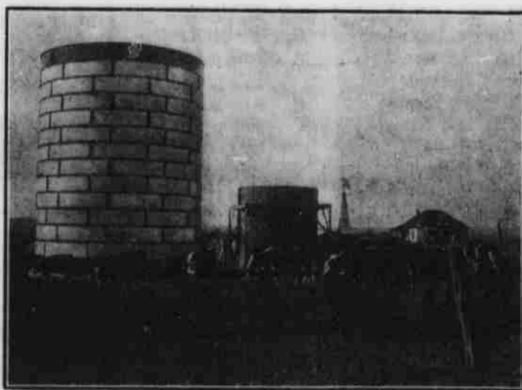

Virgil Davis  
Gertrude Wilkinson  
Nora Eads  
Mattie Reed  
Bernice Mc Brayer  
Jewel Temple  
Sarah Monday

#### Summer Normal

The institute opened on Monday morning with a good attendance with Mr. J. B. Taylor of Deming as conductor and Mrs. E. E. Bundy as assistant. Mr. W. L. Bishop, had been employed some time ago to conduct the institute, but at last found it impossible to attend. The institute is fortunate in having Mr. Taylor, who is an able instructor, to take his place. Mr. Taylor is regarded as one of the leading school men of the state.

A "Common Sense" Silo on farm of W. H. Doughton Southwest of Clovis.

### Many Cattle Received

ShIPLEY Brothers Cattle Company received about 400 head of cattle Thursday night, the first shipment of a herd purchased by John Shipley near Douglas, Arizona. They include some of the best yearlings we have ever seen shipped into this country. The stock arrived in fine shape and were driven out to the Company's ranch Saturday. The Shipley Brothers are the largest cattle dealers in this section of the state.

For Sale—Five passenger Ford car, practically new engine. Want cows or heifers.

R. C. EDGELL,  
Melrose, N. M.

For Sale:  
Milk cow and heifer calf.

E. D. HOUK.

### William Davis Dies

As a result of an illness of typhoid fever, William Davis died Sunday morning at 10:30 o'clock in the Santa Fe Hospital.

Mr. Davis with his wife and two children, Raymond and Sam were residents of Amarillo for eight or nine years, during which time he had been an engineer on the Santa Fe railroad. He was a noted baseball player and pitched many a hard won victory. Interment will take place in Clarendon, their old home, after the arrival of his mother from Columbus, Ohio, which will probably be Wednesday.

For Sale—New T. C. Smith Typewriter, No 5 model, and roll top desk for sale cheap.

R. C. EDGELL,  
Melrose, N. M.

## Let Us Feed You

We have been feeding the best class of people in Clovis for six years, and the best proof that they are satisfied is that they still eat at our cafe. We cater to particular people and if we do not please it is not because we do not try.

Restaurants come and restaurants go, but we continue in business and give you the best the market affords. Join the crowd of well fed people and eat at
