

Chief, son of Black Hawk. Ed. Reg.] The same day and in the ring for the best roadster stallion five years old and over, 29 entries, he took the first premium of \$150. At the Nelson county fair grounds, near Bardonia, Ky., in September, 1859, he won the speed ring, time 2:40 1-2 on 1-3 mile track, having to round three times, making a mile and seventeen feet. In June, 1859, he won the speed ring at New Albany, Indiana, air on a full mile track in 2:40; I think the best time recorded, made by any fallow in Kentucky or Indiana, and that time in the midst of a full season and without training. At the same time and place he won the first premium of \$100 in the sweepstake stallion ring, 10 entries.

Also won the speed premium in the fall of 1860, at New Liberty (Owen Co.) fair, given for the fastest trotting stallion, pure or gelding; time 2:43 1-4. Also the premium as the best harness stallion, and the sweepstake for the best harness stallion of any age.

Was winner of the first premium as the best stallion for general use, at the South-Western Fair Grounds, near Louisville, Ky.; also after three months lameness, and going three-fourths of a mile with only one trace, lost the speed ring by one second in 1858. He won the speed ring at the United States Fair, held at the South-Western Fair Grounds in 1857; winner of the sweepstake premium at the Michigan State Fair held at Detroit, in the general use ring in 1856; winner of the first prize at the Michigan State fair in 1855; winner of the sweepstake premium at Michigan State fair in 1854; winner of the first premium at the Branch County fair, 1855, as a horse of all work, and in 1855 as the best stallion for speed. He trotted for a premium offered for three-year-old colts, in Addison Co., Vt., being then three years old, winning with ease; and at two years old he won a race at Teonodora, N. Y., against seven competitors, winning distinction.

It would appear from the above that Green Mountain Black Hawk went from Vermont to Michigan in 1853 or 4, and remained there as late as the fall of 1856. He first appears in Kentucky in 1857 and was there in 1867, when this bill was issued. Mr. Dorsey states that he afterwards went to Missouri, where he died about 1872. He would seem to have been one of the best entire sons of Sherman Black Hawk. Will our Bridport friends tell us who bred his dam and grand-dam?

ANSWERS TO QUERIES.

BLACK MARIA, DAM OF YOUNG COLUMBIUS.—This mare was probably got by Young Cuck of the Rock, son of Barium's Cuck of the Rock, by Duroe, by Imp, Diomed. The claim that she was by Harris' Hambletonian never had any foundation. For full particulars see THE REGISTER, issues of Dec. 4 and Dec. 25, last.

To A. R. H., Spencer, Mass.

PATHFINDER.—(of St. Johnsbury, Vt.) In response to the query of Mr. C. E. Evers, we learn from Walter S. Haviland, Esq., of Danville, Vt., as follows: "I knew a colt, a beauty, bred by Alanson Aldrich of St. Johnsbury, sired by Old Morrill and out of a sorrel mare sired, I think, by Morgan Goldpin. Aldrich sold him in the fall after he was a year old to Jas. Vincent of Walden; he kept him till the summer or fall after he was three years old and sold him, I think, to a New Hampshire man for \$1000. He was called Pathfinder, was brown in color and was a very promising colt; but he got hurt and lamed in one hind ankle so that, I think, his trotting qualities were never developed. He was afterwards sold and went West."

SHERMAN BLACK HAWK—THE NORTH HORSE AND THE MYRICK HORSE.—We would inform several inquirers that these are different names for one and the same horse, one of the best sons of Vermont Black Hawk.

THE SCIENCE OF HORSE BREEDING.

[Rochester (N. Y.) Democrat and Chronicle.]

J. B. Lippincott & Co. of Philadelphia have just published for Randolph Huntington of this city a fine quarto giving a history of "Leopard" and "Linden," General Grant's Arabian stallions presented by the Sultan of Turkey in 1879, and their sons, "General Beale," "Hegira," and "Islam," bred by Mr. Huntington, and also reference to the famous horse Henry Clay. This volume is in gilt with fine paper and broad margins and is illustrated with very fine engravings of all the horses described, from drawings by H. S. Kittredge. The engravings show that Mr. Kittredge was a master. The mechanical work of the volume is of the best and Mr. Huntington may take just pride in the volume.

The subjects taken up in the volume are admirably treated. While giving valuable information and descriptions of the Arabian horses, a philosophy of breeding is unfolded. This is founded on the experience of France, England and Russia in rearing thoroughbred horses. Mr. Huntington shows that the original stock was Arabian in every case. A very interesting list of the royal stud in the time of Cromwell is given. This list and historical sketch are derived from original documents in the archives of the British government. The history shows that the British government long ago turned its attention to the improvement of the breed of horses and that the royal stud was kept intact for the purpose of keeping the blood up to the original standard.

The influence of this foresight has been felt throughout England. Through the courtesy of General Grant, Mr. Huntington has himself entered upon experi-

ments in breeding from Arabian stock along lines which he has carefully determined from a study of horses and their ancestry in this country. Perhaps the most interesting portion of the book is that which gives reasons for breeding to General Grant's Arabian stallions. In this is contained a review of the system which Mr. Huntington has adopted in his experiments, and which he believes will produce horses that will have all the good qualities of those which are reared abroad and imported into this country. The difficulties attending the experiment are pointed out. The greatest is that no sales can be made for some time to come, without breaking the continuity of the system, and rendering judgment as to practical results difficult.

Those who read Mr. Huntington's book must be convinced of the value of the experiments he is making and struck with the forcible character of the reasons advanced for entering upon them. It occurs to us that his experiments might properly be conducted at the State experimental farm in Geneva. We trust that our suggestion may be considered by those in charge of the farm. It is a fact that we, as a people, are notably deficient in organized effort to improve breeds of cattle and horses. We import both to a large extent. Both might be bred to advantage in this country. Foreign governments have taken care of such matters. The most that has been done in this country has been the establishment of a few agricultural colleges and State farms. The State farms are mostly devoted to the cereals, root crops and fruit. The reason, perhaps, for neglecting the breeding of horses is probably that no one connected with these farms has well-defined ideas on the subject. We believe Mr. Huntington can give good reasons for the faith that is in him, and we believe he ought to have a chance to carry his experiment to the ultimate at the State farm.

Farm Topics.

CONDITIONS AFFECTING THE COLOR AND FLAVOR OF MAPLE SUGAR.

The demand for maple sweets as a luxury is increasing, and their price will not be governed by imported sugars. Hence the quality of our goods must be looked after so far as possible, in order that the highest prices may be obtained, for quality governs the price. Quality consists of color and flavor.

There are two classes of causes that govern the color and flavor of our sweets: one is natural, and hence not under our control, while the other is wholly at our command. Vermont has the reputation of producing the finest flavored sugar and molasses of any State in the Union. This fact is not due to our superior knowledge in its manufacture, but to causes existing in nature. Our geographical location and climatic conditions are peculiarly favorable for the sugar maple. The above are general conditions applicable to the State.

In addition to this, there are many local conditions that help to the same end. I know of one orchard which has a local notoriety for its very fine products. It stands on a soapstone ledge, and does not produce so much sap as some others, but it is very sweet. This sap has about 5 1-2 per cent. of sugar in it, while ordinary sap has only 3 per cent. Sugar from this orchard is noted for its peculiar fine flavor. I know of another orchard, which is noted for its poor sugar, having a dark color, no matter who makes it. Merchants who purchase sugar tell me that those sweets made on high lands and on the sides of mountains are worth 1 1-2 c per lb. more than those made on low lands. The above are some of the natural causes which help to modify the article.

It appears, then, that in some instances, nature gives us all grades of sap, from the best to the poorest. Every sugar-maker ought to fully understand the whole make-up of the maple, so that he may be able to make nice sugar even with unfavorable conditions. From the best of trees, under the best conditions, we can make a poor article of sugar, while from the poorest trees surrounded with bad conditions we can make good sugar, yet it is not possible to make so fine flavored sugar from the poor tree as from the good tree. I have made four grades of sugar from the same tree and on the same day.

A maple (with all other trees) puts its annual growth on the outside. In this last year's growth of wood, or outside ring, is contained the best sap, which has the finest flavor. And from this wood, sugar can be made as white as snow. Every ring toward the heart of the tree contains a decreasing grade of sap, growing higher in color, and containing less sugar with poorer flavor. It appears, then, that the shallower we bore, the whiter the sugar and the finer the flavor. Color governs flavor. All dark sugar and molasses have a poor flavor. The darker the sugar is, the poorer is the flavor.

If we bore two inches deep early in the season, we shall make a fair grade, because then most of the sap comes from the outer wood. As the season advances, the color will deepen with a loss of flavor because the sap is coming from an older growth of wood near the center, where the wood is darker, the sap taking its color from the wood through which it flows. As we ascend the tree, the color of the sap increases (I am speaking of the sap wood, which is white), together with an increased percentage of sugar,

and I think an increase of flavor. Should this last point prove true, it would follow that the higher and shallower we bore, the better the product will be, but the less of it, as quantity and quality do not go together.—Timothy Wheeler, Washington county, Vt., in *Homestead*.

COMMERCIAL FERTILIZERS.

For the year 1885, twenty-nine (29) brands of fertilizers were licensed and sold in this State. This year only the following named twenty (20) brands have been licensed by the State treasurer:

- "Soluble Pacific Guano,"
- "E. Frank Coe's high grade Superphosphate,"
- "Bradley's N. L. Superphosphate,"
- "Bradley's Patent Superphosphate,"
- "Bradley's Sea Fowl Guano,"
- "Bradley's Original Coe's phosphate,"
- "Bay State Bone Superphosphate of Lime,"
- "Quinnipiac Phosphate,"
- "Quinnipiac Potato Phosphate,"
- "Quinnipiac Pine Island Phosphate,"
- "Buffalo Special Superphosphate,"
- "Buffalo Potato, Hop and Tobacco Phosphate,"
- "Buffalo Ammoniated Bone Superphosphate,"
- "The Bay State,"
- "Homestead Superphosphate,"
- "The Cumberland Superphosphate,"
- "Bowker's Stockbridge Manures,"
- "Bowker's Hill and Drill Phosphate,"
- "The American,"
- "The Fish and Potash."

Sheep Interest.

BOSTON WOOL MARKET.

The Boston Journal of the 19th inst., reviewing the wool market for the week ended on that date, says: The wool market is in rather a dull and unsettled state. There is no material change in prices, but buyers are quite indifferent and holders are disposed to close up old stocks as fast as possible, as the new clip of the country will soon be upon the market, commencing next month with Texas and California. The stock of wool on hand is moderate for the season, and last year's clip has been consumed more closely than usual, but the prospects of the trade are not so favorable as a short time ago, and the business is likely to be embarrassed for some time to come on account of labor movements that are becoming more prevalent every day. Manufacturers appear to be in no haste to purchase wool when they may be compelled to stop their mills, and if production is materially reduced on this account the supply of wool is abundant, now and prospectively. In fact, with large imports of foreign, new wool coming on the market and a reduced production it would be difficult to maintain prices on our present basis. On the other hand if the labor movement could be reconciled, and the business go on without interruption, the prospects ahead would be quite favorable for a fairly remunerative trade during the year. The sales of the week have been 1,776,300 pounds of all kinds. In interior and neighboring markets the business has also been very light. Some buyers have already started for California, Texas and the West to be prepared to operate if prices open at reasonable figures, but we do not look for an active movement in new wools if the advices received are correct, that new Texas wool has been sold on the sheep's back at 21 and 22 cents in Texas, and that extreme prices are asked at other points. The London sales open next Tuesday, but no change is anticipated. There is some inquiry for English and Irish combing, but no sales of importance.

The demand for washed fleeces has been quite limited and the business of the week the smallest for some time.

The demand for combed and delaine fleeces has been light, but stocks are small and desirable assortments scarce. Prices for the most part nominal. The sales include 10,000 pounds delaine and combed at 35 to 36 cents, and 5000 pounds combed at 34 1-2 cents per pound.

The demand for unwashed wools has been quite moderate, and the sales of the week have been 231,000 pounds of all kinds. In prices no change, although the tendency is in favor of the buyers. The sales of Territory wool have been 83,000 pounds, and include 8000 pounds No. 1 at 22 to 24 cents, and 75,000 pounds at 19 to 25 cents for fine and medium. In Oregon wool the sales have been 10,000 pounds valley on private terms. In unwashed and unmerchantable fleeces the sales have been 138,000 pounds, and include 25,000 pounds at 21 to 27 cents, 500 pounds at 23 cents, 87,500 pounds at 19 to 25 cents, 20,000 pounds at 20 to 21 cents and 5000 pounds at 21 to 22 1-2 cents per pound.

If you are suffering from a sense of extreme weariness, try one bottle of Ayer's Sarsaparilla. It will cost you but one dollar, and do you incalculable good. It will do away with that tired feeling, and give you new life and energy.

For Sale.

I have several sets of Large Milk Pans (both wet and dry) Ferguson Bureaus and Mosely & Stoddard Creameries, which are all second hand, but in good running order and

WILL BE SOLD CHEAP.

I would be pleased to call upon or correspond with any party in want of this line of goods.

J. W. DORSEY, Middlebury, Vt., March, 1886.

McCLELLAN AND BURNSIDE.

The recent death of General McClellan leaves but few living of those unfortunate commanders who found themselves unopposed to the great responsibilities placed upon them during the civil war. Burnside, Halleck, "Fighting Joe" Hooker, and others, had passed away before him, honored by the nation they had served after having lived down the hostile criticisms their official acts had excited. Equal justice will be done to General McClellan, and a true estimate of his abilities as an organizer and a soldier will be recorded. In his political ambition the general Burnside was far more successful than his old commander, and death found him a senator from Rhode Island. McClellan might have been a cabinet officer but for factional quarrels in New Jersey which made his appointment inexpedient.

Rhode Island's devotion to her handsome senator illustrates a happy characteristic of the smallest State which still distinguishes her. General Burnside was not a native of "Little Rhodey"—having come east from Indiana—but he had the right timber in him, and was made governor and afterward senator of his adopted State. The same spirit may be seen in her citizens to-day in their hearty reception of that which will be of benefit to them. A case in point is that of Mr. John A. Bishop, of Central Falls, R. I., who tells this story:

"For eighteen years I suffered with neuralgia and never got any relief until I took Athlaphoros. After that had cured me of the disease I became afflicted with sciatic rheumatism, for which I was treated by two doctors. Neither of them did me any good, in fact I grew worse under their treatment. Again I began taking Athlaphoros, and, strange as it may seem, relief came almost instantly. The pain abated so that I was able to get around in less than three days, and as I daily grew stronger the rheumatism left me altogether."

Mrs. S. T. Goss, of No. 42 Dudley Street, Providence, can confirm this seemingly wonderful cure out of her own experience. She says:

"For thirty years I suffered with muscular rheumatism, during which time I used every known remedy and all sorts of prescriptions from physicians. At times I would gain a little relief, but only for a short period, after which the disease would attack me with renewed violence. It was while I was suffering one of these very severe attacks that a friend spoke to me of the wonders Athlaphoros was doing and advised me to try it. I did get a bottle and in two days after beginning to use it was on my feet. Athlaphoros is now kept in my house and is looked upon as indispensable. It is the greatest preparation I ever knew of and will cure rheumatism just as it is claimed it will do."

Mr. J. D. Payne, one of the most prominent citizens of Westville, Ct., where he has a pleasant home on Fountain street, is outspoken in his praise of Athlaphoros.

"I did not think there was any cure for rheumatism," he says, "but I am pleased to say that there is and that it is Athlaphoros. Three doses of it cured my wife of rheumatism."

If you cannot get Athlaphoros of your druggist, will send it express paid, on receipt of the price, or will send it by mail, if you buy it from your druggist, but if he has it, do not be persuaded to try something else, but order at once from us, directed Athlaphoros Co., 115 W. Wabash Ave., N. Y. C.

STATE OF VERMONT.

District of Addison, ss. Be it remembered, that at a session of the Probate Court held at Middlebury, within and for said district on the 4th day of March, A. D. 1886.

Present, Hon. Lyman E. Knapp, Judge. Whereas, a certain instrument in writing, under seal, purporting to be the last will and testament of Caroline M. Lewis, late of Orwell, in said district, deceased, having been this day presented to said Court for probate, and duly filed in the Probate office. Therefore, it is ordered, that all persons interested in the estate of said deceased, be notified to appear before said Court, at the Probate office in Middlebury, in said district, on the 15th day of April, A. D. 1886, at 10 o'clock, a. m., by publication of this order three weeks successively previous thereto, in the Middlebury Register, a newspaper printed at Middlebury, to show cause, if any they may have, why said instrument in writing should not be proved and allowed, as the last will and testament of the said deceased.

LYMAN E. KNAPP, Judge.

STATE OF VERMONT—District of Addison, ss.

The Probate Court for the District of Addison. To all persons in the estate of Heman Wilkinson, late of Bridport, in said District, deceased.

By the authority of the state of Vermont, you are hereby notified to appear before the said Probate Court, at the Probate office in Middlebury, in said District, on the 1st day of March, A. D. 1886, at 10 o'clock, a. m., to show cause, if any you have, why the account of said deceased, administrator of the estate of said deceased, should not be allowed, and also why the residue of said estate should not be distributed to the parties entitled thereto.

Dated at Middlebury, in said District, this 4th day of March, A. D. 1886.

LYMAN E. KNAPP, Judge.

COMMISSIONER'S NOTICE—Estate of Bucl Preston.

The undersigned, having been appointed by the Hon. Probate Court for the District of Addison, Commissioners, to receive, examine and adjust all claims and demands of all persons against the estate of Bucl Preston, late of Middlebury, in said District, deceased, and all claims exhibited in offset thereto, hereby gives notice that we will meet for the purpose aforesaid, at the late residence of Bucl Preston, on the 15th day of April and 15th day of October next, from 10 o'clock, p. m., until 4 o'clock, p. m., each of said days, and that six months from the 15th day of April, A. D. 1886, is the time limited by said Court for said creditors to present their claims to us for examination and allowance.

Dated at Middlebury, Vt., this 16th day of March, A. D. 1886.

C. H. BEAD, (Comm'rs.) J. W. MAXIN, (Comm'rs.)

CELERY COMPOUND CURES.

Diseases of the Nerves, Kidneys, Liver, Stomach and Bowels, and acts as a BLOOD PURIFIER AND TONIC To the General System.

CELERY COMPOUND Cures Malarial diseases from any form of complaint caused by malaria it is specially recommended, inducing a healthy action of the liver and curing dyspepsia in all its forms.

CELERY COMPOUND Is a Nerve Tonic which never fails. It strengthens and quiets the nervous system, and promotes regular and quiet sleep.

CELERY COMPOUND Is the best medicine for Malaria. It cures all the best remedies for these diseases, and never fails to cure.

CELERY COMPOUND Immediately relieves and permanently cures habitual constipation, itching piles, sick headache, and all diseases of the stomach and bowels, with none of the evils consequent upon the use of powerful cathartics.

CELERY COMPOUND Is the safest and best remedy in existence for all the diseases incident to females, as thousands can testify.

CELERY COMPOUND Is prepared by an apothecary who has had 36 years' experience in compounding medicines. Ingredients are purely vegetable, consisting of roots, herbs, barks, seeds and flowers, the names of which are given on the label of every bottle. It is the best medicine in the world for aged people, quieting, bracing and toning the nervous system.

CELERY COMPOUND Is sold at \$1.00 per bottle for six bottles, and may be obtained of every retail druggist in the United States or of the proprietor, M. K. PAINE, Windsor, Vt.

To introduce the Celery Compound in places where it is not in stock, I will, on receipt of two dollars, send two bottles to any address in New England, securely packed and express charges paid, to your nearest express office.

G. FISHER, General Western Agent, 51 Wabash Avenue, Chicago, Ill.

MAPLEWOOD FARM,

East Hardwick, Vt.

SEASON OF 1886,

The best bred entire son of Daniel Lambert

COBDEN.

1011 REGISTER 2:28 3-1.

By DANIEL LAMBERT, DAM, CLARA, by ETHAN ALLEN.

\$50 the Season of 1886.

TERMS—Cash or approved note at time of service; mares not proving in foal can be returned free of charge next season.

This elegantly bred stallion was purchased when a yearling by the late Mr. Benj. E. Bates, for \$1000, expressly to take the place of his renowned sire on the Bates Farm. As will be seen by the following statement of pedigree, he is full of Ethan Allen and Abdallah blood, and also of Daniel Lambert, being the best son of old Ethan Allen, out of Fanny Cobb, by Abdallah (sire of Rydyk's Hambletonian), while Blue Dan, (25), is a daughter of Ethan, out of the Dr. Dixon mare, also by Abdallah. It is, therefore, not to be wondered at that he looks and acts more like Daniel Lambert than any other one of his offspring. His color a nice chestnut, he stands 15 hands, and weighs 1600 lbs., with the most beautiful style, action and disposition imaginable. His record of 2:28, was made Nov. 1, 1883, after a brief preparation and an unfavorable day. He has shown full mile trials in 2:27, and quarter mile in 29 seconds.

The superiority of the Lambert stock is too well known to require elaborate explanation. Daniel Lambert is the first of living stallions, judged by the true test, the 2:30 list, and his sons are showing remarkable propensity. Cobden as a stock horse will in due time add to his sire's fame.

MOVEMENT.

Sire, Almost Eagle (1054), 2:27. Full brother to Piedmont (2:17 1/2).

TERMS \$20.00.

VOLUNTEER COLUMBUS.

Sire, Volunteer Boy (1612). Full brother to Goldsmith's Abdallah.

TERMS \$20.00.

LAMBERT B. (3469).

Sire, Daniel Lambert.

Set dam by Messenger Chief (1878).

Set dam by Blue Dan, 2:25, s. r. l.

Limited to ten approved mares at \$25.00 cash, with privilege of return next season if not in foal.

Mares booked now. Mares kept by the year at \$2.00.

For extended pedigrees and further information, address

W. H. BAILEY, East Hardwick, Vt.

or J. L. BAILEY & NO., East Cambridge, Mass.

COMMISSIONER'S NOTICE—Estate of Harry G. Langworthy.

The undersigned, having been appointed by the Hon. Probate Court for the District of Addison, Commissioners, to receive, examine and adjust all claims and demands of all persons against the estate of Harry G. Langworthy, late of Middlebury, in said District, deceased, and all claims exhibited in offset thereto, hereby gives notice that we will meet for the purpose aforesaid, at the Addison County clerk's office, on the 7th day of April and 11th day of August next, from 2 o'clock, p. m., until 4 o'clock, p. m., each of said days, and that six months from the 15th day of March, A. D. 1886, is the time limited by said Court for said creditors to present their claims to us for examination and allowance.

Dated at Middlebury, this 17th day of March, A. D. 1886.
