### Shall the Harvest be? Nothing but leaves.

Unless you wake up and take care of what you have. If you get any satisfactory returns from your Dairy, you must keep the flies away from the cows by spraying the cows with Cattle Oil.

If you want to get your hay and grain harvested in reasonable time, especially when it is so hot, you must have plenty of wholesome bread, pies and cake for the men and boys to eat which will necessitate the getting of one or more barrels of the choicest flour.

At the same time don't forget the poultry dividends and success will be yours.

You must surely come to observe the manoeuvres at the depot if you maintain any acquaintance of the place, at the same time come to the Feed Store to get that barrel of flour you have been thinking about so long.
