United States Senatorship

A State-Wide Test Vote

UNITED STATES SENATOR CARROLL S. PAGE

The Vermont Union-Journal has been making a canvass of the Senatorial situation to ascertain the public sentiment of Vermont as between the present incumbent, Senator Page, and ex-Governor Fletcher.

It has sent letters to every town in the State and the results as we go to press today show as follows:

- Indicating preference for SENATOR PAGE . . . 3-241
- Indicating preference for EX-GOV. FLETCHER . . . 86

A very few letters express a preference for other candidates, or are non-committal, and these have not been taken into consideration in the figures given above.

How the list of names sent out was made up is stated below. Whether it is or is not a fair list the readers may judge; we simply give the facts.

First, it contained the names of living members of the Legislatures from 1910 up to the present time, between 700 and 800 in all.

It contained the name of every physician, lawyer, minister of the gospel, and the greater part of the leading business men, and town officials, in each town, and county and state officials from 1910 up to the present time.

Speaking generally, the list was made up, to a quite considerable extent, from names found in Walton's Vermont Register, from 1910 forward, as well as from rosters of Grand Army Posts, Granges and other fraternal organizations.

Of course, in making up such a list, occasional omissions may have occurred, but the number is negligible, and if any have been omitted we will be glad to be notified and letters will be sent to them and their preferences included in our final consensus.
