

CURRENT COMMENT.

ENGLAND is now boasting of the greatest industrial and commercial prosperity she has experienced in many years.

The announcement that the effort to secure the adoption by the postal congress of a universal postal stamp has failed has caused widespread regret.

So useful have the bicycle policemen proved themselves in New York and to such an extent has the habit increased that the squad, which has grown to 40 members from a very small beginning, is to be still further increased.

The railway companies of Great Britain carried 920,000,000 passengers in 1905, of whom 386 were killed. During the same year, in the city of London alone, 586 persons were reported killed by falling from buildings or out of windows.

Mrs. ELIZABETH CARY STANTON expects to bring out the second and concluding part of "The Woman's Bible" in June. Mrs. Stanton, who is 81, continues the task alone, her former assistants having lost sympathy with the commentary by women on the parts of the Bible referring to woman.

According to the report of the American Bible society recently made, never before, with a single exception, have so many volumes of the Bible been sent from the Bible house at New York in one year to foreign countries. They numbered 101,354 and seven-eighths of them went to Mexico, Central America and South America.

PROF. HALLOCK, of Columbia college, has in hand the project of boring into the earth as far as a drill can be driven. Already a depth of one mile has been reached. As the depth increases the well grows hotter. It is anticipated that natural steam will be encountered or the walls become so hot that water can be forced down and be pumped up in the form of steam, thus furnishing the power of the future.

COL. D. S. HARRISMAN, who has been recognized at Kansas City for several months as a western representative for the Cuban junta in this country, is authority for the statement that 1,450 men have been recruited for the Cuban army in Kansas City and vicinity and arrangements have been made to send them all to Cuba in the fall, when the yellow fever season in Cuba will have passed. Col. Harrisman also says that an American volunteer legion of 25,000 men is now being recruited at various points in this country for service with the Cuban patriots.

DURING the month of April 747,000,000 pounds of sugar were imported into this country, valued at over \$14,000,000. As the trust will have about two months more yet, there will be a year's stock of raw sugar on hand when the new tariff bill takes effect. The treasury statistics also show that there will be about a year's supply of raw wool. As other goods are being imported in proportion it can easily be seen that the revenues will be insufficient for the next fiscal year. That is why the senate committee proposes internal revenue taxes to last a little over two years.

A WAR of extermination against sympathetic strikes in the building trades has been declared by a combination of Chicago contractors, employers and other business men, and a serious conflict with organized labor is feared to be the result. The employers say they will make every effort to attain the desired end through co-operation and arbitration with the building trades council and affiliated unions, but that, if peaceful means fail, general lockouts and wage reductions will be resorted to in order to force the labor organization to terms.

The "third rail" will revolutionize railroading in more ways than the mere metamorphosis of locomotion would at first indicate, says an enthusiastic admirer of the plan. It will enable every engineer to have in his cab a block system signal, by means of which accidents, such as front and rear-end collisions, will hardly be possible. He will be no longer an unfortunate victim of careless switchmen, flagmen, dark nights, storms of snow and enveloping fogs. His ear in the blackest night will tell the position of trains in front of him, behind him and right and left of him.

MR. R. WAYNE PARKER, of Newark, N. J., who has been conducting a commission seeking uniformity in divorce laws, in addressing the Liberal club of Buffalo recently on the question of divorce said that although the jurisdiction claimed in many states to grant divorces to non-residents is a travesty on justice, yet the United States has the largest proportion of married people of any country in the world, 36 in every 100. The whole number of divorced persons in the United States in 1904 was 130,956, out of a total population of 92,927,250—one-fifth of one per cent.

LIEUT. JAMES A. MOSS, of the Twenty-fifth infantry, is under instructions from Gen. Miles to organize a corps of 20 colored soldiers to ride by bicycle from Fort Missoula, Mont., to St. Louis. This expedition is the result of a belief which prevails among military men that the bicycle can be made an efficient addition to the equipment of the army in the field; that it is practical for long journeys and that its utility will be fully demonstrated by the trip which Lieut. Moss and his 20 soldiers will begin June 1. Lieut. Moss is to make a full report of the undertaking to the war department.

A CRIPPLES' convention will be a feature of this year's exposition season at St. Louis and it is estimated that over 30,000 men and women, who are maimed limbs, or otherwise maimed, will be in attendance. The gathering has for its object the amelioration of the condition of the people represented and the enlightenment of surgeons and limb-makers with reference to the removal of the real and the substitution of artificial limbs. Mr. William E. Trower, secretary for the convention, has organized communication with labor organizations and hospitals over the country on the subject.

OKLAHOMA NEWS.

Events of Interest Gathered From Over the Territory.

REV. ROMINE'S TROUBLES.

Guthrie, O. T., May 15.—All Oklahoma news is now being carefully sifted for fakes. So much rubbish has been sent out that people are incredulous of everything. It was believed that the reported trouble at Jennings was a fake. It was not. A committee in masks awaited on the part of Rev. Romine, once pastor of the Baptist church of that place, last Friday night and treated him to a coat of tar and feathers. Romine, it seems, took a sister of his church in to live with his family and very soon Mrs. Romine left home making many ugly charges against her husband and the woman. Rev. Romine became sick and charged his wife with poisoning him. A committee of the church made investigations and recommended Rev. Romine's dismissal from pulpit and church and the next step was to give the dishonored preacher a dose of tar and feathers.

The report of the committee, dated May 11, reads: We, the committee appointed by the First Regular Missionary Baptist church of Jennings at their regular business meeting, April 28, '07, to investigate the trouble between Bro. Pearl Romine and Sister Romine and to investigate the character of Brother Romine and wife, beg leave to submit the following report: We have investigated every rumor relating to the above trouble to the best of our ability and have arrived at the following conclusion: 1st. We believe Mr. Pearl Romine to be unworthy the respect due a citizen, much less a minister of the gospel; 2d. We believe his recent illness was caused by himself with the intention to wrong his wife; 3d. Regarding marriage vows, we believe that Sister Romine regards them as sacred, while he has no regard for them; 4th. We believe that his disposition to connect the names of respectful people outside of the church with this disgraceful affair is for the purpose of sealing the lips of those parties from exposing his heinous designs or to lay the foundation for damage suits; 5th. He has obtained letters of recommendation from ministers of Baptist churches since this trouble arose without giving the true facts in the case, but charges other denominations with trying to hurt the Baptist cause here, which is false and without any shadow of truth; 6th. We, as your committee, recommend that he be immediately discharged from the pastorate of this church; 7th. We further recommend that a copy of this report be sent to the next association.

ARE IN HARD LUCK. Perry, O. T., May 15.—Governor Leedy honored a requisition from Gov. Renfrow for the delivery of W. M. Wishard and Edward Dash, who were indicted in Pawnee county for stealing horses but who could not be traced, and were shortly after arrested by the federal authorities for committing burglary in the Cherokee Nation, tried on the charge of Port Smith and sentenced to the Kansas Penitentiary for one year. Their terms were up Wednesday, at which time Sheriff Lake of Pawnee was on hand with requisitions, arrested them and arrived here where they were yesterday when they were placed in jail. They were taken to Pawnee today when they will be tried and perhaps returned to the Lansing penitentiary.

YOUNG MAUPIN DROWNED. Guthrie, O. T., May 15.—The Hennessey Clipper says: Last Friday afternoon while Pat Morris and Allie Maupin were having a boat ride on G. H. Holbrook's pond, by and one-half miles east of town, the latter met death from drowning. They were rowing in and old molasses pan for a boat when the Maupin boy asked to be taken to the shore, saying he wanted to take off his clothes and go into the water. After taking him to the shore Morris went back towards the center of the pond. Young Maupin expressed and walked into the water and when seen by Morris was up to his waist in the water. Morris was giving his attention to the boat and on looking around again his comrade was not in sight, but in a moment came up from under the water, having stepped into an offset. As Maupin could not swim, Morris sprang out of the pan and swam to him, but was caught round the neck by the drowning boy and had a hard struggle to get loose and keep from drowning. Morris swam to the shore and was so exhausted he dare not enter the water again, but went to Holbrook's house immediately and called for help. A party of men soon assembled and the dam was cut, allowing some of the water to escape. None of the party would venture into the deep water as they were not swimmers. A S. Meeks came and went in and found the body. It had been in about eight feet of water. It was thirty or forty minutes before the body was taken out.

THINKS HE'S JESUS. Guthrie, O. T., May 15.—Following is from the El Reno Star: Abraham Lincoln Ruffe, a 18-year-old matinee boy, living in the southeast part of the county, was brought before Judge Brown this morning to be tried for insanity. He was adjudged insane and placed in the county jail. His malady is religious mania. He attended a colored revival meeting at Oklahoma City a short time ago, and since then imagines he is Jesus Christ, and claims he can perform all kind of miracles. While Sheriff Cannon was taking him to the jail, he broke loose and ran down the street. But the sheriff, who is considerable of a sprinter in spite of his age, caught him before he had gone two blocks. After he had been placed behind the bars he said that he would be satisfied to remain there a while, if it suited him, but when he desired, would use his power and command the walls to fall down. He will be hustled off to Norman right away.

STEALING A WHOLE STORE. The Tecumseh Republican has the following unusual story: It will be remembered by our readers that about the first of this year we published an account of the failure of the dry goods and clothing establishment of A. C. Pickens, in this city. At the time of the failure several wholesale dry goods and clothing establishments came in with un-

pass notes against Mr. Pickens, and as a receiver was appointed, the stock of goods—in the building—was inventoried and sold to Mr. Rayson, of our popular Racket store. The amount of the invoice, however, did not satisfy the debts by several hundred dollars, and judgments were obtained against Mr. Pickens at the last term of the district court; for the balances due the different firms. Previous to the failure, it was known that Pickens carried a several thousand dollar stock of goods, but at the invoice they were "dry" and not accounted for.

Lately Sheriff Dickinson has had the privilege of playing the Pinkerton act in detective work, and Joe and his assistants have unraveled the mystery surrounding the disappearance of that immense stock of goods in grand shape. They have found goods stored away all over the county, and have made several "traps" on not trails into the city, wagon and other loads of the bankrupt stock which were being taken out of the county on the double-quick route. They have captured several wagon loads of goods and at no one place did they get more than one load, they being concealed generally in small lots at farm houses.

Up to date they have found goods concealed at the following places: At Garrett Stark's, two and one-half miles southeast of the city, Sheriff Dickinson found concealed in the left of his house, eleven boxes and one cotton sack of goods.

At George Owens', about eight miles southeast of Tecumseh, he found two large trunks and two boxes filled with goods.

In the rear end of the Mills defunct bank in Shawnee, he found five trunks and seven boxes of shoes concealed.

At the residence of one Harris, in Shawnee, son-in-law of Mr. Schwartzburg, and brother-in-law of A. C. Pickens, of this city, he found a box of gents clothing which was as large as an organ box.

At D. Kennedy's, about four miles southeast of this city, he found about a gunny-sack full of gloves and other articles.

Lately John Stark, son of B. Stark, traded boots and several articles to the Mr. Gentry, who is a neighbor of the Stark family, for a spring wagon and it is supposed that John stole the goods he traded, from his father's house. If trade John made soon came to Sheriff Dickinson's knowledge, and from this clue he proceeded to discover the hidden goods.

We are informed that previous to Mr. Pickens' assignment, he traded Mr. Schwartzburg, his father-in-law, about \$3,000, worth of the goods, having redeemed that amount of notes held by the old gentleman against him.

GREER COUNTY'S RECEIPTS. Guthrie, O. T., May 15.—Greer county, so far as the characteristic of her people is concerned is no more a part of Oklahoma than Alabama, rear county was once part of Texas. It was given a land office and northern land office claim. The account of the reception of one of these officials is consequently interesting. This is from the Greer County Sun:

Major McKnight, registrar of the Mangum land office, and daughter, Miss Hatfield, arrived in our city on last Thursday night. On Friday a large number of our citizens called on the major to welcome him to our midst. He is a very pleasant gentleman and created a favorable impression on his callers. The officers have taken up temporary quarters in the little office adjoining R. C. Hannah & Co.'s store, and are busy arranging for opening day. A Sun representative called on Major McKnight last evening and secured much valuable information for its readers, although he was not willing to talk officially. He said that they were not yet able to designate a day for the opening of the land office, but it would not be before the 10th or 15th of June, as they would have to hear from Washington regarding a building and then give thirty days notice before opening. The major said he was confident that congress would grant the extension asked for in the petition now being circulated, and that he should write to Washington urging such an extension, as it would be a physical impossibility for the office to receive all the preference filings in the time remaining. The major seems anxious to give all the information possible, and we were highly pleased with our interview with him.

WANT A NEW BRIDGE. Guthrie, O. T., May 15.—According to the Stillwater Gazette a number of representative business men of Perkins appeared before the board of county commissioners last Thursday for the purpose of getting the county to take some action toward rebuilding the bridge across the Cimarron river at Perkins. The board found that the money was not available at their disposal and use in this direction so that it would be impossible for them to do anything in that direction at the present time, or until funds for that purpose can be raised. The board will make a road and bridge levy next year to provide for such contingencies as have arisen this spring.

POINTS ABOUT FLAGS. The Two-Starred Flag on the Governor's Island Flag.

The president of the United States has his very gorgeous flag; the secretary of the navy and the assistant secretary have their flags; admirals have theirs, and so do commodores; but it isn't known very widely, perhaps, that generals of the army also have flags, which are hoisted sometimes, says the New York Sun. The other day the Governor's Island flag had the landing at the Battery with a little blue flag on her center flagstaff; on the blue field of the flag were two white stars. The major general commanding the department of the east was on the tug, and the little blue flag signified the fact to all who saw it and knew what it meant. To those who didn't know what it meant, it seemed as if the flag was simply the remains of a full-sized American flag, the rest of which had been blown away during its faithful service. The flag gave warning to the Governor's Islanders that the general was coming, and so let them prepare to receive him as regulations prescribe.

The blue flag with white stars hoisted at the bow of one of our men-of-war when in port is the jack, and is run up on the jack staff. It is a sign that the vessel is in shipshape. When the ship's wash goes up to dry, the jack comes down, because not even the best of ships is in order with the wash flapping in the breeze. If the wash is up, and the vessel suddenly has to fire a salute, down comes the wash; because when in port is the jack, and is run up on the jack staff. It is a sign that the vessel is in shipshape. When the ship's wash goes up to dry, the jack comes down, because not even the best of ships is in order with the wash flapping in the breeze. If the wash is up, and the vessel suddenly has to fire a salute, down comes the wash; because when in port is the jack, and is run up on the jack staff. It is a sign that the vessel is in shipshape.
