The Liver Regulates the Body A Sluggish Liver Needs Care.

Someone has said that people with Chronic Liver Complaint should be shut up away from humanity, for they are pessimists and see through a "glass darkly." Why? Because mental states depend upon physical states. Biliousness, Headaches, Dizziness and Constipation disappear after using Dr. King's New Life Pills. 25c. at your Druggist.

Clear Lake.

The Old Standard Grove's Tasteless Chill Tonic is equally valuable as a General Tonic because it contains the well known tonic properties of QUININE and IRON. It acts on the Liver, Drives out Malaria, Enriches the Blood and Builds up the Whole System. 50 cents.

GET RID OF CHILLS AND FEVER

Chills and Fever, or Malaria, are caused by a germ. Millions of these germs are soon multiplied from the few that first find foothold in the blood of their victim.

To RID YOURSELF of these germs you must PURIFY your blood, strengthen the vital organs, and make yourself so robust, vigorous and healthy that they will be CAST OUT to STAY OUT.

DR. THACHER'S Liver and Blood Syrup

has been widely known for many years as the "Best Chill Tonic." It has earned this reputation by helping countless THOUSANDS of people, many of them living in the malarial sections of this country, to CLEANSE their blood and BUILD UP their strength so that the fever germs would be cast out of their bodies.

A vast multitude of people take Dr. Thacher's Liver & Blood Syrup to prevent Fever and Chills from attacking them. It is a wise and profitable precaution. It PAYS to fortify yourself against malaria. And if it happens that you neglected to do that, and are now afflicted, it will surely pay you to take instant action and get this reliable remedy working for you at once.

TRY IT AND PROVE that relief is at hand. 50-cent and \$1.00 bottles.

\$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and restoring nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address: F. J. CHENEY & CO., Toledo, O. Sold by all Druggists. Take Hall's Family Pills for constipation.

TO MEMBERS OF THE KAFFIR CLUB.

You should at once prepare the acre for kaffir. Select a good, fair, uniform piece of land, preferably a sandy loam, and plow it as soon as it is dry enough. If it shines when turned over or forms a pasty lump in the hand it is too wet to plow. Use several loads of well rotted manure on it as a top dressing. A heavy yield of grain cannot be secured unless there is plenty of plant food available. Manure is the best source of plant food, and the sooner it is applied the better. If it is put on after this time it should be as a top dressing after plowing.

Plowwise.

Plow deep. Go one inch deeper than the land has formerly been plowed. If your soil blows, write for special instructions about plowing it. If it does not blow it should be plowed in January. If it is plowed late a disk harrow, set nearly straight, should be run over it both ways to knit furrow slice and subsoil together. Then harrow well to fine the surface and save the moisture.

SHED.

Select well formed heads of good size. Hang the heads up by strings where they will be dry and where mice cannot reach them. Remove a few kernels from each head and test for germination. Discard heads that show poor germination. When planting time comes rub the grain out on a wash board. If possible run it through a fanning mill several times. If no mill is available pour the seed into a tub or bucket of water. The chaff will float. Quickly pour the water and chaff off. Then dry before planting. Let me urge you to attend to these matters at once. Fertilizing the land, plowing it and selecting seed are all very important. Now is the time to look after them. Instructions on cultivation will follow in due time.

RULES FOR MEASURING KAFFIR PLATS.

One acre contains 43,560 square feet. How to measure off an acre: First drive a stake for the first corner, measure as far as you wish for one end or side of your plat. Drive a stake for the second corner. Then divide 43,560 by the number of feet between the two stakes. The result will be the length the other side should be. Measure off this side and drive stakes for the other two corners.

Example: If one end or side of your plat is 120 feet, the other side will be 363 feet.

43,560 divided by 120 equals 363. There should be a clear space not less than four feet wide on each side and each end of your plat to separate it from the rest of the crops.

For advice and personal instruction see your county agent.
